The Best Antiseptic for both Internal and External Use.

LISTERINE.

ANTISEPTIC, PROPHYLACTIC, DEODORANT,
NON-TOXIC, NON-IRRITANT, NON-ESCHAROTIC,
ABSOLUTELY SAFE, AGREEABLE, & CONVENIENT.

FORMULA.—LISTERINE is the essential antiseptic constituent of Thyme, Eucalyptus, Baptisia, Gautheria, and Mentha Arvensis, in combination. Each Fluid Drachm also contains two grains of refined and purified Benzo-boracic Acid.

DOSE.—Internally: One Teaspoonful Three or more times a day (as indicated), either full strength or diluted, as necessary for varied conditions.

LISTERINE is a well-proven antiseptic agent—an anti-zymotic—especially adapted to internal use, and to make and maintain surgical cleanliness—asepsis—in the treatment of all the parts of the human body, whether by spray, irrigation, atomisation, or simple local application, and therefore characterised by its particular adaptability to the field of

PREVENTIVE MEDICINE—INDIVIDUAL PROPHYLAXIS.

We bring Listerine to the attention of the Physicians, Surgeons, and Dentists of Great Britain, not as a new and untried preparation, but as a definite and uniform pharmaceutical product, that has acquired an enviable reputation in the United States and Canada.

Medical Men interested in Listerine will please send their address to our Agents, and receive by return mail Specimen and a Pamphlet of 36 quarto pages, embodying:—

A Tabulated Exhibit of the action of Listerine upon inert laboratory compounds.

Full and Exhaustive Reports and Clinical Observations from all sources, confirming the utility of Listerine as a general antiseptic for both internal and external use; and particularly—

Microscopic Observations, showing the comparative value and availability of various antiseptics in the treatment of diseases of the oral cavity, by W. D. MILLER, A.B., Ph.D., D.D.S., Professor of Operative and Clinical Dentistry, University of Berlin, from whose deductions Listerine appears to be the most acceptable prophylactic for the care and preservation of the Teeth.

Further information regarding the products of the LAMBERT PHARMACAL CO. may be had by application to the Company at St. Louis, U.S.; or to our

Wholesale Agents for Great Britain:—

Hicks's New Patent "Duplex Instantaner" Clinical Thermometer.

Designed for the Rapid Registration of Temperature.

This Thermometer has a double bulb, united in the centre by a piece of solid glass, which makes it fully six times stronger. It is *extremely sensitive*, taking the temperature considerably under one minute, and is easily cleaned and kept clean, as no dirt can pass between the bulbs. The section drawing A A B represents the bulb of the Thermometer as it would appear if cut clean across the centre; the darker portions being mercury, and the lighter solid glass. *Accuracy guaranteed.*

The following Extract from a Letter written by the Superintendent of the KEW OBSERVATORY, Richmond, Surrey, on the "DUPLIX INSTANTANER" CLINICAL THERMOMETER, will be read with interest:—

"I should think that their increased strength over the link bulbs will cause them to be widely purchased, although they take a few seconds over the half-minute.—(Signed) G. M. WHIPPLE, July 7th, 1890."

Price, with Magnifying Tube, 10s. 6d. each; with Non-magnifying Tube, 7s. 6d. each.

(Kew Observatory Certificate extra.)

To be obtained of all the leading Surgical Instrument Makers and Opticians

Sole Patentee and Manufacturer—

J. J. HICKS, 8, 9, and 10, Hatton Garden, London, E.C.

"NET OF HEALTH"

UNDERCLOTHING FOR LADIES, GENTLEMEN, AND CHILDREN

Registered.

MEDICAL PRESS AND CIRCULAR writes:—"This underclothing, manufactured by Messrs. STRUTHERS & Co., 83, Finsbury Pavement, E.C., is exceedingly comfortable to wear, and its open porous structure allows of free perspiration, but interposes a barrier of air between the skin and atmospheric vicissitudes. The advantages of an open, as compared with a closely-woven material for underclothing, have come to be generally recognised, but we have never seen anything to surpass the softness and comfort of these materials, the use of which is as appropriate in the hot as in the cold weather."

LONDON MEDICAL RECORDER says:—"The best general rule for clothing is to wear underclothing of a thoroughly hygienic character. There are several kinds to select from. We have tried them all, and are in favour of the 'Net of Health,' the especial form for the weaving of which was suggested to Messrs. STRUTHERS & Co., the manufacturers, by a London physician, and is founded on the dictum of such high authorities as Sir ERASMUS WILSON, Count RUMFORD and Sir BENJAMIN BRODIE."

PRICES, Carriage Paid, throughout the United Kingdom:

Cotton Vests for Ladies and Gentlemen, 1s. 6d.; Pants, 2s. 9d.; Combinations, 4s. 6d.

In ordering send size of chest, waist, and height. Patterns of Material, with Illustrated Price List, post free. Can only be obtained **DIRECT** from

STRUTHERS & COMPANY, 83, FINSBURY PAVEMENT, LONDON, E.C.

MB!

In the Recent epidemic of "INFLUENZA" in France, the Medical Profession there recognised "VIN MARIANI" as being the best Tonic and Restorative, and one which could be absolutely relied upon to hasten convalescence. When prescribing the Medical Profession are strongly advised to specify "VIN MARIANI," in order to avoid the substitution of imitations, often worthless, and consequently disappointing in effect.

VIN MARIANI

From the "LANCET," October 4th, 1890.

