June 2018 / Hardback / 9781107166172

\$64.99 / £49.99

Practical Implementation of an Antibiotic Stewardship Program provides an essential resource for healthcare providers in acute care, long-term care, and ambulatory care settings looking either to begin or to strengthen existing antibiotic stewardship programs. Each chapter is written by both physician and pharmacist leaders in the stewardship field and incorporates both practical knowledge as well as evidence-based guidance. This book will also serve as a useful resource for medical students, pharmacy students, residents, and infectious diseases fellows looking to learn more about the field of antibiotic stewardship.

- Presents a practical guide for the implementation of antibiotic stewardship programs
- Offers real-life experience from experts in developing and sustaining antibiotic stewardship programs
- Incorporates both practical experience and evidence-based guidance to implement effective antibiotic stewardship programs in the acute care, long-term care, and ambulatory care settings

## CONTENTS

## Original Articles

- 963** Teamwork and safety climate affect antimicrobial stewardship for asymptomatic bacteriuria  
*Dimitri M. Drekonja, Larissa Grigoryan, Paola Lichtenberger, Christopher J. Graber, Payal K. Patel, John N. Van, Laura M. Dillon, Yiqun Wang, Timothy P. Gauthier, Steve W. Wiseman, Bhavarth S. Shukla, Aanand D. Naik, Sylvia J. Hysong, Jennifer R. Kramer and Barbara W. Trautner*
- 968** Clinical impact of an antimicrobial stewardship program on high-risk pediatric patients  
*Jennifer L. Goldman, Jason G. Newland, Michael Price, Diana Yu and Brian R. Lee*
- 974** Role of rapid diagnostics for viral respiratory infections in antibiotic prescribing decision in the emergency department  
*Jing Li, S. Lena Kang-Birken, Samantha K. Mathews, Catelynn E. Kenner and Lynn N. Fitzgibbons*
- 979** The case for a population standardized infection ratio (SIR): A metric that marries the device SIR to the standardized utilization ratio (SUR)  
*Mohamad G. Fakh, Ren-Huai Huang, Angelo Bufalino, Thomas Erlinger, Lisa Sturm, Ann Hendrich and Ziad Haydar*
- 983** Performance of surgical site infection risk prediction models in colorectal surgery: external validity assessment from three European national surveillance networks  
*Rebecca Grant, Martine Aupee, Nicolas C. Buchs, Kristine Cooper, Marie-Christine Eisenring, Theresa Lamagni, Frédéric Ris, Juliette Tanguy, Nicolas Troillet, Stephan Harbarth and Mohamed Abbas*
- 991** The effect of body mass index on the risk of surgical site infection  
*Anouk P. Meijs, Mayke B.G. Koek, Margreet C. Vos, Suzanne E. Geerlings, H. Charles Vogely and Sabine C. de Greeff*
- 997** Incidence of *Clostridioides difficile* infections among young and middle-aged adults: Veterans Health Administration  
*Ellyn M. Russo, Jennifer Kuntz, Holly Yu, Jeremy Smith, Ronald George Hauser, Yuliya Halchenko and Yinong Young-Xu*
- 1006** Infection prevention and control practices related to carbapenemase-producing *Enterobacteriaceae* (CPE) in acute-care hospitals in Ontario, Canada  
*Alainna J. Jamal, Felipe Garcia-Jeldes, Mahin Baqi, Sergio Borgia, Jennie Johnstone, Kevin Katz, Philipp Kohler, Matthew P. Muller and Allison J. McGeer for the CPE Investigators of the Toronto Invasive Bacterial Diseases Network*
- 1013** Bacterial septic arthritis infections associated with intra-articular injection practices for osteoarthritis knee pain—New Jersey, 2017  
*Kathleen M. Ross, Jason S. Mehr, Barbara L. Carothers, Rebecca D. Greeley, Isaac Benowitz, David Henry, Lisa A. McHugh, Lisa DiFedele, Eric Adler, Shereen Naqvi, Laura Taylor, Edward Lifshitz, Christina Tan and Barbara E. Montana*

