# Dream Machine.

**Rapid, Safe,  
Sterile Processing  
Was Once  
Just A Dream**

● STERIS SYSTEM 1™ has made the dream of rapid and safe sterile processing a reality.

STERIS SYSTEM 1 is the proven, low temperature sterile processing system for immersible surgical and diagnostic devices. Even delicate, heat sensitive scopes, cameras, instruments, and accessories can be safely sterilized in less than 30 minutes-Just In Time for each patient procedure. ●

STERIS SYSTEM 1 also provides peace of mind. There are no toxic fumes, and no disposal restrictions to lose sleep over. ● And liquid processing means that your devices can be sterilized without the drying and wrapping which are required with gaseous systems.

Write or call us today to learn why thousands of health professionals rest assured with the rapid and safe sterile processing of STERIS SYSTEM 1.0

# We've made it easier to spot the benefits of infection protection.

By now, nearly every clinician knows the benefits of central vessel catheterization. But you also know the infection risks. Catheter-related infections are estimated to occur in 3% to 12% of central vessel catheterizations,<sup>1</sup> and 20% of those are fatal.

Until now, all you could do was look for ways to treat the problem. But today you can look for a way to prevent it. ARROWgard<sup>+</sup> Blue.

Catheters with the ARROWgard<sup>+</sup> Blue antiseptic surface are up to 80% less likely to develop bacteremia than unprotected catheters.<sup>3</sup> The benefit to the patient is immense.

ARROWgard<sup>+</sup> Blue is also worth looking into for financial reasons. Each CVC infection costs about \$8,000 to treat, so a 3% infection rate would cost a hospital placing 1,000 CVC's about \$180,000 per year.<sup>4</sup> If

ARROWgard<sup>+</sup> Blue cuts that rate in half, a hospital would save \$90,000. Given today's

focus on medical costs, catheters with ARROWgard<sup>+</sup> Blue offer the unique benefit of saving more than they cost.

Plus, ARROWgard<sup>+</sup> Blue is built into the catheter. So you don't have to dip it or slip it on. You just have to look for the blue.

To learn more about the benefits of ARROWgard<sup>+</sup> Blue, contact your Arrow International, Inc. representative, or call 1 800 523-8446.

ARROWgard<sup>+</sup> Blue. Now you can see infection protection.

## ARROW<sup>®</sup>

1 Elliot, TSJ: Intravascular-device related infections. J. Med. Microbiol.; 27:161-167; 1988.

2 ARROWgard<sup>+</sup> is a joint development of Daltex Medical Services, Inc., and Arrow International, Inc., using technology developed by Dr. Shanta Modak and her colleagues, in the Department of Surgery, Columbia University. U.S. Patent Numbers 4,612,337, 4,563,485, 4,581,028, 5,019,096 apply. Other U.S. and foreign patents pending.

3 Maki, DG; Wheeler, SJ; Stoltz, SM: Study of a novel antiseptic coated central venous catheter. Presented at the Society of Critical Care Medicine Annual Symposium; Washington, D.C., May 1991.

4 Hampton, AD; Sheretz, RJ: Vascular-access infections in hospitalized patients. Surg. Clin. North Am.; 68:57-71; February, 1988.

# BBL<sup>®</sup> Crystal<sup>™</sup> MRSA ID.

## In 4 Hours, A New Age Dawns.

It's a significant development for your laboratory and your hospital. **BBL<sup>®</sup> Crystal<sup>™</sup> MRSA ID.** The first 4-hour test that accurately identifies methicillin-resistant *Staphylococcus aureus* strains (MRSAs). So your lab can rapidly identify nosocomial infections. Your physicians can start effective patient therapy sooner. And your hospital can deliver better patient care.

With **BBL<sup>®</sup> Crystal<sup>™</sup>**: all you do is prepare the

broth, inoculate the wells, snap on the lid and incubate 4 hours. Under a UV light source, MRSAs visibly fluoresce bright orange. That's all there is to it!

Join the new age. For tremendous ease of use, speed, and time and money savings in fighting infection, use **BBL<sup>®</sup> Crystal<sup>™</sup> MRSA ID.**

Available now from your Becton Dickinson Microbiology Systems distributor.
