Gennifer Levey

## Chief Copy Editor

Sumitra Mukerji

## Proofreaders

Sylvia Elvin  
Rashidah Ismaili AbuBakr

## Editorial Board

### *Affective Neuroscience*

Stephanie D. Preston/U. of Michigan

### *Atypical Neurodevelopment*

Simon Baron-Cohen/Cambridge U.

### *Behavioral Neurogenetics*

Wim E. Crusio/CNRS UMR

### *Cognition and Artificial Intelligence*

Zenon Pylyshyn/Rutgers U.

### *Cognitive and Decision Sciences*

Nick Chater/University College London

### *Cognitive Development*

Annette Karmiloff-Smith/Birbeck College

### *Cognitive Neuroscience*

Moshe Bar/Harvard Medical School

### *Computational Neuroscience*

Nestor A. Schmajuk/Duke U.

### *Evolution of Brain and Cognition*

Dean Falk/Florida State U.

### *Evolution of Cognition*

Celia Heyes/Oxford U.

### *Experimental Analysis of Behavior*

A. Charles Catania/U. Maryland, Baltimore County

### *Language and Language Disorders*

Max Coltheart/Macquarie U.

### *Linguistics*

Robert A. Freidin/Princeton U.

### *Perception*

Bruce Bridgeman/U. of California, Santa Cruz

### *Philosophy of Science*

Massimo Piattelli-Palmarini/U. of Arizona

### *Primate Cognition*

Laurie R. Santos/Yale U.

### *Social Cognition*

Mahzarin R. Banaji/Harvard U.

### *Social Cognitive Neuroscience*

Rebecca Saxe/MIT

### *Vision, Language and Computation*

Shimon Edelman/Cornell U.

## FOUNDING EDITOR (1978–2001)

Stevan Harnad

**Editorial Policy** *Behavioral and Brain Sciences* (BBS) is an international journal providing a special service called Open Peer Commentary\* to researchers in any area of psychology, neuroscience, behavioral biology, or cognitive science who wish to solicit, from fellow specialists within and across these BBS disciplines, multiple responses to a particularly significant and controversial piece of work. (See Instructions for Authors and Commentators, inside back cover and also at <http://journals.cambridge.org/BBSJournal/Inst>) The purpose of this service is to contribute to the communication, criticism, stimulation, and particularly the unification of research in the behavioral and brain sciences, from molecular neurobiology to artificial intelligence and the philosophy of mind.

Papers judged by the editors and referees to be appropriate for Commentary are circulated to a large number of commentators selected by the editors, referees, and author to provide substantive criticism, interpretation, elaboration, and pertinent complementary and supplementary material from a full cross-disciplinary perspective. The article, accepted commentaries, and the author's response then appear simultaneously in BBS.

Commentary on BBS articles may be provided by any qualified professional in the behavioral and brain sciences, but much of it is drawn from a large body of BBS Associates who have become formally affiliated with the project (see <http://journals.cambridge.org/BBSJournal/BBSAssoc>).

Qualified professionals are eligible to become BBS Associates if they have (1) been nominated by a current BBS Associate, (2) refereed for BBS, or (3) had a commentary or article accepted for publication. A special subscription rate is available to Associates. Individuals interested in serving as BBS Associates are asked to view the full instructions for joining at <http://journals.cambridge.org/BBSJournal/Inst/Assoc> and then email [bbsjournal@cambridge.org](mailto:bbsjournal@cambridge.org).

© Cambridge University Press 2013. All rights reserved. No part of this publication may be reproduced, in any form or by any means, electronic, photocopying, or otherwise, without permission in writing from Cambridge University Press. Policies, request forms, and contacts are available at: <http://www.cambridge.org/rights/permissions/permission.htm>.

Permission to copy (for users in the U.S.A.) is available from Copyright Clearance Center, <http://www.copyright.com>, email: [info@copyright.com](mailto:info@copyright.com).

**Subscriptions** *Behavioral and Brain Sciences* (ISSN 0140-525X) is published bimonthly in February, April, June, August, October, and December. The subscription price of Volume 36 (2013) for *institutions* is US \$1288.00 for print and online and US \$1055.00 for online only in the U.S.A., Canada, and Mexico; and UK £759.00 for print and online and UK £624.00 for online only elsewhere. The subscription price for *individuals* is US \$374.00 for print and online and US \$337.00 for online only in the U.S.A., Canada, and Mexico; and UK £219.00 for print and online and UK £199 for online only elsewhere. For *BBS Associates*, with proof of eligibility with order, US \$139.00 in the U.S.A., Canada, and Mexico; and UK £87.00 elsewhere. For *students*, with proof of eligibility with order, \$116.00 in the U.S.A., Canada, and Mexico; and UK £68.00 elsewhere. Subscription price includes surface postage. Single parts cost US \$250.00 (UK £124.00) plus postage. *Institutional* orders may be sent to a bookseller, or, in the U.S.A., Canada, and Mexico direct to: Cambridge University Press, 32 Avenue of The Americas, New York, NY 10013-2473 email: [journals\\_subscriptions@cambridge.org](mailto:journals_subscriptions@cambridge.org); in the U.K. and rest of the world to: Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 8RU, England, e-mail: [journals\\_subscriptions@cambridge.cam.ac.uk](mailto:journals_subscriptions@cambridge.cam.ac.uk). *Individuals* must order direct from the Press. You may also subscribe through the Cambridge Journals website, <http://journals.cambridge.org/bbs>.