"'VIN MARIANI' is in all respects an excellent product. Its composition and character may be fairly judged from its taste. It is that of a generous Burgundy combined with the peculiar flavour characteristic of the leaf of erythroxyton coca. Our analytical notes are as follows: Alcohol, 13.23 per cent. by weight, 16.33 by volume, equal to 28.62 per cent. proof spirit; extract dried at 100°C. 9.25 per cent.; mineral matter (containing phosphate), 0.52 per cent. Boiling for some time, with the addition of a little carbonate of soda, resulted in the production of a green sediment, probably the coca extractives. (One bottle contains the equivalent of two ounces of leaves.) At the same time a characteristic odour not unlike that of choice tea evinced itself. When the alkaline fluid was allowed to cool it was shaken up with ether, and after a time the ether decanted. On evaporation this yielded a residue, which imparted to the tongue a distinctly numbing sensation. Another portion of the residue with a little hydrochloric acid, gave the characteristic crystals of cocaine hydrochlorate. The virtues of erythroxyton coca are now generally recognised. M. Mariani gives an account of the plant in an illustrated pamphlet. Therein he states that 'VIN MARIANI' has never produced cocainism. This is an important point, and is probably one of those examples in which the alkaloid in its state of natural combination differs in some respects in its physiological action from the free alkaloid chemically prepared."

 On application, we will post free of expense, to the Medical Profession, a complete *Essay and Treatise (Illustrated) on Erythroxyton Coca*, by ANGELO MARIANI.

Price 4s. per Bottle; or 45s. per Dozen. The Medical Profession, Clergymen, and Vocalists, either for their own use or for experimenting, can, upon enclosing their Card and P.O.O. to either of the London Wholesale Depôts, have **delivered them Free to Address**, any quantity at the Professional Price of 42s. per dozen.

THE THROAT AND VOICE.

CHLORATE OF POTASH TABLOIDS.

FOR AFFECTIONS OF THE VOICE, THROAT AND RESPIRATORY SURFACES GENERALLY.

By using the Tabloids the drug is effectually brought in contact with the oral mucous surfaces as a continuous gargle, and its specific action made certain. In acute sore throat, Chlorate of Potash "usually relieves the uneasiness in a few hours" (Cohen). "It is used in ulcerated mouth and follicular pharyngitis, and has been employed in croup, diphtheria, and spasm of the larynx" (Brunton).

"Of convenient size, they are beautifully made; and, as they dissolve slowly in the mouth, are well suited for throat affections."—THE LANCET.

Supplied to the Medical Profession in beautifully graven white metal boxes, blue silk label, at 4d. and 8d. each. Retail prices, 6d. and 1s. each.

CHLORIDE OF AMMONIUM TABLOIDS.

The solvent and discutient as well as antiphlogistic powers of Chloride of Ammonium are well known, and have led to its extensive employment in cases of sore throat and bronchitis, attended with abundant secretion of thick and tough mucus or phlegm. The Tabloids slowly dissolving secure direct and continuous contact with the inflamed surface. They quickly mitigate irritation, and lessen expectoration.

Two or three of the Tabloids will sometimes entirely relieve coughs that have long resisted treatment with ordinary remedies.

Supplied to the Medical Profession in bottles, at 5d. and 9d. each. Retail prices, 6d. and 1s. each.

VOICE TABLOIDS.

Composed of COCAINE, Chlorate of Potash and Brax.

Impart a clear and silvery tone to the voice. Easily retained in the mouth while singing or speaking. Now used by the leading singers and public speakers throughout the world.

DIRECTIONS.—A single Tabloid may be slowly dissolved in the mouth to remove huskiness or hoarseness.

Supplied to the Medical Profession in beautifully graven white metal boxes, blue silk label, at 8d. and 1s. 4d. each. Retail prices, 1s. and 2s. per box.

HAZELINE.

A colourless distilled product, containing the volatile active principles of the fresh green twigs and leaves of the Witch Hazel.

PROPERTIES — *Hæmostatic, Anodyne, and Astringent.*

Witch Hazel Plant.

Prescribed in cases of hæmorrhage from the nose, lungs, womb, rectum, etc. Is a valuable agent in the treatment of bruises, sprains, inflammation, peritonitis, piles, fistula, anal fissures, ulcers, varicose veins, eczematous surfaces, tonsillitis, pharyngitis, nasal and post nasal catarrh, stomatitis, leucorrhœa, nasal polypi, etc.

DIRECTIONS :—In Catarrh or cold in the head it may be sniffed up the nostrils with an equal part of tepid water.

Dose for irritated or inflamed throat and lungs, half to one teaspoonful occasionally.

Supplied to the Medical Profession, in $\frac{1}{2}$ lb. and 1 lb. bottles, at 1s. 2d. and 3s. 6d. each. Retail prices, 1s. 6d. and 4s. 6d. each.

VEREKER'S IMPROVED CHLORIDE OF AMMONIUM INHALER.

The neutral vapour of Chloride of Ammonium removes unhealthy and offensive secretions, and restores the long diseased or weakened nasal and respiratory mucous membrane to a healthy state, so that in cases of catarrh, where thickening, induration and irritation exist, a most decided improvement is brought about in a short time. In throat-cough, pharyngeal irritation, and relaxation and weakness of the throat, it acts as a most effective alterative and tonic to the mucous membrane.

Note.—This is the only Inhaler which affords absolutely neutral vapour of Ammonium Chloride, a most useful stimulating expectorant.

Dr. SMYLY, Ex.-Pres. Royal College of Surgeons, Ireland, says :—"It is the best Inhaler for Chloride of Ammonium I have met with."

Supplied to the Medical Profession at 5s. each. Retail 7s. each.

Burroughs, Wellcome & Co., Snow Hill Buildings, London, E.C.,

Will be happy to supply trial Specimens of Pharmaceutical Preparations to medical men free on request.
