

- S* 717 Flows over surface-mounted bluff bodies with different spanwise widths submerged in a deep turbulent boundary layer
X. Fang & M. F. Tachie
- 759 Diffusive instabilities and spatial patterning from the coupling of reaction–diffusion processes with Stokes flow in complex domains
R. A. Van Gorder, H. Kim & A. L. Krause
- 824 Lagrangian coherent structures and entrainment near the turbulent/non-turbulent interface of a gravity current
M. M. Neamtu-Halic, D. Krug, G. Haller & M. Holzner
- S* 844 Robust low-dimensional modelling of falling liquid films subject to variable wall heating
A. B. Thompson, S. N. Gomes, F. Denner, M. C. Dallaston & S. Kalliadasis
- 882 Self-similar dynamics of two-phase flows injected into a confined porous layer
Z. Zheng & J. A. Neufeld
- 922 Cessation and reversals of large-scale structures in square Rayleigh–Bénard cells
A. Castillo-Castellanos, A. Sergent, B. Podvin & M. Rossi
- S* 955 Oscillatory flow regimes around four cylinders in a diamond arrangement
C. Ren, L. Cheng, F. Tong, C. Xiong & T. Chen
- 1007 Analytical models of the wall-pressure spectrum under a turbulent boundary layer with adverse pressure gradient
G. Grasso, P. Jaiswal, H. Wu, S. Moreau & M. Roger
- 1063 Numerical investigation of controlling interfacial instabilities in non-standard Hele-Shaw configurations
L. C. Morrow, T. J. Moroney & S. W. McCue
- S* 1098 Slender body theory for particles with non-circular cross-sections with application to particle dynamics in shear flows
N. S. Borker & D. L. Koch
- 1134 Extension of classical stability theory to viscous planar wall-bounded shear flows
H. Lee & S. Wang
- 1163 Stability of a temporally evolving natural convection boundary layer on an isothermal wall
J. Ke, N. Williamson, S. W. Armfield, G. D. McBain & S. E. Norris
- 1186 Heat transfer and flow regimes in quasi-static magnetoconvection with a vertical magnetic field
M. Yan, M. A. Calkins, S. Maffei, K. Julien, S. M. Tobias & P. Marti

JFM Perspectives (online only)

- P1 Flow over natural or engineered surfaces: an adjoint homogenization perspective
A. Bottaro

JFM Rapids (online only)

- R1 Emergence of substructures inside the large-scale circulation induces transition in flow reversals in turbulent thermal convection
X. Chen, S.-D. Huang, K.-Q. Xia & H.-D. Xi
- R2 The charmed string: self-supporting loops through air drag
A. Daerr, J. Courson, M. Abello, W. Toutain & B. Andreotti
- R3 Third-order structure functions for isotropic turbulence with bidirectional energy transfer
J.-H. Xie & O. Bühler
- R4 Streamwise inclination angle of large wall-attached structures in turbulent boundary layers
R. Deshpande, J. P. Monty & I. Marusic

S indicates supplementary data or movies available online.

- 1 Dispersion of active particles in confined unidirectional flows
W. Q. Jiang & G. Q. Chen
- 35 Turbulent shear-layer mixing: initial conditions, and direct-numerical and large-eddy simulations
N. Sharan, G. Matheou & P. Dimotakis
- 82 The rapid distortion of two-way coupled particle-laden turbulence
M. H. Kasbaoui, D. L. Koch & O. Desjardins