**Postmaster:** Send address changes in the U.S.A., Canada, and Mexico to *Behavioral and Brain Sciences*, Cambridge University Press, Journals Dept., 100 Brook Hill Drive, West Nyack, NY 10994-2133, U.S.A. Send address change elsewhere to *Behavioral and Brain Sciences*, Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 8RU, England.

**Online availability** *Behavioral and Brain Sciences* is part of the Cambridge Journals Online (CJO) service at <http://journals.cambridge.org>.

**Institutional subscribers:** Access to full-text articles online is currently included with the cost of the print subscription. Subscription must be activated; see <http://cambridge.journals.org>.

**Advertising** Inquiries about advertising should be sent to the Journals Advertising Department of the Cambridge or New York Office of Cambridge University Press.

\*Modelled on the "CA Comment" service of the journal *Current Anthropology*.

# Contents Volume 36:5 October 2013

<b>Van de Vliert, E.</b> Climato-economic habitats support patterns of human needs, stresses, and freedoms	465
<b>Open Peer Commentary:</b>	
<b>Adamopoulos, J.</b> Interpersonal exchange and freedom for resource acquisition	480
<b>Ainslie, G.</b> Cold climates demand more intertemporal self-control than warm climates	481
<b>Allik, J. &amp; Realo, A.</b> How is freedom distributed across the earth?	482
<b>Arantes, J., Grace, R. C. &amp; Kemp, S.</b> Press freedom, oil exports, and risk for natural disasters: A challenge for climato-economic theory?	483
<b>Baumeister, R. F., Park, J. &amp; Ainsworth, S. E.</b> Individual identity and freedom of choice in the context of environmental and economic conditions	484
<b>Burghardt, G. M.</b> Play, animals, resources: The need for a rich (and challenging) comparative environment	484
<b>Chang, L., Chen, B.-B. &amp; Lu, H. J.</b> Cultural adaptation to environmental change versus stability	485
<b>de Oliveira Chen, S. &amp; Kitayama, S.</b> Frontier migration fosters ethos of independence: Deconstructing the climato-economic theory of human culture	486
<b>Desseilles, M., Duclos, C., Flohimont, V. &amp; Desseilles, F.</b> Is there a role for “climatotherapy” in the sustainable development of mental health?	487
<b>Fischer, R.</b> Improving climato-economic theorizing at the individual level	488
<b>Gelfand, M. J. &amp; Lun, J.</b> Ecological priming: Convergent evidence for the link between ecology and psychological processes	489
<b>Güss, C. D.</b> What about politics and culture?	490
<b>Hrotic, S.</b> Unsurprising, in a good way	491
<b>Iyer, R., Motyl, M. &amp; Graham, J.</b> What is freedom – and does wealth cause it?	492
<b>Karwowski, M. &amp; Lebuda, I.</b> Extending climato-economic theory: When, how, and why it explains differences in nations’ creativity	493
<b>Leung, K. &amp; Cheng, G. H.-L.</b> Methodological suggestions for climato-economic theory	494
<b>Locke, J. L. &amp; Flanagan, C. M.</b> The need for psychological needs: A role for social capital	495
<b>Loughnan, S., Bratanova, B. &amp; Kuppens, P.</b> Toward an integrated, causal, and psychological model of climato-economics	496
<b>Murray, D. R.</b> Cultural adaptations to the differential threats posed by hot versus cold climates	497
<b>Pahlavan, P. &amp; Amirrezvani, A.</b> Contextual freedom: Absoluteness versus relativity of freedom	498
<b>Paternotte, C.</b> Shared adaptiveness is not group adaptation	499
<b>Sparks, A., Mishra, S. &amp; Barclay, P.</b> Fundamental freedoms and the psychology of threat, bargaining, and inequality	500
<b>Terracciano, A. &amp; Chan, W.</b> Personality traits, national character stereotypes, and climate–economic conditions	501
<b>Vigil, J. M., Swartz, T. J. &amp; Rowell, L. N.</b> Subtle variation in ambient room temperature influences the expression of social cognition	502
<b>Author’s Response:</b>	
<b>Van de Vliert, E.</b> White, gray, and black domains of cultural adaptations to climato-economic conditions	503
<b>Jeffery, K. J., Jovalekic, A., Verriotis, M. &amp; Hayman, R.</b> Navigating in a three-dimensional world	523
<b>Open Peer Commentary:</b>	
<b>Badets, A.</b> Semantic sides of three-dimensional space representation	543
<b>Barnett-Cowan, M. &amp; Bühlhoff, H. H.</b> Human path navigation in a three-dimensional world	544
<b>Berthoz, A. &amp; Thibault, G.</b> Learning landmarks and routes in multi-floored buildings	545
<b>Bianchi, I. &amp; Bertamini, M.</b> Anisotropy and polarization of space: Evidence from naïve optics and phenomenological psychophysics	545
<b>Burt de Perera, T., Holbrook, R., Davis, V., Kacelnik, A. &amp; Guilford, T.</b> Navigating in a volumetric world: Metric encoding in the vertical axis of space	546

