# Call for Papers Risk Theory Society Annual Seminar April 20-22, 2018 Georgia State University Atlanta, Georgia Submissions due December 15, 2017

The Risk Theory Society is a group of economists, financial economists, and actuaries who undertake theoretical and applied research in the areas of insurance economics, financial economics related to insurance markets, actuarial science, and more generally in the economic analysis of risk and uncertainty. Membership in the society is earned by presenting a paper at the annual seminar and forfeited by missing two consecutive meetings.

The society invites interested parties to submit papers for the 2018 meeting. Each paper accepted for the meeting is given one hour and fifteen minutes for presentation and defense by the authors. The first twenty minutes of that time are reserved to be free of interruption other than for questions of clarification. After the grace period, discussion is typically vigorous.

Over the past 10 years, the number of submissions ranged from 42 to 69 with an average of 50. Ten papers were selected each year. Although we accept submission of a five-page abstract, most submissions and most accepted papers were in full draft or essentially completed form.

**PAPER SUBMISSION PROCEDURE**: Submissions are due on December 15, 2017. The program committee will notify authors of accepted papers by end of January 2018, or soon thereafter. Accepted papers must be completed and sent for posting on the Risk Theory Society web page by March 1, 2018.

Submissions should be e-mailed as attachments in the Adobe Portable Document Format (pdf) by December 15, 2017, to:

Professor Ty Leverty Secretary of the Risk Theory Society Wisconsin School of Business University of Wisconsin-Madison E-mail: ty.leverty@wisc.edu

FURTHER INFORMATION: For more information, contact Ty Leverty or visit the Risk Theory web site at <a href="http://aria.org/rts">http://aria.org/rts</a>. For details regarding local arrangements for the 2018 Seminar, please visit the web site or contact Professor Stephen Shore at sshore@gsu.edu

4 – 8 June 2018 ESTREL Berlin – Hotel & Conference Center www.ica2018.org

## - SAVE THE DATE -

Registration for ICA 2018 opens on

### **1 DECEMBER 2017**

#### What you can expect:

- Five plenary sessions by internationally renowned guest speakers from insurance, regulation and academia;
- more than 30 invited speakers' sessions with well-known experts;
- around 90 sessions with more than 220 slots for contributed talks and presentations in 12 parallel
  lecture halls chosen by the scientific committee out of the outstanding amount of 580 submissions;
- · the award of numerous best papers for outstanding research results, and;
- an exciting social program with 12 limited attendance experiences, guided tours of Berlin's most famous attractions as well as the city's hidden spaces and three entertaining evening events.

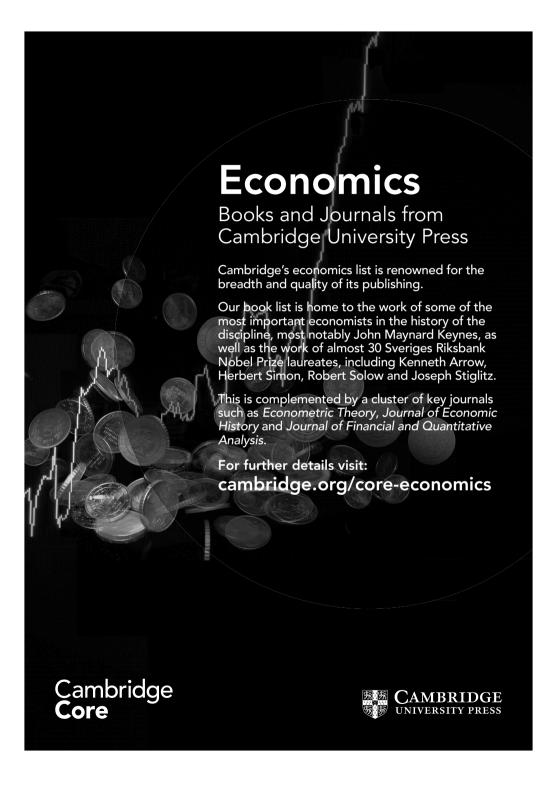

## Five memorable days with colleagues from all over the world in Berlin, the vibrant capital of Germany.

Detailed information on the congress can be found on the website **www.ica2018.org**. For regular updates also subscribe to the monthly ICA 2018 newsletter on the website and follow the ICA 2018 on Twitter, Facebook and LinkedIn.

