## CONTENTS

### Joint Statement

- 1 The next phase of the APIC/SHEA partnership  
*Sharon B. Wright and Linda L. Dickey*

### Commentary

- 2 Asymptomatic screening for severe acute respiratory coronavirus virus 2 (SARS-CoV-2) as an infection prevention measure in healthcare facilities: Challenges and considerations  
*Thomas R. Talbot, Mary K. Hayden, Deborah S. Yokoe, Anurag N. Malani, Hala A. Amer, Ibukunoluwa C. Kalu, Latania K. Logan, Rebekah W. Moehring, Silvia Munoz-Price, Tara N. Palmore, David J. Weber, Sharon B. Wright and for the SHEA Board of Trustees*

### Original Articles

- 8 Healthcare-associated multispecies outbreaks of OXA-48–positive carbapenemase-producing Enterobacteriaceae in a Singapore tertiary-care hospital  
*Indumathi Venkatachalam, Molly Kue Bien How, Karrie Kwan Ki Ko, Nurdyana Binte Abdul Rahman, Edwin Philip Conceicao, May Kyawt Aung, Myat Oo Aung, Yong Yang, Kwee Yuen Tan, Jean Xiang Ying Sim, Lai Chee Lee and Moi Lin Ling*
- 17 Vancomycin-resistant *Enterococcus* sequence type 1478 spread across hospitals participating in the Canadian Nosocomial Infection Surveillance Program from 2013 to 2018  
*David R. Kleinman, Robyn Mitchell, Melissa McCracken, Susy S. Hota, George R. Golding, CNISP VRE Working Group and Stephanie W. Smith*
- 24 Outbreak and control of *Achromobacter denitrificans* at an academic hospital in Pretoria, South Africa  
*Mohamed Said, Barend Mitton, Lebogang Busisiwe Skosana, Katlego Kopotsa, Rashmika Naidoo and Victoria Amutenya*
- 31 Synergistic effects of length of stay and prior MDRO carriage on the colonization and co-colonization of methicillin-resistant *Staphylococcus aureus*, vancomycin-resistant *Enterococcus*, and carbapenemase-producing Enterobacterales across healthcare settings  
*Htet Lin Htun, Pei-Yun Hon, Rei Tan, Brenda Ang and Angela Chow*
- 40 Prolonged silent carriage, genomic virulence potential and transmission between staff and patients characterize a neonatal intensive care unit (NICU) outbreak of methicillin-resistant *Staphylococcus aureus* (MRSA)  
*Sharline Madera, Nicole McNeil, Paula Hayakawa Serpa, Jack Kamm, Christy Pak, Carolyn Caughell, Amy Nichols, David Dynerman, Lucy M. Li, Estella Sanchez-Guerrero, Maira S. Phelps, Angela M. Detweiler, Norma Neff, Helen Reyes, Steve A. Miller, Deborah S. Yokoe, Joseph L. DeRisi, Lynn Ramirez-Avila and Charles R. Langelier*
- 47 Association of fluoroquinolones or cephalosporin plus macrolide with *Clostridioides difficile* infection (CDI) after treatment for community-acquired pneumonia  
*Preethi Patel, Abhishek Deshpande, Pei-Chun Yu, Peter B. Imrey, Peter K. Lindenauer, Marya D. Zilberberg, Sarah Haessler and Michael B. Rothberg*
- 55 Contrasting definitions and incidence of healthcare-associated respiratory viral infections in a pediatric hospital  
*Zachary M. Most, Patricia Jackson, Michael Sebert and Trish M. Perl*

- 62** Sharp decline in rates of community respiratory viral detection among patients at the National Institutes of Health Clinical Center during the coronavirus disease 2019 (COVID-19) pandemic  
*Michele E. Woolbert, Christine D. Spalding, Ninet Sinaiti, Brooke K. Decker, Tara N. Palmore and David K. Henderson*
- 68** Universal admission laboratory screening for severe acute respiratory coronavirus virus 2 (SARS-CoV-2) asymptomatic infection across a large health system  
*Jennifer L. Cihlar, Bryan D. Harris, Patty W. Wright, Romney M. Humphries, Caroline K. Taylor, Brandi R. Cherry and Thomas R. Talbot*
- 75** Effectiveness of two coronavirus disease 2019 (COVID-19) vaccines (viral vector and inactivated viral vaccine) against severe acute respiratory coronavirus virus 2 (SARS-CoV-2) infection in a cohort of healthcare workers  
*Alexandre R. Marra, João Luiz Miraglia, Daniel Tavares Malheiros, Yang Guozhang, Vanessa Damazio Teich, Elivane da Silva Victor, João Renato Rebello Pinho, Adriana Cypriano, Laura Wanderly Vieira, Miria Polonio, Rafael Herrera Ornelas, Solange Miranda de Oliveira, Flavio Araujo Borges Junior, Audrey Rie Ogawa Shibata, Guilherme de Paula Pinto Schettino, Ketti Gleyzer de Oliveira, Rúbia Anita Ferraz Santana, Fernanda de Mello Malta, Deyvid Amgarten, Ana Laura Boechat, Noelly Maria Zimpel Trecenti, Takaaki Kobayashi, Jorge L. Salinas, Michael B. Edmond and Luiz Vicente Rizzo*
- 82** Nursing home-associated bloodstream infection: A scoping review  
*Joseph M. Mylotte*
- 88** Risk and economic burden of surgical site infection following spinal fusion in adults  
*Charles E. Edmiston Jr, David J. Leaper, Abhishek S. Chitnis, Chantal E. Holy and Brian Po-Han Chen*

### Concise Communication

- 96** Regional outbreak of multidrug-resistant *Klebsiella pneumoniae* carbapenemase–producing *Pseudomonas Aeruginosa*  
*Bekana K. Tadese, Anna Nutt, Ifrah Chaudhary, Charlene Offiong and Charles Darkoh*
- 99** Impact of weekly asymptomatic testing for severe acute respiratory coronavirus virus 2 (SARS-CoV-2) in inpatients at an academic hospital  
*Leigh Smith, Sara Pau, Susan Fallon, Sara E. Cosgrove, Melanie S. Curlless, Valeria Fabre, Sara M. Karaba, Lisa L. Maragakis, Aaron M. Milstone, Anna C. Sick-Samuels, Polly Trexler and Clare Rock for the CDC Prevention Epicenter Program*
- 102** Impact of universal admission testing for severe acute respiratory coronavirus 2 (SARS-CoV-2) in era of the omicron variant  
*Victoria R. Williams, Christina K. Chan, Adrienne K. Chan, Robert Kozak and Jerome A. Leis*
- 106** Benefit and cost of repeating a severe acute respiratory coronavirus virus 2 (SARS-CoV-2) polymerase chain reaction (PCR) test after the second day of hospitalization in five hospitals during various community prevalences and vaccination rates  
*Rene Bulnes, Mina Said, Melissa Bronstein, Jennifer Gutowski, Karan Alag, Jonathan Bress, Amber Dellefave, Dawn Riedy, Jose Alcantara, Hiloni Bhavsar, Bryan Gargano and Emil Lesho*
- 110** Severe acute respiratory coronavirus virus 2 (SARS-CoV-2) surface contamination in staff common areas and impact on healthcare worker infection: Prospective surveillance during the coronavirus disease 2019 (COVID-19) pandemic  
*Helen L. Zhang, Brendan J. Kelly, Michael Z. David, Ebbing Lautenbach, Elizabeth Huang, Selamawit Bekele, Pam Tolomeo, Emily Reesey, Sean Loughrey, David Pegues and Matthew J. Ziegler for the CDC Prevention Epicenters Program*

- 114** An outbreak of severe acute respiratory coronavirus virus 2 (SARS-CoV-2) infections among hospital personnel with high mRNA vaccine uptake  
*Yael Tene, Katia Levytskyi, Amos Adler, Ora Halutz, Yael Paran, Hanoch Goldshmidt, Ayelet Itzhaki-Alfia, Tamar Halperin, Sarit Stepansky, Ronen Ben-Ami and Oryan Henig*
- 118** Barriers to severe acute respiratory coronavirus virus 2 (SARS-CoV-2) testing reported by healthcare workers during the first pandemic wave at an academic center in Boston, Massachusetts  
*Julia Zubiago, Alysse G. Wurcel, Rubeen Guardado and Elena Byhoff*
- 122** Hospital-acquired pneumonia is more frequent and lethal in stroke patients: A nationwide 4-year study  
*João C. Gonçalves-Pereira, Flavio Marino, Paulo Mergulhão, Baltazar Nunes and Filipe Froes*
- 125** Impact of number of lumens in central-venous catheters on central-line bloodstream infection (CLABSI) and venous thromboembolism (VTE) risk in patients with acute leukemia  
*Alina Varabyeva, Christabel Pui-See Lo, Adamo Brancaccio, Anthony J. Perissinotti, Twisha Patel, Katie Sandison, Lydia L. Benitez, Kristen Pettit, Patrick W. Burke, Dale L. Bixby and Bernard L. Marini*
- 128** Variability in antimicrobial use among infants born at <33 weeks gestational age  
*Joseph Y. Ting, Ashley Roberts, Ayman Abou Mehrem, Faiza Khurshid, Christine Drolet, Luis Monterrosa, Eugene W. Yoon, Prakesh S. Shah on behalf of the Canadian Neonatal Network (CNN) Investigators*

#### Research Brief

- 133** Characterization of healthcare-associated infections with the severe acute respiratory coronavirus virus 2 (SARS-CoV-2) omicron variant at a tertiary healthcare center  
*Thomas Holowka, Lauren M. DiBiase, Emily Sickbert-Bennett, Lisa J. Teal and David J. Weber*
- 135** Impact of the coronavirus disease 2019 (COVID-19) pandemic on infection control practices in a university hospital  
*Gabriela Abelenda-Alonso, Mireia Puig-Asensio, Emilio Jiménez-Martínez, Esther García-Lerma, Ana Hornero, Carmen Gutiérrez, Miriam Torrecillas, Cristian Tebé, Miquel Pujol and Jordi Carratalà*
- 138** Universal admission testing with a rapid molecular point-of-care test and real-time polymerase chain reaction (PCR) assay for the detection of severe acute respiratory coronavirus virus 2 (SARS-CoV-2): Comparative performance and infection prevention implications  
*Alfredo J. Mena Lora, Lelia H. Chaisson, Eric Wenzler, Scott Borgetti and Susan C. Bleasdale*
- 140** Peripheral venous catheters: An underrecognized source of *Staphylococcus aureus* bacteremia  
*Heather L. Young, Deborah A. Aragon, Lindsey Cella and Kevin E. McVane*

#### Letters to the Editor

- 144** A new paradigm for infection prevention programs: An integrated approach  
*David J. Weber, Emily E. Sickbert-Bennett, Lauren M. DiBiase, Brooke E. Brewer, Mark O. Buchanan, Christa A. Clark, Karen Croyle, Cynthia M. Culbreth, Pamela S. Del Monte, Sherie Goldbach, Lori Hendrickson, Pamela B. Miller, Natalie A. Schnell, Katherine M. Schultz, Amy Selimos, Lisa Stancill, Shelly K. Summerlin-Long, Lisa J. Teal and Sharon C. Thompson*
- 147** Differences in infection prevention and control training needs between healthcare workers: Results of a learning needs assessment focused on nursing assistants and dental professionals  
*Riley P. Ostdiek, Muhammad Salman Ashraf, Nada Fadul, Dan German, Kate Tyner, Sarah Stream, Mounica Soma and Nicolás Cortés-Penfield*

- 149** Coronavirus disease 2019 (COVID-19) hospitalization metrics that do not account for disease severity underestimate protection provided by severe acute respiratory coronavirus virus 2 (SARS-CoV-2) vaccination and boosting: A retrospective cohort study  
*June K. Corrigan, Jennifer La, Nathanael R. Fillmore, Nhan V. Do, Mary Brophy, Shira Doron, Paul A. Monach and Westyn Branch-Elliman*
- 152** The limits of genomic sequencing for severe acute respiratory coronavirus virus 2 (SARS-CoV-2) exposure investigations: For nosocomial outbreak reconstruction, community exposures matter, too  
*Liang En Ian Wee, Karrie Kwan-Ki Ko, Edwin Philip Conceicao, May Kyawt Aung, Aung Myat Oo, Yong Yang, Shalvi Arora and Indumathi Venkatachalam*
- 154** Nosocomial severe acute respiratory coronavirus virus 2 (SARS-CoV-2) transmission arising from a case of N-gene dropout on reverse-transcription polymerase chain reaction (RT-PCR) testing  
*Liang En Ian Wee, Karrie Kwan-Ki Ko, Edwin Philip Conceicao, May Kyawt Aung, Myat Oo Aung, Yong Yang, Shalvi Arora, Chayaporn Suphavitai and Indumathi Venkatachalam*
- 156** Lack of severe acute respiratory coronavirus virus 2 (SARS-CoV-2) transmission from a healthcare worker to a cohort of immunosuppressed patients during the SARS-CoV-2 omicron variant surge, California, 2022  
*Abraar Karan, Jessica Ferguson and Jorge L. Salinas*
- 158** Patient masking adherence at an academic neuromuscular center during the coronavirus disease 2019 (COVID-19) pandemic  
*Agatha R. Forstein, Noah Kolb and Michael K. Hehir*
- 160** We should allow family presence for hospitalized patients in isolation for coronavirus disease 2019 (COVID-19)  
*Jorge L. Salinas*
- 161** Response to “Severe acute respiratory coronavirus virus 2 (SARS-CoV-2) surface contamination in staff common areas and impact on healthcare worker infection: Prospective surveillance during the coronavirus disease 2019 (COVID-19) pandemic”  
*David J. Weber, Emily E. Sickbert-Bennett, Bobby G. Warren and Deverick J. Anderson*
- 162** Feasibility and safety of reducing duration of quarantine for healthcare personnel with high-risk exposures to coronavirus disease 2019 (COVID-19): From alpha to omicron  
*Chonlanan Wiboonchutikula, Thanus Pienthong, Thana Khawcharoenporn, Piyaporn Apisarntharak, David J. Weber and Anucha Apisarntharak*
- 164** Bair Hugger: A potential enemy within the operating room  
*William G. Watkins, Richard A. Jaffe and John G. Brock-Utne*
- 166** Recurrent central-line-associated bloodstream infection in a single high-risk patient  
*Zachary Pek, Hannah Canepa, Karen L. Gregg, Marie K. Cabunoc, Surbhi Leekha and Jonathan D. Baghdadi*
- 168** Homogeneity and standardization in hand hygiene compliance  
*Lili Jiang, Xiaorong Zhang, Xinyang Xu and Peng Chen*
- 169** Assessing the methodological quality of studies included in systematic reviews: Interpretation of scores  
*Andrea C. Büchler and Anne F. Voor in ‘t holt*

*An Official Publication of the Society for Healthcare Epidemiology of America*

*Infection Control & Hospital Epidemiology* (ISSN 0899-823X) is published monthly by Cambridge University Press, One Liberty Plaza, New York, NY 10006, USA.

## Editorial Office

Communications should be addressed to the Editor, *Infection Control & Hospital Epidemiology*, One Liberty Plaza, New York, NY 10006 (email: iche.managingeditor@cambridge.org). Contributors should consult the Instructions for Contributors, which is available at the journal's Web site.

## Advertising

Please direct advertising inquiries to M. J. Mrvica Associates, 2 West Taunton Avenue, Berlin, NJ 08009 (e-mail: mjmrvica@mrvica.com; telephone: 856-768-9360, fax: 856-753-0064). Publication of an advertisement in *Infection Control & Hospital Epidemiology* does not imply endorsement of its claims by the Society for Healthcare Epidemiology of America, by the Editor, or by Cambridge University Press.

## Permissions

Articles may be copied or otherwise reused without permission only to the extent permitted by Sections 107 and 108 of the US Copyright Law. Permission to copy articles for personal, internal, classroom, or library use may be obtained from the Copyright Clearance Center (<http://www.copyright.com>,

email: info@copyright.com). For all other uses, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale, please contact Cambridge University Press. Full details may be found at: [www.cambridge.org/about-us/rights-permissions](http://www.cambridge.org/about-us/rights-permissions).

