MULTIFUNCTIONAL COMPOSITES

Thermal, Mechanical and Magneto-mechanical Characterization of Liquid Crystalline Elastomers Loaded with Iron Oxide Nanoparticles3

Stephany Herrera-Posada, Barbara O. Calcagno,
and Aldo Acevedo

Anisotropic Composites of Desaminotyrosine and Desaminotyrosyl Tyrosine Functionalized Gelatin and Bioactive Glass Microparticles9

Konstanze K. Julich-Gruner, Andreas Lendlein,
Aldo R. Boccaccini, and Axel T. Neffe

Potential of Polarized PVDF/Carbon Nanotube Nanocomposite Scaffolds for Cell Growth15

Jun Young Lim, Sook Young Park, Hyun Jeong Kim, and
Yongsok Seo

Molecular Disorder in Prestrained Nanocomposites: Effects of Processing on Durability of Thermally-active Ethylene-vinyl Acetate | PyChol | Multiwall Carbon Nanotubes21

Allen D. Winter, Chernu Jaye, Daniel Fischer,
Maria Omastová, and Eva M. Campo

Investigating Thiol-epoxy Composites for Semiconductor Die Attach Adhesives27

Andrew Wei, Radu Reit, and Walter Voit

STIMULI-SENSITIVE POLYMERS AND GELS

Systematic Study on the Remote Triggering of Thermo-responsive Hydrogels using RF Heating of Fe₃O₄ Nanoparticles35

Daniel Denmark, Devajyoti Mukherjee, Janae Bradley,
Sarath Witanachchi, and Pritish Mukherjee

Relation-between Nanostructural Changes and Macroscopic Effects during Reversible Temperature-memory Effect under Stress-free Conditions in Semicrystalline Polymer Networks41

Ulrich Nöchel, Karl Kratz, Marc Behl, and Andreas Lendlein

Photo-reversibility of Cinnamylidene Acetic Acid Derived Crosslinks in Poly(ϵ -caprolactone) Networks49

Florian Störmann, Christian Wischke, and Andreas Lendlein

Branched Amphiphilic Polysulfides: Influence of Macromolecular Architecture on Self-assembly and Oxidation Responsiveness55

Richard d’Arcy and Nicola Tirelli

Modelling and Analysis of pH Responsive Hydrogels for the Development of Biomimetic Photo-actuating Structures65

Michael P.M. Dicker, Ian P. Bond, Jonathan M. Rossiter,
Charl F.J. Faul, and Paul M. Weaver

Thermally Controlled Shape-memory Investigations of Nanocomposites based on Oligo(ω -pentadecalactone) and Magnetic Nanoparticles Acting as Crosslinks71

Muhammad Yasar Razzaq, Marc Behl, and Andreas Lendlein

CHARACTERIZATION OF MULTIFUNCTIONAL POLYMER SYSTEMS

Biohybrid Fibro-porous Vascular Scaffolds: Effect of Crosslinking on Properties79

Vinoy Thomas, Danna Nozik, Harsh Patel, Raj K. Singh,
and Yogesh K. Vohra

Purity of Mushroom Tyrosinase as a Biocatalyst for Biomaterial Synthesis Affects the Stability of Therapeutic Peptides85

Miroslava Racheva, Oscar Romero,
Konstanze K. Julich-Gruner, Anne S. Ulrich,
Christian Wischke, and Andreas Lendlein

Cationic Cellulose Nanocrystals: Synthesis, Characterization and Cytotoxicity Studies91

Rajesh Sunasee, Usha D. Hemraz, Karina Ckless,
James S. Burdick, and Yaman Boluk

Immuno-compatibility of Desaminotyrosine and Desaminotyrosyl Tyrosine Functionalized Star-shaped Oligo(ethylene glycol)s with Different Molecular Weights97

Toralf Roch, Konstanze K. Julich-Gruner, Axel T. Neffe,
Nan Ma, and Andreas Lendlein

