LIDDELL HART AND THE WEIGHT OF HISTORY

By **JOHN J. MEARSHEIMER**. In this unflinching but coolly objective book, Mearsheimer reexamines the career of military strategist Sir Basil Henry Liddell Hart, and shows how Liddell Hart's theories helped lead the British government into serious error before World War II. *Cornell Studies in Security Affairs*. \$24.95

MEN, MONEY, AND DIPLOMACY

The Evolution of British Strategic Foreign Policy, 1919–1926

By **JOHN ROBERT FERRIS**. This is the first book to analyze systematically the relationship between British foreign, military, and financial policies during the 1920s. Ferris traces the development of British strategic policy over a relatively peaceful period of long-term military planning and seeks to define the internal political dynamics that shaped that planning. *Cornell Studies in Security Affairs*. \$24.95

FICTIONS OF THE FEMININE

Puritan Doctrine and the Representation of Women

By **MARGARET OLOFSON THICKSTUN**. This book examines the influence of Puritan theology and domestic theory on the representation of women in the English narrative tradition. Thickstun demonstrates the richness and complexity of Puritan literature, including Spenser's *Faerie Queene*, Milton's *Paradise Lost*, and Bunyan's *Pilgrim's Progress*, and at the same time offers an illuminating analysis of attitudes toward gender which later readers have found problematical. \$19.95

THE POLITICS OF STORY IN VICTORIAN SOCIAL FICTION

By **ROSEMARIE BODENHEIMER**.

Bodenheimer here explores the story patterns and other narrative conventions through which the industrial or social-problem novel gives fictional shape to questions that were experienced as new, unpredictable, and troubling in the Victorian age. "This study is one of the few I have seen that actually does connect literary form and sociopolitical context in specific and visible ways. Bodenheimer is rigorous in her tracings of the political realities that are mirrored in the narrative choices of her authors."—John P. Farrell, University of Texas, Austin \$24.95

POLITICAL CONSTRUCTIONS

Defoe, Richardson, and Sterne in Relation to Hobbes, Hume, and Burke

The Weary Titan

Britain and the Experience of Relative Decline,
1895–1905

Aaron L. Friedberg

How do statesmen become aware of unfavorable shifts in relative power and how do they seek to respond to them? As national decline becomes an increasingly prominent theme in American political debate, these questions have also taken on an immediate significance in contemporary U.S. politics.

The Weary Titan is a penetrating study of the decline of Britain at the turn of the twentieth century. Drawing on a wide variety of sources, Aaron Friedberg explains how England's rulers understood and responded to the initial evidence of erosion in their country's industrial, financial, naval, and military power. His analysis will interest political scientists, historians, and all those concerned with problems of contemporary national strategy.

John Skelton and the Politics of the 1520's

Greg Walker

Through this examination of the remarkable series of satires written against Cardinal Wolsey by the poet John Skelton, many long-standing assumptions are proved to be false: Skelton was not writing against Wolsey on behalf of a noble patron, but rather his satires were opportunistic attempts to seek patronage and advancement.

SHELLEY'S MAJOR VERSE

The Narrative and Dramatic Poetry

Stuart M. Sperry

Shelley has long been viewed as a dreamer isolated from reality, a "beautiful and ineffectual angel," in Arnold's words. In contrast, Stuart Sperry's book emphasizes the life forces originating in the poet's childhood that impelled and shaped his career, and reasserts Shelley's relevance to the social and cultural dilemmas of contemporary life.

DARWIN AND THE NOVELISTS

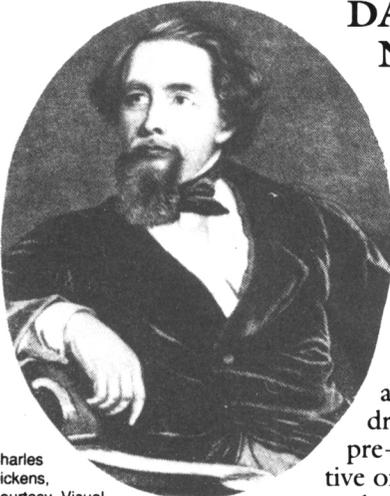

Patterns of Science in Victorian Fiction

George Levine

Darwinian thought requires acknowledgment of chance and randomness for a full explanation of biological phenomena.

George Levine shows how these conceptions affected nineteenth-century novelists — from Dickens and Trollope to Conrad — and draws illuminating contrasts with the pre-Darwinian novel and the perspective of natural theology. He demonstrates how even writers ostensibly uninterested in science absorbed and influenced its vision.

The Collected Letters of William Morris

Volume II, Part A: 1881–1884

Volume II, Part B: 1885–1888

Edited by Norman Kelvin

These volumes continue the only complete edition of the surviving correspondence of William Morris (1834–1896), a protean figure who exerted a major influence as poet, craftsman, master printer, and designer. Covering the years 1881 through 1888, they treat the most dramatic period in another facet of Morris's career: his work as a political activist. There are new documents in great numbers in these volumes, as in the first, and readers "for many years to come will be indebted to Mr. Kelvin for his splendid achievement."

—*William S. Peterson, The New York Times Book Review*

"The present volumes, imaginatively and meticulously edited by Norman Kelvin, are a major contribution both to Morris scholarship and to late Victorian political history."

Redesigning the World

William Morris, the 1880s, and the Arts and Crafts

Peter Stansky

"... a very readable and enjoyable book. It is not so much a biography of William Morris as a consideration of him as a political and an esthetic phenomenon and as the founder of a number of organizations. ... Mr. Stansky examines them with a learning that is never pedantic, frequently humorous and always intelligent."

—*Quentin Bell, The New York Times Book Review*

"... a pioneering example of how seemingly 'old fashioned' concerns and procedures in political history or the history of art can take on a renewed vitality when combined."
