

Review Papers for the Journal of Applied Probability

The Editorial Board would like to encourage the submission to the *Journal* of Review Papers summarising and coordinating recent results in any of the fields of Applied Probability. The papers should be approximately 40–50 printed pages in length.

On acceptance of a Review Paper for publication in the *Journal*, the author will receive £ stg. 100 (\$240).

Methuen's Supplementary Review Series in Applied Probability

General Editor: M. S. BARTLETT, M.A., D.SC., F.R.S.

Editor: J. GANI, D.I.C., PH.D.

This supplementary series consists of the Review Papers from the *Journal of Applied Probability* in book form. The Review Series is designed to bridge the gap between the publication of research papers and the advent of a book coordinating their results. Consecutive volumes written in a simple expository style, will provide research workers and students of Applied Probability with up-to-date accounts of work done in their fields. The series deals with the applications of Probability Theory to the biological, physical, social and technological sciences.

Already Published

Volume 1. TIME-DEPENDENT RESULTS IN STORAGE THEORY

by N. U. Prabhu

Volume 2. DIFFUSION MODELS IN POPULATION GENETICS

by M. Kimura

Volume 3. GROUP REPRESENTATIONS AND APPLIED PROBABILITY

by E. J. Hannan

Volume 4. STOCHASTIC MODELS FOR BACTERIOPHAGE by J. Gani

Volume 5. RECENT RESULTS IN INFORMATION THEORY by S. Kotz

Volume 6. ON THE ALGEBRA OF QUEUES by J. F. C. Kingman

Volume 7. COMPLETE EXPONENTIAL CONVERGENCE AND SOME
RELATED TOPICS by C. R. Heathcote

Volume 8. STOCHASTIC APPROACH TO CHEMICAL KINETICS by D. A.
McQuarrie

Orders for these should be made through your bookseller or direct from:
Methuen & Co. Ltd.

11 NEW FETTER LANE LONDON EC4

Subscription rates

Subscriptions (post free) for the 1968 volume of the *Journal* are:

U.S. \$15, £stg. 5.5.0. \$A. 13.40, for libraries and institutions;

U.S.\$8, £stg. 2.16.0, \$A. 7.20, for individuals belonging to a recognised scientific society.

Members of the London Mathematical Society should apply direct to the Secretary of the Society for copies of the *Journal*.

All enquiries about the *Journal*, as well as other subscriptions and orders for back numbers should be sent to the Editorial Assistant, Miss M. Hitchcock, Department of Probability and Statistics, The University, Sheffield, S3 7RH, England. The price of back numbers is \$16.90, £stg. 5.18.0, \$A. 15.10 per volume. Cheques, money orders, etc. should be made out to the *Journal of Applied Probability*; cheques on U.S., U.K. and Australian banks will be acceptable.

Notes for Contributors

It is a condition of publication in the *Journal of Applied Probability* that papers shall not previously have appeared elsewhere, and will not be reprinted without the written permission of the Trust. The copyright of all published papers shall be vested in the Trust. It is the general policy of the *Journal* not to accept for publication papers which cannot appear in print within 15 months of their date of submission. Authors will receive 100 reprints of their papers free, and joint authors 50 each, except for authors of review papers, who will receive 10 copies free. Additional reprints will be provided at cost.

Manuscripts should be written in English or French; manuscripts in other languages may be accepted by the Editors, but will appear (subject to the author's agreement) in English or French translation in the *Journal*.

It will be of help to the Editors if the following conventions are adopted:

a) The manuscript should be typewritten, using double spacing, on one side of the paper only. The original and a copy, may be submitted to any Editor; a duplicate of the covering letter should, however, be sent to the Editor-in-Chief.

b) References should be indicated in the text by the name of the author(s) and the date, thus: Feller (1961), and the full references listed at the end of the article in alphabetical order. Journal references should include the title of the article cited, the title of the journal (abbreviated in the style of the *International Journal of Abstracts: Statistical Theory and Method*) the volume, and inclusive page numbers. Book references should give the full title, the publisher, and the place of publication. For example:

Feller, W. (1961) A simple proof of renewal theorems. *Comm. Pure Appl. Math.* **14**, 285–293.

Robinson, E. A. (1959) *An Introduction to Infinitely Many Variates*. Griffin, London.

c) Type faces should be carefully distinguished on the manuscript using the following standard methods of marking:

Italic capitals (*T, I, R*) and lower case letters (*t, i, r*) should be underlined once, e.g.

T, I, R, t, i, r.

Bold-face capitals (**T, I, R**) and lower case letters (**t, i, r**) should have a curly underline, e.g.

T, I, R, t, i, r.

Greek characters (α, β, θ) and script letters ($\mathcal{J}, \mathcal{I}, \mathcal{R}$) should be carefully drawn and identified when first used by a marginal note of the form 'a—lower case Greek alpha' or \mathcal{R} —script R'.

d) Indices and subscripts should be clearly distinguished, using the marking $\overset{4}{\downarrow}$, $\underset{4}{\uparrow}$ where necessary.

Authors will receive only first proofs for correction; charges will be made for excessive alteration to these.

Printed in Israel at the Jerusalem Academic Press, P.O.B. 2390, Jerusalem.

Journal of Applied Probability

Volume 5

Number 2

August 1968

Review Paper

- SAMUEL KARLIN 231 Equilibrium behavior of population genetic models with non-random mating. Part I: Preliminaries and special mating systems

Research Papers

- EDWARD POLLAK 314 On random genetic drift in a subdivided population
- PREM S. PURI 334 Interconnected birth and death processes
- R. G. KHAZANIE 350 An indication of the asymptotic nature of the Mendelian Markov process
- T. W. MULLIKIN 357 Some probability distributions for neutron transport in a half-space
- J. G. GILSON 375 Feynman integral and phase space probability
- JOZEF L. TEUGELS 387 Exponential ergodicity in Markov renewal processes
- PAUL J. SCHWEITZER 401 Perturbation theory and finite Markov chains
- J. N. DARROCH AND 414 Passage-time generating functions for continuous-time finite Markov chains
- K. W. MORRIS
- JOHN P. MULLOOLY 427 A one dimensional random space-filling problem
- G. F. NEWELL 436 Queues with time-dependent arrival rates. I: The transition through saturation
- N. U. PRABHU 452 Some new results in storage theory
- GEROLD PESTALOZZI 461 A queue with Markov-dependent service times

Short Communications

- JOHN F. REYNOLDS 467 On the autocorrelation and spectral functions of queues
- T. NARASIMHAM 476 A note on the asymptotic distribution of the traffic-time-average in a $G.I/G/\infty$ with bulk arrivals
- C. C. HEYDE 481 An extension of the Hájek-Rényi inequality for the case without moment conditions