Influence of Glycidylmethacrylate Functional Groups Attached to Gelatin on the Formation and Properties of Hydrogels103

Candy Löwenberg, Konstanze K. Julich-Gruner,
Axel T. Neffe, and Andreas Lendlein

Robot Assisted Synthesis and Characterization of Polyester-based Polyurethanes109

Stefan Baudis, Andreas Lendlein, and Marc Behl

The Use of MRI as a Technique for Hydrophilic Polymer Swelling Characterization117

Michaela Gajdošová, Nina Sarvašová, Daniel Pěček,
and František Štěpánek

Thermomechanical Characterization of a Series of Crosslinked Poly[ethylene-co-(vinyl acetate)] (PEVA) Copolymers123

Matthias Heuchel, Laith Al-Qaisi, Karl Kratz,
Ulrich Nöchel, Marc Behl, and Andreas Lendlein

Poly(*n*-butylcyanoacrylate) Nanoparticles as Carriers for Adenosine Triphosphate131

Christian Wischke, Judith Weigel, and Andreas Lendlein

STRUCTURED SURFACES AND MULTILAYERED POLYMERS

Using Lasers to Create Metal-polyimide Films with Alternating Layers139

Folasadé Faulkner and Brent Koplitz

A Robust Multilayer Dielectric Elastomer Actuator145

Mason A. Wolak and Lei Zhu

Nanofiber-based Membrane Separators for Lithium-ion Batteries157

Mataz Alcoutlabi, Hun Lee, and Xiangwu Zhang

Fabrication of Silk Microstructures using Photolithography163

Ramendra K. Pal, Nicholas E. Kurland, Subhas C. Kundu, and Vamsi K. Yadavalli

PREFACE

Symposium B, “Multifunctional Polymeric and Hybrid Materials,” was held November 30 – December 5 at the 2014 MRS Fall Meeting in Boston, Massachusetts, USA.

Polymer-based materials offer a vast and enormously flexible platform to provide, receive, and respond to signals from their environment, and the impressive progress in this field includes their use to respond to individual or combined chemical, biological and physical stimuli. In particular, there is an increasing demand for intelligent (self-regulating) materials that integrate multiple functions within their performance. Such multifunctional materials often feature hybrid structures, e.g., (nano)composites, blends, fibrillar or multilayer constructs, and distinct phases separately or synergically contribute to the overall responsive performance, which is further enhanced by the possibility of a hierarchical organization of the structural constituents at various length scales (molecular, nano, and micro). The latter point also encompasses the molecular control of polymer and composite architectures (dendritic/hyperbranched macromolecules, unimolecular micelles, statistic vs. directed colloidal aggregation, etc.).

This symposium proceedings volume includes recent advances in the process of achieving multifunctionality of materials by mimicry of biological structure and interactions, by the presence of natural or biologically active components, such as enzymes or polymeric prodrugs, via complex, but controlled physical behavior, e.g., actively moving polymers (shape-memory, shape-morphing), or by simultaneously performing multiple activities, e.g., interacting with a biological environment while also imaging it. Additional functions include electrical or thermal conductivity, redox behavior, (bio)sensing, temperature-dependent behavior, bio-compatibility and/or controlled degradation, bioresponsive drug delivery and self-healing.

The papers are divided into four sections, representing the principal topics of Symposium B: (1) *Multifunctional Composites*, (2) *Stimuli-Sensitive Polymers and Gels*, (3) *Characterization of Multifunctional Polymer Systems*, and (4) *Structured Surfaces and Multilayered Polymers*. We thank all authors for their contributions, which span these topics. We hope that this collection of articles will inspire the readership to participate in research and facilitate new technology in the challenging and fascinating field of multifunctional materials.

We kindly acknowledge financial support for this symposium from FEI Deutschland GmbH, and RSC-Material Horizons, Royal Society of Chemistry.
