# and cheap at the price!

You buy the knob for £357 and we throw the audiometer in free. It is a very expensive knob but what is better than a free audiometer? You have got to buy the knob because it is attached to the Amplivox Model 103 Audiometer.

Until the introduction of the Model 103, clinical audiometry relied entirely on the audiometrist remembering complicated switch procedures. We believe clinical audiometry should be kept simple.

We should mention that this knob will enable you to select 18 different audiometric functions:

- Pure Tone Air Conduction
- Pure Tone Bone Conduction
- Narrow Band Masking
- Wide Band (White Noise) Masking
- Alternative Binaural Loudness Balance
- Simultaneous Binaural Loudness Balance
- Speech, Live Voice
- Speech, Recorded
- Speech with Masking
- SISI Test
- Lüscher DL Test
- Audiometer Weber Test
- SAL Test
- Rainville Test
- Shifting Voice
- Stenger Test
- Modified Stenger Test
- Tone Decay Test

# A Product from the Sea for E.N.T. Surgeons

## \*calgitex

Calgitex calcium alginate E.N.T. Gauze is made from highly purified specially processed calcium alginate, derived from seaweed. This product is used extensively by E.N.T. surgeons throughout the world, it has a slow absorption rate, and can be easily removed from the nose without effecting or damaging the tissue.

In the field of aural surgery Calgitex is highly suitable for packing procedures due to its solubility, soft texture, and discouragement of haemorrhage.

Packed in vials containing one metre of ribbon gauze.  
*Obtainable from your usual Surgical or Pharmaceutical Supplier*

eliminate the cross infection risk

**Opulets**  
sterile, single dose  
eye and ear preparations

To overcome the risk of contamination in eye and ear infections, Opulets have been developed as sterile, single dose eye and ear drop tubes and ointment capsules. Each is packed in a film sachet and sterilized by gamma radiation, ensuring effective sterilization, with no loss of activity – the strict criteria of efficacy and safety being met in full.

After each application, these single dose units are discarded, eliminating cross infection risks – each treatment administered by either medical staff or the patient is thus under the most sterile conditions possible in practical medicine.

Opulets provide the lowest unit price available compared with all other preparations of a similar nature. Presentations available at present are:
