

## THE DOUBLE ALTITUDE PROBLEM

SIR,

Since the publication of my article on the double altitude problem in the October number of the *Journal*, I find that I have overlooked another reference to the work of Pagel (para. 3, p. 419). W. H. Rosser in his *Self-instructor in Navigation* (which I quoted in another connection) says, on page 321 of the 1891 edition, that Pagel's method was published in the *Mercantile Marine Magazine* for 1865 (apparently in addition to 1847, which I quoted). Rosser describes the method in detail in his following pages.

Admiralty Compass Observatory,  
Ditton Park,  
Slough.

Yours faithfully,  
W. E. MAY.
