

PROCEEDINGS

of the

GLASGOW MATHEMATICAL ASSOCIATION

VOLUME I

JANUARY 1952

PART I

CONTENTS

- The Double Six of Lines and a Theorem in Euclidean Plane Geometry:
JOHN DOUGALL *page 1*
- An Integral Involving the Product of a Bessel Function and an E-Function:
FOUAD M. RAGAB *page 8*
- On Neumann's Formula for the Legendre Functions; T. M. MACROBERT *page 10*
- An Expansion in Terms of Associated Legendre Functions; T. M. MACROBERT *page 13*
- Note on the Strong Summability of Series; J. M. HYSLOP *page 16*
- Solutions of the Diffusion Equation for a Medium Generating Heat:
IAN N. SNEDDON *page 21*
- Integrals of Lommel's Type for Confluent Hypergeometric Functions:
D. MARTIN *page 28*
- Inequalities for a Class of Terminating Generalised Hypergeometric Functions:
T. M. MACROBERT *page 32*
- Generalisations of Some Hypergeometric Function Transformations:
T. M. MACROBERT *page 38*
- Propagation of a Boundary of Fusion; STEWART PATERSON *page 42*
- On Certain Types of Solution of the Equation of Heat Conduction:
STEWART PATERSON *page 48*

OLIVER AND BOYD

EDINBURGH : TWEEDDALE COURT

LONDON : 98 GREAT RUSSELL STREET, W.C. 1

PROCEEDINGS OF THE GLASGOW MATHEMATICAL ASSOCIATION

THE *Proceedings* are published in Parts and issued twice each year, in January and in July. Four Parts will complete a Volume of approximately 200 pages, and the Title Pages and Index will be published in Part 4 of each Volume.

The prepaid subscription for each Volume is Forty Shillings (U.S.A. \$6.00), post free. Single Parts may be supplied at a cost of Ten Shillings and Six Pence each (U.S.A. \$1.50) post free.

Copies may be ordered direct from the publishers or from any bookseller.

Information for Contributors

While the *Proceedings* are intended primarily for Pure Mathematics, papers on Applied Mathematics will also be accepted. Manuscripts from all parts of the world will be welcomed and given careful consideration.

Manuscripts should be prepared so as to conform with the practice in current Numbers of the *Proceedings*, especially with regard to line illustrations, references, tables, and summaries. The name of the author and the date of the receipt of the manuscript will be printed under the title. Text figures must be suitable for line block reproduction, lettered in pencil, numbered, and separated from the text but allocated clearly to sections of the text.

References should be placed at the end of the paper, arranged and numbered according to the order of reference. In the text, reference numbers should be enclosed in square brackets and underlined, to distinguish them from formula numbers, which should be quoted in round brackets. The following particulars should be given, in the order indicated :

for references to books—*author, title, edition, place of publication, year of publication, page reference* ;

for references to articles in periodicals—*author, title of article, short title of periodical, series no. (if any), volume no., year, pagination.*

A proof is supplied once in galley form, together with an Order Form for off-prints. Offprints are supplied free to the number of twenty-five ; additional copies, if ordered prior to publication, will be supplied, at cost, at the request of the contributor. Excessive corrections may be charged to the author.

Manuscripts should be sent to :

CONTENTS

AGARWAL, R. P. Associated Basic Hypergeometric Series	Page 182
BOYD, A. V. and HYSLOP, J. M. A Definition for Strong Rieszian Summability and its Relationship to Strong Cesaro Summability	94
CARLITZ, L. The Schur Derivative of a Polynomial	159
CHEHATA, C. G. Commutative Extension of Partial Automorphisms of Groups	170
DOUGALL, J. The Double Six of Lines and a Theorem in Euclidean Plane Geometry	1
The Product of Two Legendre Polynomials	121
HYSLOP, J. M. Note on the Strong Summability of Series	16
<i>See</i> BOYD, A. V. and HYSLOP, J. M.	
JAMIESON, A. M. An Expression for Bernoulli Numbers	126
MACROBERT, T. M. On Neumann's Formula for the Legendre Functions	10
An Expansion in Terms of Associated Legendre Functions	13
Inequalities for a Class of Terminating Generalised Hypergeometric Functions	32
Generalisations of Some Hypergeometric Function Transformations	38
An Integral involving an E -function and an Associated Legendre Function of the First Kind	111
Integral of an E -function expressed as a Sum of Two E -functions	118
An Infinite Integral involving a Product of Two Modified Bessel Functions of the Second Kind	187
Some Integrals involving E -functions	190
MARTIN, D. Integrals of Lommel's Type for Confluent Hypergeometric Functions	28
MITCHELL, A. R. and RUTHERFORD, D. E. On the theory of Relaxation	101

PATERSON, S.	Propagation of a Boundary of Fusion	Page 42
	On Certain Types of Solution of the Equation of Heat Conduction	48
	Conduction of Heat from Local Sources in a Medium Generating or Absorbing Heat	164
PIAGGIO, H. T. H.	Exceptional Integrals of a not completely Integrable Total Differential Equation	137
RAGAB, F. M.	An Integral involving the Product of a Bessel Function and an E -function	8
	Generalisations of Some Integrals involving Bessel Functions and E -functions	72
	Generalisation of an Integral due to Hardy	115
	An Integral involving a Modified Bessel Function of the Second Kind and an E -function	119
	Integrals involving E -functions	129
	A Linear Relation between E -functions	185
	Integrals of E -functions expressed in Terms of E -functions	192
RANKIN, R. A.	A Minimum Problem for the Epstein Zeta-function	149
RUTHERFORD, D. E.	<i>See</i> MITCHELL, A. R. and RUTHERFORD, D. E.	
SILVEY, S. D.	The Equivalence of Asymptotic Distributions under Randomisation and Normal Theories	139
SNEDDON, I. N.	Solutions of the Diffusion Equation for a Medium generating Heat	21
STEWART, C. A.	Fourier Expansions	76
ZASSENHAUS, H. J.	A Group-Theoretic Proof of a Theorem of Maclagan-Wedderburn	53
	The Quadratic Law of Reciprocity and the Theory of Galois Fields	64
