The Journal of Laryngology and Otology

(Founded in 1887 by MORELL MACKENZIE and NORRIS WOLFENDEN)

EDITED BY

A. LOGAN TURNER AND J. S. FRASER

ASSISTED BY

DOUGLAS GUTHRIE AND IRWIN MOORE

1. Original Articles are accepted on the condition that they have not been published elsewhere.

2. Manuscripts should be typewritten, on one side only of the paper, and well spaced.

3. Galley proofs and engraver's proofs of illustrations are sent to the author. Corrections, which should be kept to a minimum, must be clearly marked and no additional matter should be added.

4. The order for reprints should be sent when returning galley proofs, and for this purpose special forms are supplied, on which the price of the reprints is stated.

5. Authors of Original Communications on Oto-Laryngology in other Journals are invited to send a copy, or two reprints, to the *Journal of Laryngology*. If they are willing, at the same time, to submit their own abstract (in English, French, Italian, or German) it will be welcomed.

6. Editorial Communications should be addressed to "EDITORS, *Journal of Laryngology*, c/o Messrs OLIVER AND BOYD, Tweeddale Court, Edinburgh."

7. The Annual Subscription is Forty Shillings or Ten Dollars, and is payable in advance.

8. Single copies of back numbers, both of the present and the previous series, are on sale at Four Shillings (One Dollar) each.

9. An Annual Subscription can be commenced with any number of the Journal, and the preceding numbers of the current year can be purchased at Four Shillings (One Dollar) each.

CENTRAL LONDON THROAT AND EAR HOSPITAL

GRAY'S INN ROAD

(Near King's Cross Stations)

DAILY CLINICS.

OVER 11,000 NEW PATIENTS LAST YEAR. 50,000 ATTENDANCES.

A CLEAN, SAFE AND CONVENIENT MILK SUPPLY

Delivered in Glass Bottles.

WARRANTED PURE WITH ALL ITS CREAM

and free from disease germs.

Suitable for all purposes. DELIVERED ONCE A WEEK

SOME OF THE ADVANTAGES:

1. Our milk is clean because it is clarified by centrifugal force, which long experience has proved to be the best method.
2. Our milk is safer to use than even the best raw milk, because all germs of TUBERCULOSIS, SCARLET FEVER, DIPHTHERIA, and TYPHOID FEVER are destroyed.
3. Our milk is convenient, because customers have only to take it in once a week, and they have a constant supply of sweet wholesome milk always in the house.
4. No chemical or preservative used.
5. No colouring matter used.
6. It is more easily digested than ordinary raw milk.

4TH EDITION.**REVISED AND ENLARGED.****LEWIS'S PRACTICAL SERIES****DISEASES OF THE NOSE AND THROAT**By **HERBERT TILLEY**, B.S.(Lond.), F.R.C.S.(Eng.), Surgeon, Ear and Throat Department, University College Hospital; Teacher of Laryngology and Otology, University of London.

With numerous Illustrations, including 74 Plates. Demy 8vo.

28s. net. Postage 1s., abroad 1s. 3d.

Extracts from Press Notices."The work is so comprehensive that it should be a valuable book of reference, whilst it is not too large to serve as an ordinary text-book."—*British Medical Journal*."We have no hesitation in recommending his book to the practitioner as well as to the prospective specialist."—*Lancet*."The author is to be congratulated upon his work; as a text-book it is one of the best upon the subject; . . . displays the master mind of an accomplished teacher."—*Medical Press*.**LONDON: H. K. LEWIS & CO. LTD., 136 Gower Street, and 24 Gower Place, W.C. 1.**

ANTI-CATARRH VACCINE (Prophylactic).

Prepared in the Inoculation Department of St Mary's Hospital, London—(Director: Sir A. E. Wright, M.D., etc.), and supplied to the Medical Profession through the agency of PARKE, DAVIS & Co.

THIS vaccine is adapted for the preventive inoculation of individuals who suffer from recurring "colds," in cases in which there is some general diminution in resistance, indicated by the patient becoming infected by any one of the several microbes which may cause these catarrhs.

Each c.c. of the vaccine contains:—

Micrococcus catarrhalis 50 millions	Bacillus septus (diphtheroid) 50 millions
B. pneumoniae (Friedländer) 50 millions	Bacillus influenzae 250 millions
Pneumococcus (mixed types) 250 millions	Streptococcus (mixed types) 25 millions

DOSAGE—Three doses—0.25 c.c., 0.5 c.c., and 1 c.c.—should be given at ten-day intervals. In persons who are very susceptible to winter "colds," these injections should be given in the autumn, and a dose of 1 c.c. may be given at monthly intervals during the winter. This vaccine may produce a marked local reaction if injected into muscular tissue; it should be administered subcutaneously.

The vaccine is supplied in bulbs of 1 c.c. and in bottles of 25 c.c., also in sets of three graduated doses.

Particulars of other vaccines (including a MIXED VACCINE FOR TREATMENT OF COLDS, a MIXED VACCINE FOR BRONCHIAL ASTHMA, and a MIXED ANTI-INFLUENZA VACCINE) issued by the St Mary's Hospital Inoculation Department will be sent to any Medical Man, on request, by the Sole Agents—

PARKE, DAVIS & Co., 50 Beak St., **LONDON, W.1.**
