May 3rd. PROFESSOR S. PODVINEC (Zagreb). "Physiology and Pathology of Soft Palate" with film on Plastic Operation for Open Rhinophonia.

UNIVERSITY OF LONDON

The Semon Lecture for 1951 entitled "Articulatory Defects in Aphasia" by MacDonald Critchley, M.D., F.R.C.P., Dean of the Institute of Neurology, the National Hospital, Queen Square at the Royal Society of Medicine (by kind permission) 1 Wimpole Street, W.1 on Thursday, 1st November, 1951, at 5 p.m.

DOUBLE ACTION

in the intranasal treatment of
Sinusitis and Nasopharyngitis

'PENDEX' provides . . .

- . . . the potent and penetrating antibacterial action of 1,500 units of crystalline potassium penicillin G per ml.
- . . . the rapid and prolonged vasoconstriction of 'Paredrinex' which shrinks the oedematous and engorged tissues and aids the penetration of penicillin throughout the nasal cavity.

The 'Pendex' package consists of penicillin in dry state and a buffered aqueous solution of 'Paredrinex'—*each in separate container*. The pharmacist has only to mix the two, and 'Pendex' is dispensed, freshly prepared, with the penicillin at full therapeutic potency.

PENDEX

— *the penicillin-vasoconstrictor
combination*

MENLEY & JAMES, LIMITED, COLDHARBOUR LANE, LONDON, S.E.5
for Smith Kline & French International Co., owner of the trade marks 'Pendex' and 'Paredrinex'