- 1019** Impact of multiple concurrent central lines on central-line–associated bloodstream infection rates  
*Jesse Couk, Sheri Chernetsky Tejedor, James P. Steinberg, Chad Robichaux and Jesse T. Jacob*
- 1024** Sustained improvement in hospital cleaning associated with a novel education and culture change program for environmental services workers  
*Elena K. Martin, Elizabeth L. Salsgiver, Daniel A. Bernstein, Matthew S. Simon, William G. Greendyke, James M. Gramstad, Roydell Weeks, Timothy Woodward, Haomiao Jia, Lisa Saiman, E. Yoko Furuya and David P. Calfee*

### Reviews

- 1030** Understanding ultraviolet light surface decontamination in hospital rooms: A primer  
*John M. Boyce and Curtis J. Donskey*
- 1036** Advances in the prevention and management of central-line–associated bloodstream infections: The role of chelator-based catheter locks  
*Anne-Marie Chaftari, George M. Viola, Joel Rosenblatt, Ray Hachem and Issam Raad*

### Concise Communications

- 1046** Current infection prevention and antibiotic stewardship program practices: A survey of the Society for Healthcare Epidemiology of America (SHEA) Research Network (SRN)  
*Kathleen Chiotos, Clare Rock, Marin L. Schweizer, Valerie M. Deloney, Daniel J. Morgan, Aaron M. Milstone, David K. Henderson, Anthony D. Harris and Jennifer H. Han*
- 1050** Association between meeting core elements for inpatient antimicrobial stewardship and antibiotic utilization  
*Shaina R. Bernard, Kristi M. Kuper, Kimberly B. Lee, Michael P. Stevens, Samuel F. Hohmann, Natalie Nguyen and Amy L. Pakyz*
- 1053** Clinical impact of matrix-assisted laser desorption ionization time-of-flight mass spectrometry for the management of inpatient pneumonia without additional antimicrobial stewardship support  
*Ann Marie Porreca Kratz, Kaede V. Sullivan and Jason C. Gallagher*
- 1056** The impact of formulary restriction on the relative consumption of carbapenems in intensive care units at an academic medical center  
*Jacob W. Pierce, Andrew Kirk, Kimberly B. Lee, John D. Markley, Amy Pakyz, Gonzalo Bearman, Michelle E. Doll and Michael P. Stevens*
- 1059** Identification of four patients with colistin-resistant *Escherichia coli* containing the mobile colistin resistance *mcr-1* gene from a single health system in Michigan  
*Oryan Henig, Laura J. Rojas, Michael A. Bachman, Susan D. Rudin, Brenda M. Brennan, Marty K. Soehnlén, Kelly L. Jones, John P. Mills, Carey R. Dombeki, Amanda M. Valyko, Steven H. Marshall, Robert A. Bonomo, Keith S. Kaye and Laraine Washer*
- 1063** Impact of health insurance status on surgical site infection incidence: A prospective cohort study  
*Brian T. Duggan, Jan A. Roth, Marc Dangel, Manuel Battegay and Andreas F. Widmer*

## Research Briefs

- 1066** Mitigating and preventing hepatitis B virus exposures during hemodialysis across a large regional health system  
*Emil P. Lesho, John Hix, Melissa Bronstein, Shubha Shastry, John Hanna, Gina Scroggins and Marvin Grieff*
- 1069** Changing dynamics of colonization in nursing facility patients over time: Reduction in methicillin-resistant *Staphylococcus aureus* (MRSA) offset by increase in vancomycin-resistant *Enterococcus* (VRE) prevalence  
*Julia Mantey, Lillian Min, Marco Cassone, Kristen E. Gibson and Lona Mody*
- 1071** Expanded susceptibility and resistance mechanism testing among carbapenem-resistant Enterobacteriaceae through a statewide antibiogram, a clinical and public health partnership  
*Amanda J. Durante, Meghan Maloney, Vivian H. Leung, Bobbie Macierowski, Diane Noel, Anthony Muyombwe, Jafar H. Razeq and David B. Banach*
- 1074** Perspectives on antimicrobial use at the end of life among antibiotic stewardship programs: A survey of the Society for Healthcare Epidemiology of America Research Network  
*Rupak Datta, Jeffrey Topal, Dayna McManus, Louise-Marie Dembry, Vincent Quagliarello and Manisha Juthani-Mehta on behalf of the SHEA Research Network*

