April 2025

Infection Control & Hospital Epidemiology

ICHE

CONTENTS

Commentary

- 339** Resilience: the need to address it from frontline, to organizational, and national levels
Mohamad G. Fakih

Original Articles

- 341** Patient safety as a measure of resilience in US hospitals: central line-associated bloodstream infections, July 2020 through June 2021
Mathew R.P. Sapiano, Margaret A. Dudeck, Prachi R. Patel, Alison M. Binder, Aaron Kofman, David T. Kuhar, Satish K. Pillai, Matthew J. Stuckey, Jonathan R. Edwards and Andrea L. Benin
- 348** Prediction of central line-associated bloodstream infection: focus on time of insertion
Ari Moskowitz, Melissa Fazzari, Luke Andrea, Jianwen Wu, Arup Gope, Thomas Butler, Amira Mohamed, Christine Shen, Fran Ganz-Lord, Inessa Gendlina and Michelle Ng Gong
- 356** Racial and ethnic disparities in central line-associated bloodstream infections (CLABSI) in hospitalized patients: a risk-adjusted analysis
Sandeep Tripathi, Taylor Walter, and Jeremy McGarvey
- 363** The impact of infectious diseases department on the incidence of hospital-onset bacteremia and fungemia at a tertiary care center: a retrospective cohort study
Yuya Kawamoto, Akane Takamatsu, Kenjiro Matsui, Yohei Doi and Hitoshi Honda
- 370** Hospital-onset bacteremia in the neonatal intensive care unit: strategies for risk adjustment
Erica C. Prochaska, Shaoming Xiao, Elizabeth Colantuoni, Nora Elhaisouni, Reese H. Clark, Julia Johnson, Sagori Mukhopadhyay, Ibukunoluwa C. Kalu, Danielle M. Zerr, Patrick J. Reich, Jessica Roberts, Dustin D. Flannery, Aaron M. Milstone and Group Information: CDC Prevention Epicenters Program
- 377** Dropping the urine culture: sustained CAUTI reduction using a UTI order panel
Cristina Torres, Elizabeth Lyden, Gayle Gillett, Mark E. Rupp and Trevor C. Van Schooneveld
- 384** *Staphylococcus aureus* colonization and surgical site infections among patients undergoing surgical fixation for acute fractures
Megan Ahmann, Jocelyn Compton, Jean Pottinger, Richard Uhlenhopp, Melissa Ward, Ambar Haleem, Michael Willey, Marin Schweizer and Loreen Herwaldt
- 391** Clinical outcomes and hospital-reported cost associated with surgical site infections and the co-occurrence of hospital-onset bacteremia and fungemia across US hospitals
ChinEn Ai, Molly Jung, Samantha Bastow, Ghislene Adjaoute, David Bostick and Calvin C. Yu
- 398** Identifying patients at high risk for carbapenem-resistant Enterobacterales (CRE) carriage on admission to acute care hospitals: validating and expanding on a public health model
Radhika Prakash-Asrani, Chris Bower, Chad Robichaux, Barney Chan, Jesse T. Jacob, Scott K. Fridkin and Jessica Howard-Anderson

- 404** Identifying healthcare transmission routes of nontuberculous mycobacteria with whole genome sequencing: a systematic review
Spencer D. Schrank, Dale Z. Gozum, Elise M. Martin and Graham M. Snyder
- 410** Benchmarking broad-spectrum antibiotic use in older adult pneumonia inpatients: a risk-adjusted smoothed observed-to-expected ratio approach
Abbas Khatoun, Noriko Sasaki, Susumu Kunisawa, Kiyohide Fushimi and Yuichi Imanaka
- 416** Assessing the safety of increased outpatient cephalosporin use following the modification of penicillin allergy cross-reactivity alerts
Bryan Schneider, Kelly M. Percival, Anna M. Rhinehart, Jared Frye, Deanna L. McDanel, Kevin L. Bebout, Lukasz D. Weiner, Sarah A. Auerbach, Amy M. Dowden, Dilek Ince and Patrick Kinn

