

CONTENTS

Volume 50

Number 1

- 1 R. D. FOLEY AND D. R. MCDONALD. Yaglom limits can depend on the starting state
- 35 NICOLAS CHENAVIER AND OLIVIER DEVILLERS. Stretch factor in a planar Poisson–Delaunay triangulation with a large intensity
- 57 HUI XU, FENGYANG CHENG, YUEBAO WANG AND DONGYA CHENG. A necessary and sufficient condition for the subexponentiality of the product convolution
- 74 VIKTOR BEZBORODOV, LUCA DI PERSIO, TYLL KRUEGER, MYKOLA LEBID AND TOMASZ OŹAŃSKI. Asymptotic shape and the speed of propagation of continuous-time continuous-space birth processes
- 102 THOMAS FLYNN. Forward sensitivity analysis for contracting stochastic systems
- 131 HIROAKI HATA AND SHUENN-JYI SHEU. An optimal consumption and investment problem with partial information
- 154 THI NGOC MINH NGUYEN, SYLVAIN LE CORFF AND ERIC MOULINES. On the two-filter approximations of marginal smoothing distributions in general state-space models
- 178 NICOLAS CHAMPAGNAT AND DENIS VILLEMONAIS. Uniform convergence of conditional distributions for absorbed one-dimensional diffusions
- 204 ROLANDO CAVAZOS-CADENA AND DANIEL HERNÁNDEZ-HERNÁNDEZ. Vanishing discount approximations in controlled Markov chains with risk-sensitive average criterion
- 231 PIERRE HOUDEBERT. Percolation results for the continuum random cluster model
- 245 MATTHEW I. ROBERTS. The probability of unusually large components in the near-critical Erdős–Rényi graph
- 272 DAVID ARISTOFF AND LINGJIONG ZHU. On the phase transition curve in a directed exponential random graph model
- 302 THOMAS M. M. MEYFROYT. Degree-dependent threshold-based random sequential adsorption on random trees

- 327 DAVID STENLUND. On the Mabinogion urn model
- 347 TIZIANO DE ANGELIS AND GIORGIO FERRARI. Stochastic nonzero-sum games: a new connection between singular control and optimal stopping
- 373 DMITRI FINKELSHTEIN AND PASHA TKACHOV. Kesten's bound for subexponential densities on the real line and its multi-dimensional analogues
- 396 HUIJIE QIAO. Uniqueness for measure-valued equations of nonlinear filtering for stochastic dynamical systems with Lévy noise
- 414 PHILIP KENNERBERG AND STANISLAV VOLKOV. Jante's law process
- 440 DANIEL PAULIN, AJAY JASRA, DAN CRISAN AND ALEXANDROS BESKOS. On concentration properties of partially observed chaotic systems
- 480 RÉMI LEMONNIER, KEVIN SCAMAN AND NICOLAS VAYATIS. Spectral bounds in random graphs applied to spreading phenomena and percolation
- 504 GAUTAM IYER, NICHOLAS LEGER AND ROBERT L. PEGO. Coagulation and universal scaling limits for critical Galton–Watson processes
- 543 LOÏC CHAUMONT AND THI NGOC ANH NGUYEN. On mutations in the branching model for multitype populations
- 565 HUI HE, JINGNING LIU AND MEI ZHANG. On Seneta–Heyde scaling for a stable branching random walk
- 600 ELENA PERFILEV AND VITALI WACHTEL. Local asymptotics for the area under the random walk excursion
- 621 CHRISTIAN BAYER, HILMAR MAI AND JOHN SCHOENMAKERS. Forward-reverse expectation-maximization algorithm for Markov chains: convergence and numerical analysis
- 645 YUANYUAN LIU AND WENDI LI. Error bounds for augmented truncation approximations of Markov chains via the perturbation method

- 671 GIORGIO FERRARI AND SHUZHEN YANG. On an optimal extraction problem with regime switching
- 706 JULIE FOURNIER. Identification and isotropy characterization of deformed random fields through excursion sets
- 726 WISSEM JEDIDI AND STAVROS VAKERLOUDIS. Windings of planar processes, exponential functionals and Asian options
- 743 N. LANCHIER AND S. REED. The role of cooperation in spatially explicit economical systems
- 759 MATTHEW COULSON, ROBERT E. GAUNT AND GESINE REINERT. Compound Poisson approximation of subgraph counts in stochastic block models with multiple edges
- 783 YONGHUI HUANG, ZHAOTONG LIAN AND XIANPING GUO. Risk-sensitive semi-Markov decision processes with general utilities and multiple criteria
- 805 BOHAN CHEN, CHANG-HAN RHEE AND BERT ZWART. Importance sampling of heavy-tailed iterated random functions
- 833 ROMAIN AZAÏS, BERNARD DELYON AND FRANÇOIS PORTIER . Integral estimation based on Markovian design
- 858 ALEXEY MEDVEDEV AND GÁBOR PETE. Speeding up non-Markovian first-passage percolation with a few extra edges
- 887 KRZYSZTOF DĘBICKI AND PENG LIU. Extremes of nonstationary Gaussian fluid queues
- 918 R. I. OLIVEIRA, R. RIBEIRO AND R. SANCHIS. Disparity of clustering coefficients in the Holme–Kim network model
- 944 TANGUY CABANA AND JONATHAN D. TOUBOUL. Large deviations for randomly connected neural networks: I. Spatially extended systems
- 983 TANGUY CABANA AND JONATHAN D. TOUBOUL. Large deviations for randomly connected neural networks: II. State-dependent interactions
- 1005 Correction