<b>Carbon, C.-C. &amp; Hesslinger, V. M.</b> Navigating through a volumetric world does not imply needing a full three-dimensional representation	547	<b>Pasqualotto, A. &amp; Proulx, M. J.</b> The study of blindness and technology can reveal the mechanisms of three-dimensional navigation	559
<b>Dudchenko, P. A., Wood, E. R. &amp; Grieves, R. M.</b> Think local, act global: How do fragmented representations of space allow seamless navigation?	548	<b>Peremans, H. &amp; Vanderelst, D.</b> Augmented topological maps for three-dimensional navigation	560
<b>Durgin, F. H. &amp; Li, Z.</b> Perceptual experience as a bridge between the retina and a bicooded cognitive map	549	<b>Phillips, J. G. &amp; Ogeil, R. P.</b> Navigation bicooded as functions of $x$ - $y$ and time?	561
<b>Dyer, A. G. &amp; Rosa, M. G. P.</b> Learning to navigate in a three-dimensional world: From bees to primates	550	<b>Powers, D. M. W.</b> Vertical and veridical – 2.5-dimensional visual and vestibular navigation	562
<b>Holmes, K. J. &amp; Wolff, P.</b> Spatial language as a window on representations of three-dimensional space	550	<b>Ross, H. E.</b> Foreshortening affects both uphill and downhill slope perception at far distances	563
<b>Hölscher, C., Büchner, S. &amp; Strube, G.</b> Multi-floor buildings and human wayfinding cognition	551	<b>Savelli, F. &amp; Knierim, J. J.</b> The problem of conflicting reference frames when investigating three-dimensional space in surface-dwelling animals	564
<b>Howard, A. M. &amp; Fragaszy, D. M.</b> Applying the bicooded spatial model to nonhuman primates in an arboreal multilayer environment	552	<b>Schultheis, H. &amp; Barkowsky, T.</b> Just the tip of the iceberg: The bicooded map is but one instantiation of scalable spatial representation structures	565
<b>Kaplan, D. M.</b> The complex interplay between three-dimensional egocentric and allocentric spatial representation	553	<b>Sparks, F. T., O'Reilly, K. C. &amp; Kubie, J. L.</b> What is optimized in an optimal path?	566
<b>Klatzky, R. L. &amp; Giudice, N. A.</b> The planar mosaic fails to account for spatially directed action	554	<b>Stella, F., Si, B., Kropff, E. &amp; Treves, A.</b> Grid maps for spaceflight, anyone? They are for free!	566
<b>Lehky, S. R., Sereno, A. B. &amp; Sereno, M. E.</b> Monkeys in space: Primate neural data suggest volumetric representations	555	<b>Wang, R. F. &amp; Street, W. N.</b> What counts as the evidence for three-dimensional and four-dimensional spatial representations?	567
<b>Longstaffe, K. A., Hood, B. M. &amp; Gilchrist, I. D.</b> Development of human spatial cognition in a three-dimensional world	556	<b>Weisberg, S. M. &amp; Newcombe, N. S.</b> Are all types of vertical information created equal?	568
<b>Moss, C. F.</b> Has a fully three-dimensional space map never evolved in any species? A comparative imperative for studies of spatial cognition	557	<b>Yamahachi, H., Moser, M.-B. &amp; Moser, E. I.</b> Map fragmentation in two- and three-dimensional environments	569
<b>Nardi, D. &amp; Bingman, V. P.</b> Making a stronger case for comparative research to investigate the behavioral and neurological bases of three-dimensional navigation	557	<b>Zappettini, S. &amp; Allen, C.</b> Does evidence from ethology support bicooded cognitive maps?	570
<b>Orban, G. A.</b> Which animal model for understanding human navigation in a three-dimensional world?	558	<b>Authors' Response:</b>	
		<b>Jeffery, K. J., Jovalekic, A., Verriotis, M. &amp; Hayman, R.</b> A framework for three-dimensional navigation research	571
