

# CONTENTS

Volume 54 Number 1

- 1 EUGENE SENETA. Obituary: Joseph Mark Gani AM, DSc, FAA, FASSA
- Research Papers*
- 12 TOMOMI MATSUI AND KATSUNORI ANO. Compare the ratio of symmetric polynomials of odds to one and stop
- 23 GREGORY GAGNON. Stochastic impulse control of exchange rates with Freidlin–Wentzell perturbations
- 42 KOJI TSUKUDA. Estimating the large mutation parameter of the Ewens sampling formula
- 55 ROMAIN ABRAHAM, AYMEN BOUAZIZ AND JEAN-FRANÇOIS DELMAS. Local limits of Galton–Watson trees conditioned on the number of protected nodes
- 66 JAAKKO LEHTOMAA. Large deviations of means of heavy-tailed random variables with finite moments of all orders
- 82 IBRAHIM RAHIMOV. Statistical inference for partially observed branching processes with immigration
- 96 MARKUS KUBA AND HENNING SULZBACH. On martingale tail sums in affine two-color urn models with multiple drawings
- 118 MATHIEU GERBER AND NICK WHITELEY. Stability with respect to initial conditions in  $V$ -norm for nonlinear filters with ergodic observations
- 134 MIGUEL A. SORDO AND GEORGIOS PSARRAKOS. Stochastic comparisons of interfailure times under a relevation replacement policy
- 146 ENRICO BARONI, REMCO VAN DER HOFSTAD AND JÚLIA KOMJÁTHY. Nonuniversality of weighted random graphs with infinite variance degree
- 165 RICHARD KENYON AND MEI YIN. On the asymptotics of constrained exponential random graphs
- 181 JOHN HASLEGRAVE AND MATE PULJIZ. Reaching consensus on a connected graph
- 199 ERNST SCHULTE-GEERS AND WOLFGANG STADJE. Small drift limit theorems for random walks
- 213 MICHAEL FUCHS, HSIEN-KUEI HWANG AND YOSHIAKI ITOH. From coin tossing to rock-paper-scissors and beyond: a log-exp gap theorem for selecting a leader
- 236 ERIK EKSTRÖM, KRISTOFFER GLOVER AND MARTA LENIEC. Dynkin games with heterogeneous beliefs
- 252 OFFER KELLA AND MARC YOR. Unifying the Dynkin and Lebesgue–Stieltjes formulae
- 267 O. J. BOXMA, E. FROSTIG AND D. PERRY. A reinsurance risk model with a threshold coverage policy: the Gerber–Shiu penalty function
- 286 CLAUDE LEFÈVRE, PHILIPPE PICARD AND MATTHIEU SIMON. Epidemic risk and insurance coverage
- 304 YI-CHING YAO, DANIEL WEI-CHUNG MIAO AND XENOS CHANG-SHUO LIN. Corrected discrete approximations for the conditional and unconditional distributions of the continuous scan statistic
- 320 M. V. BOUTSIKAS, M. V. KOUTRAS AND F. S. MILIENOS. Asymptotic results for the multiple scan statistic
- Short Communications*
- 331 MARTIN MEIER AND LEOPOLD SÖGNER. A new strategy for Robbins’ problem of optimal stopping
- 337 PHILIP A. ERNST AND LARRY SHEPP. On occupation times of the first and third quadrants for planar Brownian motion

Volume 54 Number 2

*Research Papers*

- 343 FABRICIO SIQUEIRA BENEVIDES AND MAŁGORZATA SULKOWSKA. Percolation and best-choice problem for powers of paths
- 363 MARKOS V. KOUTRAS AND DEMETRIOS P. LYBEROPOULOS. New maximal inequalities for  $N$ -demimartingales with scan statistic applications
- 379 A. TOOMAJ, S. M. SUNOJ AND J. NAVARRO. Some properties of the cumulative residual entropy of coherent and mixed systems
- 394 LUC DEVROYE, LÁSZLÓ GYÖRFI, GÁBOR LUGOSI AND HARRO WALK. On the measure of Voronoi cells
- 409 YUN ZENG AND CATHY HONGHUI XIA. Optimal bulking threshold of batch service queues
- 424 JE GUK KIM. On the convergence of the quasi-regression method: polynomial chaos and regularity
- 444 FANGJUN XU. Second-order limit laws for occupation times of fractional Brownian motion
- 462 R. LARAKI AND W. SUDDERTH. A continuity question of Dubins and Savage
- 474 YINGQIU LI, CHUANCUN YIN AND XIAOWEN ZHOU. On the last exit times for spectrally negative Lévy processes
- 490 PIERRE NYQUIST. Moderate deviation principles for importance sampling estimators of risk measures
- 507 M. SUVINTHRA AND K. BALACHANDRAN. Large deviations for the stochastic predator–prey model with nonlinear functional response
- 522 PETER CZUPPON AND PETER PFAFFELHUBER. A spatial model for selection and cooperation
- 540 KSENIA CHERNYSH AND SANJAY RAMASSAMY. Coupling any number of balls in the infinite-bin model
- 550 THOMAS O. MCDONALD AND MAREK KIMMEL. Multitype infinite-allele branching processes in continuous time
- 569 OLLIVIER HYRIEN, KOSTO V. MITOV AND NIKOLAY M. YANEV. Subcritical Sevastyanov branching processes with nonhomogeneous Poisson immigration
- 588 VLADIMIR VATUTIN AND ELENA DYAKONOVA. Path to survival for the critical branching processes in a random environment
- 603 DAVID LANDRIAULT, BIN LI AND HONGZHONG ZHANG. A unified approach for drawdown (drawup) of time-homogeneous Markov processes
- 627 LU-JING HUANG AND YONG-HUA MAO. On some mixing times for nonreversible finite Markov chains
- 638 K. KAMATANI. Ergodicity of Markov chain Monte Carlo with reversible proposal

