

Special announcement

WORLD ORGANISATION OF GENERAL SYSTEMS & CYBERNETICS

SEVENTH INTERNATIONAL CONGRESS OF CYBERNETICS & SYSTEMS

This triennial conference will be held at Imperial College, London, U.K., on September 7–11 1987. The Congress is supported by many international bodies concerned with management, labour, computers, systems, cybernetics, technology and the sciences. The Honorary Congress Committee consists of Nobel Prize-winners and other eminent scientists of world repute.

The Seventh Congress will comprise opening and closing sessions, as well as symposia and sections. Provision is also being made for poster sessions, book exhibition, various equipment demonstrations, cocktail party and social events.

The topics involve the following domains:

- Artificial and Machine Intelligence (including expert systems and computer chess)
- Automation (including CAD/CAM, FMS, CIM, Robotics)
- Behavioural Sciences
- Biocybernetics
- Brain and Computing devices
- Computer Languages
- Cybernetics and Art
- Cybernetics and International Relations (including study of conflict)
- Cybernetics and Natural Sciences

- Economic Cybernetics
- Education and Cybernetics
- Environmental Cybernetics and Ecosystems
- Fuzzy Systems
- Information Technology (including data security, development trends)
- Management Cybernetics
- Meaning and Philosophy of Cybernetics
- Medical and Neuro-cybernetics
- Optical and Electronic Computers (including parallel processing)