## Subscriptions

The individual subscription prices for 2022 are: Print & Online: \$305; Online Only: \$236. Individuals have the option to order directly from Cambridge University Press. Institutional print + electronic and e-only subscriptions are available from Cambridge University Press and include unlimited online access; rates are tiered according to an institution's type and research output and may be reviewed at the journal's homepage on Cambridge Core: [cambridge.org/ICHE](http://cambridge.org/ICHE).

Please direct subscription inquiries and requests for back issues to Customer Services at Cambridge University Press, e-mail: [subscriptions\\_newyork@cambridge.org](mailto:subscriptions_newyork@cambridge.org) (USA, Canada, and Mexico) or [journals@cambridge.org](mailto:journals@cambridge.org) (outside of USA, Canada, and Mexico).

**Postmaster:** Send address changes to *Infection Control & Hospital Epidemiology*, Cambridge University Press, One Liberty Plaza, New York, NY 10006 USA.

## About the cover:

Title: Nile's Joy, Horses & Hope, 2006

Beginning with volume 43 (January 2022), the cover of *Infection Control & Hospital Epidemiology* (ICHE) will feature art inspired by or reflective of topics within the scope of the journal and their impact on patients, healthcare personnel and our society. These topics include healthcare-associated infections, antimicrobial resistance, and healthcare epidemiology. The intent is to feature original artwork that has been created by individuals who have a personal connection to one or more of these topics through their clinical work, research, or experience as a patient or an affected patient's family member, friend or advocate. The goal is to provide readers with a visual reminder of the human impact of the topics addressed in the journal and the importance of the work being done by those who read or contribute to ICHE and by all who are trying to make healthcare safer through the elimination of healthcare-associated infections.

For more information about the ICHE cover and how to submit artwork for consideration for a future cover, please visit the ICHE website: <https://www.cambridge.org/core/journals/infection-control-and-hospital-epidemiology/front-covers>

**Artist:** Nile Moss (1990-2006)

**Medium:** Tissue paper, stained glass technique

### **Nile's parents, Carole and Ty Moss, spoke to ICHE about his artwork.**

**What was the inspiration for this artwork?** Nile began every morning with a loud announcement, "It's going to be such a great day!" At the end of the day, he would jump off the school bus and announce, "I had such a great day!" Nile's love of horses began very early in life thanks to his school's participation at a nearby therapeutic riding center. His horses brought him great joy and his faith gave him the hope and promise of a rainbow every day. This piece was inspired by the love Nile had for his horses, Tex and Clutch.

**Why is this work appropriate for the cover of *Infection Control & Hospital Epidemiology*?** Nile's art expression and techniques blossomed from August 2005 to April 2006 in his first high school art class. He returned home with this final creation on April 14, 2006. His life ended only days later when physicians failed to recognize the initial symptoms of sepsis caused by methicillin-resistant *Staphylococcus aureus* (MRSA) that he had acquired while receiving care in a local hospital. Nile's story represents the preventable harm that happens when people are unaware and unprepared to protect their loved ones and their patients. Patient safety begins with a robust bench of healthcare professionals, including healthcare epidemiologists, infection preventionists and antimicrobial stewards, that are given the knowledge, tools, training and support they need to do their work effectively. Our healthcare professionals deserve to feel joy and hope at the start of each new day, just as Nile did, and not doubt that their hard work saving lives is appreciated.

**What is your personnel connection to the content of ICHE?** When Nile died, our lives were changed forever. After researching the "why" and the "how," we decided to become a part of the solution to end preventable harm in honor of Nile. We became educated on the science of infection prevention to help inform and empower the public and educate healthcare professionals about what happens when healthcare facilities don't maintain a culture of safety and allow preventable healthcare-associated infections to occur. We celebrate his life every day by empowering the public and healthcare professionals with our story of prevention and action to end preventable healthcare harm.

*Carole and Ty Moss are the founders and Executive Directors of Nile's Project, a non-profit organization founded in 2007 to end unnecessary deaths due to preventable hospital-acquired infections. Nile's Project works with survivors, families, healthcare professionals, public health officials, and other advocacy groups to increase public awareness and advocate for changes that will make the healthcare system safer. For more information, visit [www.nilesproject.com](http://www.nilesproject.com).*
