## **THE COLD WAR LEGACY** Thomas H. Naylor, *Duke University*

“The turn of history has delivered what Naylor was among the first to anticipate, an end to the Cold War... He was convinced that a ‘revolution’ was coming, and it came... If not a prophet, Naylor is certainly an astute observer and analyst. We will benefit by listening to him now.”

## **THE INTERNATIONALIZATION OF HUMAN RIGHTS**

David P. Forsythe,  
*University of Nebraska*

This fascinating exploration of the campaign on behalf of human rights since 1945 shows that this issue, once considered the province of states, has now become an integral part of international relations. Forsythe provocatively probes such hotly-debated questions as what constitutes a human right, whether international action for human rights is a form of cultural imperialism, and whether there can be international standards for human rights but variation among states in implementing them.

# The Military Revolution and Political Change

Origins of Democracy and Autocracy in Early Modern Europe

*Brian M. Downing*

To examine the origins of democracy and dictatorship, Brian Downing focuses on the importance of medieval political configurations and of military modernization in the early modern period. Downing maintains that in late medieval times an array of constitutional arrangements distinguished Western Europe from other parts of the world and predisposed it toward liberal democracy. He then looks at how medieval constitutionalism was affected by the "military revolution" of the early modern era—the shift from small, decentralized feudal levies to large standing armies.

**"The author's emphasis on the role of the instruments of violence and repression in inhibiting liberal and democratic trends is new to scholarship and quite convincing. Here is comparative history at its best."**—*Barrington Moore, Jr.*
