The Journal of Laryngology and Otology

(Founded in 1887 by MORELL MACKENZIE and NORRIS WOLFENDEN)

EDITED BY

WALTER HOWARTH

ASSISTED BY

W. M. MOLLISON

1. Original Articles are accepted on the condition that they have not been published elsewhere.

2. Manuscripts should be typewritten, on one side only of the paper, and well spaced.

3. Galley proofs and engraver's proofs of illustrations are sent to the author. Corrections, which should be kept to a minimum, must be clearly marked and no additional matter added.

4. Orders for reprints should be sent when returning galley proofs, and for this purpose special forms are supplied, on which the price of the reprints is stated.

5. Authors of Original Communications on Oto-Laryngology in other Journals are invited to send a copy, or two reprints, to the *Journal of Laryngology*. If they are willing, at the same time, to submit their own abstract (in English, French, Italian, or German) it will be welcomed.

6. Editorial Communications may be addressed to THE EDITOR, *Journal of Laryngology*, c/o HEADLEY BROTHERS, 109 Kingsway, London, W.C.2.

7. The Annual Subscription commencing with the January issue is Two Pounds sterling, post free, and is payable in advance.

8. Single copies, both of the present and the previous series, are on sale at Four Shillings each.

9. All Subscriptions, advertising and business communications should be sent to the Publishers, HEADLEY BROTHERS, 109 Kingsway, London, W.C.2.

United States of America

Orders for this Journal may be sent either through a local bookseller, or to Messrs. G. E. STECHERT & Co., 31-33 East 10th Street, New York, or may be sent direct to the Publishers, HEADLEY BROTHERS, 109 Kingsway, London, W.C.2, England.

SCUROFORM

in laryngeal Tuberculosis

Of the diseases of the larynx which become extrinsic and infect the pharynx, giving rise to severe dysphagia, the most common, most important, and most distressing is laryngeal tuberculosis. When ulceration and perichondritis supervene, the deglutition of even semi-solid foods becomes more difficult and painful.

In these cases prolonged local anæsthetisation of the affected areas is of assistance in maintaining the nutrition of the patient, and may sometimes in advanced conditions be a life-saving procedure.

SCUROFORM, a surface anæsthetic of low toxicity, applied from an insufflator, either at full strength, or with an equal part of lactose, together with one or two per cent. of menthol, provides outstanding relief in such instances. Frequent application is permissible, and may be left entirely to the discretion of the patient.

Less severe cases may obtain benefit from spraying the larynx with SCUROFORM solution in olive oil, or by sucking a SCUROFORM lozenge 10 minutes before food.

Supplies:

- ★SCUROFORM powder, containers of 25 grammes.
- SCUROFORM solution in olive oil, bottles of 25 c.c.
- SCUROFORM lozenges, boxes of 40.

PRESCRIBE THE EASY EFFECTIVE METHOD

When spraying, the patient can hold his head in a natural position, yet the solution spreads throughout the nasal cavity, assuring thorough treatment. Effective dropper-application, on the other hand, requires a complicated posture technique which patients are apt to neglect in home treatment.
