Erratum

Ronald S. Wilson

University of Louisville School of Medicine, Louisville, Kentucky

In my article "Analysis of Longitudinal Twin Data: Basic Model and Applications to Physical Growth Measures" in Volume 28:93–105 (1979) the footnote to Table 5 on page 100 should read $\sigma_{\frac{2}{e}} = \sigma \frac{2}{e}/q$.

Also, in the equation at the top of page 102, the two separate terms in the denominator should each be multiplied by $(q - 1)$, ie,

$$\sqrt{\frac{1}{(P_{MZ}^{-2})(q-1)} + \frac{1}{(P_{DZ}^{-2})(q-1)}}$$