Concise Communications

- 422** A deeper look at serious superficial incisional surgical site infections (SSISIs): prevalence, impact, and implications for hospital performance rankings
Jessica Seidelman, Brittain Wood, Polly Padgett, Valerie Payne, Linda Crane, Linda Roach and Deverick J. Anderson
- 427** Differences in stewardship strategies between hospitals performing well and poorly on a risk-adjusted metric for post-discharge antibiotic use
Daniel J. Livorsi, James A. Merchant, Hyunkeun Cho, Matthew Bidwell Goetz, Bruce Alexander, Brice Beck and Michihiko Goto
- 431** Association of facility vaccination policy with influenza vaccination among healthcare personnel in acute care hospitals: national Healthcare Safety Network, 2021–22 influenza season
Cam-Van T. Huynh, Emily Haanschoten, Minn M. Soe, Kira Barbre, Lu Meng, Jonathan R. Edwards, Elizabeth J. Kalayil, Megan C. Lindley, Hannah E. Reses, David T. Kuhar, Matthew J. Stuckey, Andrea Benin and Jeneita M. Bell
- 436** Elimination of *Legionella* colonization in a hospital water system: evidence from 23 years of chlorine dioxide use
Natalie G. Exum, Lindsay N. Avolio, Gregory Bova, Clare Rock, Melanie S. Curless, Lisa L. Maragakis and Kellogg J. Schwab

Letters to the Editor

- 439** Beyond the hospital doors: challenges and insights from a multi-state healthcare system outpatient infection prevention program
Kelli Heisner, Jessica Layell, Robert Citronberg, Mindy Sampson, Catherine Passaretti and Lynn Skelton
- 441** Response to “Healthcare worker attitudes on routine non-urological preoperative urine cultures: a qualitative assessment”
Anas Babar
- 442** Response to Mr. Babar’s Letter to the Editor regarding “Healthcare worker attitudes on routine non-urological preoperative urine cultures: a qualitative assessment”
Julia E. Friberg Walhof, Marin L. Schweizer, Kalpana Gupta, Madisen Brown, Daniel Suh, Judith Strymish, William J. O’Brien, Jeffrey Chan, Kelly Miell, Vanessa Au, Barbara W. Trautner and Kimberly C. Dukes

Infection Control & Hospital Epidemiology (ISSN 0899-823X) is published monthly by Cambridge University Press, One Liberty Plaza, New York, NY 10006, USA. Printed by Sheridan, a CJK Group Company.

Editorial Office

Communications should be addressed to the Editor, *Infection Control & Hospital Epidemiology*, One Liberty Plaza, New York, NY 10006 (email: iche.managingeditor@cambridge.org). Contributors should consult the Instructions for Contributors, which is available at the journal's Web site.

Advertising

Please direct advertising inquiries to M. J. Mrvica Associates, 2 West Taunton Avenue, Berlin, NJ 08009 (e-mail: mjmrvica@mrvica.com; telephone: 856-768-9360, fax: 856-753-0064). Publication of an advertisement in *Infection Control & Hospital Epidemiology* does not imply endorsement of its claims by the Society for Healthcare Epidemiology of America, by the Editor, or by Cambridge University Press.

Permissions

Articles may be copied or otherwise reused without permission only to the extent permitted by Sections 107 and 108 of the US Copyright Law. Permission to copy articles for personal, internal, classroom, or library use may be obtained from the Copyright Clearance Center (<http://www.copyright.com>,

email: info@copyright.com). For all other uses, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale, please contact Cambridge University Press. Full details may be found at: www.cambridge.org/about-us/rights-permissions.

Subscriptions

The individual subscription prices for 2025 are: Print & Online: \$381; Online Only: \$286. Individuals have the option to order directly from Cambridge University Press. Institutional print + electronic and e-only subscriptions are available from Cambridge University Press and include unlimited online access; rates are tiered according to an institution's type and research output and may be reviewed at the journal's homepage on Cambridge Core: cambridge.org/ICHE.

Please direct subscription inquiries and requests for back issues to Customer Services at Cambridge University Press, e-mail: subscriptions_newyork@cambridge.org (USA, Canada, and Mexico) or journals@cambridge.org (outside of USA, Canada, and Mexico).

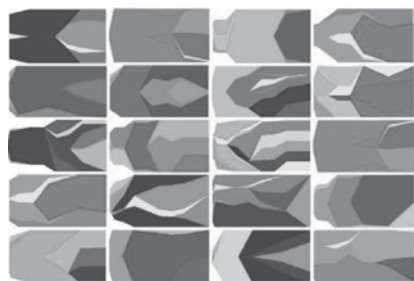

Postmaster: Send address changes to *Infection Control & Hospital Epidemiology*, Cambridge University Press, One Liberty Plaza, New York, NY 10006 USA.