Volume 50**Number 4**

- 1007 XIAOOU LI, JINGCHEN LIU AND SHUN XU. A multilevel approach towards unbiased sampling of random elliptic partial differential equations
- 1032 K. L. HELMES, R. H. STOCKBRIDGE AND C. ZHU. A weak convergence approach to inventory control using a long-term average criterion
- 1075 DANIEL AHLBERG AND JOHAN TYKESSON. Gilbert's disc model with geostatistical marking
- 1095 MARKUS KIDERLEN AND JAN RATAJ. Dilation volumes of sets of finite perimeter
- 1119 BARTOSZ KOŁODZIEJEK. On perpetuities with light tails
- 1155 MARCO OESTING AND KIRSTIN STROKORB. Efficient simulation of Brown–Resnick processes based on variance reduction of Gaussian processes
- 1176 ANTAR BANDYOPADHYAY AND GURSHARN KAUR. Linear de-preferential urn models
- 1193 SABRINA KOMBRINK. Renewal theorems for processes with dependent interarrival times
- 1217 SERVET MARTÍNEZ AND WERNER NAGEL. Regenerative processes for Poisson zero polytopes
- 1227 N. TURCHI AND F. WESPI. Limit theorems for random polytopes with vertices on convex surfaces
- 1246 YONIT BARRON. A threshold policy in a Markov-modulated production system with server vacation: the case of continuous and batch supplies
- 1275 M. N. M. VAN LIESHOUT. Nearest-neighbour Markov point processes on graphs with Euclidean edges
- 1294 JEAN BERTOIN, ASER CORTINES AND BASTIEN MALLEIN. Branching-stable point measures and processes

Subscription rates

Subscription rates for volume **50** (2018) of *Advances in Applied Probability* (AAP) are as follows (post free and online access at <http://cambridge.org/apr>). For libraries and institutions: US\$381.00, £246.00 (online only); US\$418.00, £270.00 (online & print). For individuals, US\$144.00, £92.00 (online & print). The subscription rates for volume **55** (2018) of *Journal of Applied Probability*, the companion publication, are the same; for individual subscribers that order both journals at the same time, the combined price is discounted by 10%. Please send all subscription renewals and enquiries to: subscriptions_newyork@cambridge.org in the Americas and journals@cambridge.org for the Rest of the World.

Notes for contributors

A submission to Applied Probability is considered as a submission to either *Journal of Applied Probability* (JAP) or *Advances in Applied Probability* (AAP). Longer papers are typically published in AAP, but the assignment of papers between the two journals is made by the Editor-in-Chief on an issue-by-issue basis. Short communications and letters specifically relating to papers appearing in either JAP or AAP are published in JAP.

Papers submitted to the Applied Probability journals are considered on the understanding that they have not been published previously and are not under consideration by another publication. Accepted papers will not be published elsewhere without the written permission of the Trust. Submitted papers should be in English. It is the author's responsibility to ensure an acceptable standard of language, and a paper failing to meet this requirement may go back to the author for rewriting before being sent out for review.

Papers should include: (i) a **short abstract** of 4–10 lines giving a non-mathematical description of the subject matter and results; (ii) a list of **keywords** detailing the contents; and (iii) a list of **classifications**, using the 2010 Mathematics Subject Classification scheme (<http://www.ams.org/msc/>). Letters to the Editor need not include these. To assist authors in writing papers in the Applied Probability style, they may use the L^AT_EX class file `aptpub.cls`, available from <http://www.appliedprobability.org/>. Use of this class file is not a condition of submission, but will considerably increase the speed at which papers are processed.

Papers should be submitted as portable document format (PDF) files, not exceeding 1 Mb, to the email address submissions_japaap@sheffield.ac.uk. All submissions will be acknowledged on receipt.

Copyright

The copyright of all published papers is vested in the Applied Probability Trust. When a paper is accepted for publication, the Trust asks the authors to assign copyright by signing a form in which the terms of copyright are listed. Failure to do this promptly may delay or prevent publication.

Authorisation to photocopy items for internal or personal use, or the internal or personal use of specific clients, is granted by the Applied Probability Trust for libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the corresponding processing and royalty fees (see <http://www.copyright.com>) are paid directly to CCC, 222 Rosewood Drive, Danvers, MA 01923, USA. 0001–8678/18
