

CORRIGENDUM

A cascade from disregard for rules of conduct at preschool age to parental power assertion at early school age to antisocial behavior in early preadolescence: Interplay with the child's skin conductance level—CORRIGENDUM

GRAZYNA KOCHANSKA,^a REBECCA L. BROCK,^b AND LEA J. BOLDT^a

doi:10.1017/S0954579416000547, published by Cambridge University Press, 15 July 2016

There were typographical errors in three values in our original article. On page 5, right-hand column, in the fourth set of alpha values in the middle of the third full paragraph, the correct values are the following:

... At age 12, we also included antisocial personality disorder (five items, $\alpha_s = 0.87$ and 0.76 , respectively). At each age, ...”

On page 6, left-hand column, in the first full paragraph, the correct range of scores is the following:

Reference

Kochanska, G., Brock, R. L., & Boldt, L. J. (2016). A cascade from disregard for rules of conduct at preschool age to parental power assertion at early school age to antisocial behavior in early preadolescence: Interplay with

To create the final antisocial score, we standardized and averaged the eight scores (four for each parent: age 10 CSI-4 and ICU, and age 12 ASI-4R and ICU; $M = 0.03$, $SD = 0.79$, range = -1.14 to 3.62). ...”

We regret these errors and any problems they may have caused.