## Statistics and Probability

Books and Journals from Cambridge University Press

Ideas formulated in terms of statistics and probability are uniquely portable across applied modeling and data-driven disciplines.

Cambridge's publishing supports and promotes this central role by keeping statistics and probability in communication with each other, with their mathematical roots, and with the applied disciplines that both motivate and use advances in theory, methods, and computation.

## ASTIN Bulletin: The Journal of the International Actuarial Association NOTES FOR CONTRIBUTORS

#### AIMS AND SCOPE

ASTIN Bulletin was founded in 1958 as a journal providing an outlet for actuarial studies in non-life insurance. In the late 1980's the journal extended its scope to encompass the study of financial risk in insurance (AFIR). In 2007 the journal was established as the journal of the International Actuarial Association (IAA) and encompasses all of the scientific sections of the IAA.

ASTIN Bulletin publishes papers that are relevant to any branch of actuarial science and insurance mathematics. Papers should be quantitative and scientific in nature, and might draw on theory and methods developed in any branch of the mathematical sciences including actuarial mathematics, statistics, probability, financial mathematics and econometrics.

The journal welcomes papers that present significant and original theoretical developments and papers that present significant and original applications of mathematical, statistical or econometric theory to problems arising in insurance, pensions and finance. We especially welcome papers opening up new areas of interest to the international actuarial profession as well as papers that describe open problems that have arisen in practice.

#### **SUBMISSIONS**

Papers for possible publication in the ASTIN Bulletin – The Journal of the International Actuarial Association should be submitted online at: http://mc.manuscriptcentral.com/astin. Submission of a paper is held to imply that it contains original unpublished work and is not being submitted for publication elsewhere. Receipt of the paper will be confirmed and followed by a refereeing process which will be handled by one of the editors. The editors aim to complete the refereeing of a submission in around three months. The role of a referee is to assess the quality of the academic content of the paper. If a paper is sufficiently badly written to an extent that prevents a referee from forming a proper view of the paper's scientific content, then the paper will be returned to the author unrefereed.

#### TEXT AND MANUSCRIPT PREPARATION REFERENCING

Before a manuscript can be published it must conform to the style of *ASTIN Bulletin*, a summary of the key points of which is listed below. The comprehensive Notes of Contributors document can be obtained from <a href="http://journals.cambridge.org/asb/contributors">http://journals.cambridge.org/asb/contributors</a>.

- The basic elements of the journal's style have been agreed by the Editors and the publisher and should be clear from checking a recent issue of *ASTIN Bulletin*. If variations are felt necessary, this should be discussed with the editor handling the paper.
- Papers should be written in English or French. It is not the job of the editors, the referees or the publisher to improve the use of English or French in the paper; it is up to the authors to ensure that the language, spelling and grammar are of a high quality prior to submission.
- Authors intending to submit longer papers (e.g. exceeding 30 pages) are advised to consider splitting their contribution into two or more shorter contributions.
- The first page of each paper should start with the title, the name(s) of the author(s), an abstract and a list of keywords. An institutional affiliation can be placed between the name(s) of the author(s) and the abstract.
- Footnotes should be avoided as far as possible.

#### AUTHOR AND CONTACT INFORMATION

On the title page, please provide the full name, affiliation, email and postal address of at least one author. Where the family name may be ambiguous (e.g. a double name), please indicate this clearly. For joint authored papers, please indicate the lead corresponding author and provide a contact telephone number.

#### REFERENCING

References should be arranged alphabetically, and for the same author chronologically. Use a, b, c etc. to separate publications of the same author in the same year. For journal references give author(s), year, title, journal (in italics), volume (in boldface), and pages. For book references give author(s), year, title (in italics), publisher, and city.