*Letter to the Editor*

- 655 YAMING YU. Minimum variance in the coupon collector's problem

Volume 54 Number 3

*Research Papers*

- 657 MARK BROWN, JOEL E. COHEN AND VICTOR H. DE LA PEÑA. Taylor's law, via ratios, for some distributions with infinite mean
- 670 YINGHUA DONG AND GENNADY SAMORODNITSKY. Contact distribution in a thinned Boolean model with power-law radii
- 685 XIAOQING PAN AND XIAOHU LI. Increasing convex order on generalized aggregation of SAI random variables with applications
- 701 HRISHIKESH BALAJI AND HOSAM MAHMOUD. The Gini index of random trees with an application to caterpillars
- 710 HUY N. CHAU, ANDREA COSSO, CLAUDIO FONTANA AND OLEKSII MOSTOVYI. Optimal investment with intermediate consumption under no unbounded profit with bounded risk
- 720 SERIK SAGITOV AND THIBAUT FRANCE. Limit theorems for pure death processes coming down from infinity
- 732 PÉTER KEVEL. Implicit renewal theory in the arithmetic case
- 750 JØRUND GÅSEMYSR AND BENT NATVIG. Improved availability bounds for binary and multistate monotone systems with independent component processes
- 763 CHUNLING LUO, ZHOU HE AND CHIN HON TAN. Almost stochastic dominance under inconsistent utility and loss functions
- 773 ANNE SABOURIN AND JOHAN SEGERS. Marginal standardization of upper semicontinuous processes. With application to max-stable processes
- 797 MICHAEL FALK AND MAXIMILIAN ZOTT. On generalized max-linear models in max-stable random fields
- 811 ZHONGQUAN TAN. Limit laws on extremes of nonhomogeneous Gaussian random fields
- 833 ANDERS RØNN-NIELSEN AND EVA B. VEDEL JENSEN. Excursion sets of infinitely divisible random fields with convolution equivalent Lévy measure
- 852 TONGKEUN CHANG. Absolute continuity of distributions of one-dimensional Lévy processes
- 873 BORIS BUCHMANN, YUGUANG F. IPSEN AND ROSS MALLER. Functional laws for trimmed Lévy processes
- 890 CLAUDE LEFÈVRE AND PHILIPPE PICARD. On the outcome of epidemics with detections
- 905 ETIENNE PARDOUX AND BRICE SAMEGNI-KEPGNOU. Large deviation principle for epidemic models
- 921 GIANMARCO BET, REMCO VAN DER HOFSTAD AND JOHAN S. H. VAN LEEUWAARDEN. Finite-pool queueing with heavy-tailed services
- 943 HARSHA HONNAPPA. Rare events of transitory queues

*Short Communications*

- 963 VADIM ARKIN AND ALEXANDER SLASTNIKOV. On the threshold strategies in optimal stopping problems for diffusion processes
- 970 BIN CHENG AND JIANTIAN WANG. Stochastic comparison of parallel systems with heterogeneous exponential components