About the cover:

Beginning with volume 43 (January 2022), the cover of *Infection Control & Hospital Epidemiology* (ICHE) will feature art inspired by or reflective of topics within the scope of the journal and their impact on patients, healthcare personnel and our society. These topics include healthcare-associated infections, antimicrobial resistance, and healthcare epidemiology. The intent is to feature original artwork that has been created by individuals who have a personal connection to one or more of these topics through their clinical work, research, or experience as a patient or an affected patient's family member, friend or advocate. The goal is to provide readers with a visual reminder of the human impact of the topics addressed in the journal and the importance of the work being done by those who read or contribute to ICHE and by all who are trying to make healthcare safer through the elimination of healthcare-associated infections.

For more information about the ICHE cover and how to submit artwork for consideration for a future cover, please visit the ICHE website: <https://www.cambridge.org/core/journals/infection-control-and-hospital-epidemiology/front-covers>

2025

Title: *The Dynamics of Bacterial Evolution*, 2020

Artist: Angharad Ellen Green, PhD

Medium: The artwork is made up of individual Muller plots representing *Streptococcus pneumoniae* bacteria lineages that were evolved separately within nasopharynx and lung environments. The command line program muller (v0.6.0 - <https://pypi.org/project/muller/>), with default parameters applied, was used to produce genotypes and trajectories tables for each of the evolved lineages. These tables were then used as inputs for ggplot2 (v3.3.2) and ggmuller (v0.5.4) in R-Studio (v4.0.2), to produce Muller plots. The individual plots were then assembled to produce the resulting artwork.

Dr. Green spoke to ICHE about her artwork.

What was the inspiration for this artwork? My postdoctoral research used an *in vivo* experimental evolution model to understand how *Streptococcus pneumoniae* (the pneumococcus) adapts to the lung and nasopharynx environments. The pneumococcus was experimentally evolved through a lung infection model and a nasopharynx infection model, producing independently evolved lung and nasopharynx lineages. We sequenced the evolved lineages and compared them to the ancestor to understand how their genomes had changed. This work also enabled us to determine how environmental differences between the upper and lower airways might shape pneumococcal adaptation and evolution. The resulting sequencing dataset was very large and complex with lots of interesting results. I wanted to use an effective method of visualising the data and Muller plots were chosen to display the evolutionary dynamics of mutations found in each evolved lineage over time. In these plots, each mutation is grouped as a genotype, which is represented by a different colour, and the blocks of colour expand when the genetic changes make the bacteria better able to survive in their local conditions. After completing the data analysis and publishing this work, I created this artwork as a memento of my postdoctoral research and I have a canvas of this work hanging in my apartment. Additionally, I wanted to demonstrate how scientific artwork can help visualise the complexities of evolution dynamics and help us to better understand bacterial processes.

What is your personnel connection to the content of ICHE? Throughout my career as a microbiologist, I have carried out research to investigate bacterial pathogenesis and antimicrobial resistance (AMR) of WHO-defined bacterial priority pathogens, such as *Pseudomonas aeruginosa*, methicillin-resistant *Staphylococcus aureus* (MRSA) and *Streptococcus pneumoniae*. I have actively promoted the importance of microbial genomic research to confront current global challenges, such as AMR and healthcare-acquired infections. I have championed microbiology research through my various roles in academia, volunteering on the Microbiology Society's Policy Committee and as a Research Manager at the Healthcare Infection Society. It is an honour for my bacterial evolution artwork to be on the cover of ICHE.

Given the scope of the journal, why is this work appropriate for the cover of *Infection Control & Hospital Epidemiology*? This artwork is made up of a collection of graphs called Muller plots, which are used to visualize how bacteria evolve when grown in diverse environments. The colours represent genetic changes that have taken place in the presence of environmental factors, such

Cover image: *The Dynamics of Bacterial Evolution*, 2020

as antimicrobials and the host immune system. The dynamics of evolution are complex and being able to visualise this process enables scientists to better understand bacterial processes, including the development of AMR. This artwork is appropriate for the cover of ICHE as it was created as a direct result of scientific research into how bacteria can adapt and evolve in diverse host niches to cause disease. Additionally, this artwork makes it possible for scientists to visualise the complexities of the dynamics of evolution and comprehend how bacteria adapt to different host environments.

Dr. Green is a Senior Research Data Steward in the Advanced Research Computing Centre (ARC) at UCL in London. Her postdoctoral research at the University of Liverpool was supported by a Sir Henry Dale Fellowship, awarded by the Wellcome Trust and the Royal Society (grant number 204457/Z/16/Z) to Dr. Daniel R Neill. The research from which this artwork was derived was published in Molecular Biology and Evolution (Green AE, Howarth D, Chaguza C, et al. Pneumococcal colonization and virulence factors identified via experimental evolution in infection models. Mol Biol Evol 2023; 38: 2209–2226).