## Letters to the Editor

- 1077** Gap analysis on antimicrobial stewardship program in central Thailand  
*Anucha Apisarntharak, Kittiya Jantarathaneewat and David J. Weber*
- 1079** Antibiotic prescribing behavioral assessment of physicians involved in surgical care  
*Kittiya Jantarathaneewat, Siriththin Chansirikarnjana, Nattapong Tidwong, Linda M. Mundy and Anucha Apisarntharak*
- 1081** Dentists' perceptions of antimicrobial use for dental procedures  
*Yasuhiro Kano, Yasuaki Tagashira, Daisuke Kobayashi and Hitoshi Honda*
- 1084** Does oral vancomycin prophylaxis during systemic antibiotic exposure prevent *Clostridioides difficile* infection relapses? Still in search of an answer  
*Jeannie D. Chan, Chloe Bryson-Cahn, Rupali Jain, John B. Lynch and Catherine Liu*
- 1086** Increased time spent on terminal cleaning of patient rooms may not improve disinfection of high-touch surfaces  
*Edmond A. Hooker*

## About the cover:

Since 2015, the cover format of each volume of *Infection Control and Hospital Epidemiology* has been changed to honor one of the many professionals through out history who recognized not only how disease might be spread but also how those principles could be applied to reduce health care associated infections.

Rabbi Moshe ben Maimon or Moses Maimonides (son of Maimon) was born in Cordoba, Spain, a center of intellectual and religious freedom, on March 30, circa 1135. Maimon ben Joseph, his father, was a prominent scholar, writer, and judge for Jewish religious courts. Maimonides studied with Averroes, a prominent physician-philosopher. In 1148, his family left Cordoba after a repressive dynasty, the Almohades Caliphate that ruled in Spain and North Africa during the 12th and 13th centuries, required that they either convert to Islam, emigrate, or be put to death. They wandered first to Fez, Morocco, and to Acco, Palestine, before finally settling in Old Cairo (Fostat), Egypt, circa 1165. His father and brother established a business selling precious stones, but soon after, his father died and his brother David perished in a shipwreck. Maimonides turned to medicine as a means to support both families. While only in his thirties, Maimonides was appointed as physician to the Court of the Sultan, and he served as head of the Jewish community in Cairo. During the Crusades, Maimonides' reputation as a healer was so great that King Richard the Lion hearted offered him a position as his personal physician.

Maimonides wrote many scholarly works on a variety of subjects ranging from biblical and Talmudic law to logic, science, and medicine. He embraced the use of careful scientific reasoning and eschewed mysticism. In his 10 books on medicine, Maimonides was an early advocate for the importance of hygiene, bathing, and the need for fresh air, clean water, a healthy diet, as well as proper disposal of refuse and placement of toilets far away from living quarters. Maimonides was an early “steward” who recommended non pharmacological interventions first. He also noted where evidence was lacking and further investigation was needed before recommendations could be made. Many of the concerns and observations that Maimonides made more than 800 years ago remain highly relevant to the field of infection prevention and control today.

Maimonides died in Cairo on December 13, 1204 at the age of 69. Several legends are a scribed to Maimonides. It is unlikely that he wrote the Oath of Maimonides. He is buried in Tiberias, Palestine, on the western shore of the Sea of Galilee in present-day Israel. However, this site was not chosen at random by a donkey that roamed free while bearing his body; Maimonides was interred at Tiberias at his request. Even today, Maimonides remains a highly regarded physician, philosopher, and scholar among Jewish, Arabic, and Christian circles.