Volume 54 Number 4

*Research Papers*

- 977 SAMUEL N. COHEN AND VICTOR FEDYASHOV. Nash equilibria for nonzero-sum ergodic stochastic differential games
- 995 S. FOSS AND A. L. STOLYAR. Large-scale join-idle-queue system with general service times
- 1008 ADRIAN BADDELEY AND GOPALAN NAIR. Poisson-saddlepoint approximation for Gibbs point processes with infinite-order interaction: in memory of Peter Hall
- 1027 MAJID ASADI, NADER EBRAHIMI AND EHSAN S. SOOFI. Connections of Gini, Fisher, and Shannon by Bayes risk under proportional hazards
- 1051 S. ASHRAFI AND M. ASADI. The failure probability of components in three-state networks with applications to age replacement policy
- 1071 XIN GUO, ALEXEY PIUNOVSKIY AND YI ZHANG. Note on discounted continuous-time Markov decision processes with a lower bounding function
- 1089 GEROLD ALSMEYER, DARIUSZ BURACZEWSKI AND ALEXANDER IKSANOV. Null recurrence and transience of random difference equations in the contractive case
- 1111 KEN YAMAMOTO. Central limit theorem for the Horton-Strahler bifurcation ratio of general branch order
- 1125 MICHAEL FUCHS AND HSIEN-KUEI HWANG. Dependence between path-length and size in random digital trees
- 1144 NICKOS PAPADATOS. On sequences of expected maxima and expected ranges
- 1167 JIANG ZHOU AND LAN WU. The distribution of refracted Lévy processes with jumps having rational Laplace transforms
- 1193 CHEN YANG, KRISTIAN P. SENDOVA AND ZHONG LI. On the Parisian ruin of the dual Lévy risk model
- 1213 A. B. DIEKER AND GUIDO R. LAGOS. A dichotomy for sampling barrier-crossing events of random walks with regularly varying tails
- 1233 ALAIN DURMUS, SYLVAIN LE CORFF, ERIC MOULINES AND GARETH O. ROBERTS. Optimal scaling of the random walk Metropolis algorithm under  $L^p$  mean differentiability
- 1261 BÉLA BOLLOBÁS, OLIVER COOLEY, MIHYUN KANG AND CHRISTOPH KOCH. Jigsaw percolation on random hypergraphs
- 1278 FIORALBA AJAZI, GEORGE M. NAPOLITANO AND TATYANA TUROVA. Phase transition in random distance graphs on the torus

*Short Communications*

- 1295 TAKIS KONSTANTOPOULOS AND LINGLONG YUAN. A probabilistic interpretation of the Gaussian binomial coefficients

## Subscription rates

Subscription rates for volume **54** (2017) of *Journal of Applied Probability* (JAP) are as follows (post free and online access at <http://cambridge.org/jpr>). For libraries and institutions: US\$361.00, £233.00 (online only); US\$397.00, £256.00 (online & print). For individuals, US\$137.00, £88.00 (online & print). The subscription rates for volume **49** (2017) of *Advances in Applied Probability*, the companion publication, are the same; for individual subscribers that order both journals at the same time, the combined price is discounted by 10%. Please send all subscription renewals and enquiries to: [subscriptions\\_newyork@cambridge.org](mailto:subscriptions_newyork@cambridge.org) in the Americas and [journals@cambridge.org](mailto:journals@cambridge.org) for the Rest of the World.

## Notes for contributors

A submission to Applied Probability is considered as a submission to either *Journal of Applied Probability* (JAP) or *Advances in Applied Probability* (AAP). Longer papers are typically published in AAP, but the assignment of papers between the two journals is made by the Editor-in-Chief on an issue-by-issue basis. Short communications and letters specifically relating to papers appearing in either JAP or AAP are published in JAP.

Papers submitted to the Applied Probability journals are considered on the understanding that they have not been published previously and are not under consideration by another publication. Accepted papers will not be published elsewhere without the written permission of the Trust. Submitted papers should be in English. It is the author's responsibility to ensure an acceptable standard of language, and a paper failing to meet this requirement may go back to the author for rewriting before being sent out for review.

Papers should include: (i) a **short abstract** of 4–10 lines giving a non-mathematical description of the subject matter and results; (ii) a list of **keywords** detailing the contents; and (iii) a list of **classifications**, using the 2010 Mathematics Subject Classification scheme (<http://www.ams.org/msc/>). Letters to the Editor need not include these. To assist authors in writing papers in the Applied Probability style, they may use the L<sup>A</sup>T<sub>E</sub>X class file `aptpub.cls`, available from <http://www.appliedprobability.org/>. Use of this class file is not a condition of submission, but will considerably increase the speed at which papers are processed.

Papers should be submitted as portable document format (PDF) files, not exceeding 1 Mb, to the email address [submissions\\_japaap@sheffield.ac.uk](mailto:submissions_japaap@sheffield.ac.uk). All submissions will be acknowledged on receipt.

## Copyright

The copyright of all published papers is vested in the Applied Probability Trust. When a paper is accepted for publication, the Trust asks the authors to assign copyright by signing a form in which the terms of copyright are listed. Failure to do this promptly may delay or prevent publication.

Authorisation to photocopy items for internal or personal use, or the internal or personal use of specific clients, is granted by the Applied Probability Trust for libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the corresponding processing and royalty fees (see <http://www.copyright.com>) are paid directly to CCC, 222 Rosewood Drive, Danvers, MA 01923, USA. 0021–9002/17
