

# QUARTERLY REVIEWS OF BIOPHYSICS

---

---

VOLUME 10 1977

Editors: A. Engström [*Sweden*], A. Ehrenberg [*Sweden*],  
R. D. Keynes [*United Kingdom*],  
G. Felsenfeld [*U.S.A.*]

## Council of IUPAB

B. Chance [*U.S.A.*], *President*  
S. Ebashi [*Japan*] *Vice-President*  
P. G. Kostyuk [*U.S.S.R.*] *Vice-President*  
F. Lynen [*Fed. Rep. Germany*], *Hon Vice-President*  
R. D. Keynes [*United Kingdom*], *Secretary-General*

J. Coursaget [ <i>France</i> ]	D. C. Phillips [ <i>United Kingdom</i> ]
M. Errera [ <i>Belgium</i> ]	F. M. Richards [ <i>U.S.A.</i> ]
A. R. Gopal-Ayengar [ <i>India</i> ]	M. Sela [ <i>Israel</i> ]
V. S. Gurfinkel [ <i>USSR</i> ]	J. Tigyí [ <i>Hungary</i> ]
O. Maaløe [ <i>Denmark</i> ]	H. T. Witt [ <i>Fed. Rep. Germany</i> ]
M. Montal [ <i>Mexico</i> ]	K. Wuthrich [ <i>Switzerland</i> ]

Published for the International Union for  
Pure and Applied Biophysics

CAMBRIDGE UNIVERSITY PRESS  
CAMBRIDGE · LONDON · NEW YORK

PUBLISHED BY  
THE SYNDICS OF THE CAMBRIDGE UNIVERSITY PRESS

The Pitt Building, Trumpington Street, Cambridge CB2 1RP  
Bentley House, P.O. Box 92, 200 Euston Road, London NW1 2DB  
32 East 57th Street, New York, N.Y. 10022

# Contents

---

---

## No. 1. FEBRUARY 1977

- GERALD EHRENSTEIN and HAROLD LECAR. Electrically gated ionic channels in lipid bilayers 1
- E. A. PADLAN. Structural basis for the specificity of antibody-antigen reactions and structural mechanisms for the diversification of antigen-binding specificities 35
- H. WENNERSTRÖM and G. LINDBLOM. Biological and model membranes studied by nuclear magnetic resonance of spin one half nuclei 67
- News from IUPAB 97

## No. 2. MAY 1977

- THOMAS H. MOSS. A focus for biophysical research in energy problems 99
- CARL-GÖRAN HEDEN. Enzyme engineering and the anatomy of equilibrium technology 113
- NEVILLE R. KALLENBACH and HELEN M. BERMAN. RNA structure 137
- News from IUPAB 237

## No. 3. AUGUST 1977

- GEORGE NEMETHY and HAROLD A. SCHERAGA. Protein folding 239
- JOACHIM SEELIG. Deuterium magnetic resonance: theory and application to lipid membranes 353
- News from IUPAB 419

No. 4. NOVEMBER 1977

ARABELLA T. MORRIS and RAYMOND DWEK. Some recent applications of the use of paramagnetic centres to probe biological systems using nuclear magnetic resonance	421
G. G. KNEALE, J. P. BALDWIN and E. M. BRADBURY. Neutron scattering studies of biological macromolecules in solution	485
ALFRED GIERER. Physical aspects of tissue evagination and biological form	529
News from IUPAB	595

## INFORMATION FOR CONTRIBUTORS TO QUARTERLY REVIEWS OF BIOPHYSICS

1. *Quarterly Reviews of Biophysics* is the official journal of the International Union for Pure and Applied Biophysics. As such, its primary aim is to provide a forum for general and specialized communication between biophysicists working in different areas. This will normally be achieved by inviting authors who have made significant contributions to give a critical and readable account of recent progress in their special fields. Shorter and even controversial articles discussing topics of particular current interest will also be published.

2. Reviews should preferably be written in English. The style of presentation must be concise, with only key references.

3. Three copies of manuscripts are required. They should be typed in double spacing with a margin of 4 cm all round. The position of tables and illustrations should be indicated in the text. Tables and legends for illustrations should be typed on separate pages. A table of contents should be provided for printing at the head of the article.

4. In the text, the references should be to authors and year. When a paper cited has three or more authors the style Smith *et al.* (1973) should be used on all occasions. At the end of the paper, references should be listed alphabetically, with the full title of each paper, and the first and last pages. Abbreviations of journal titles should follow the latest edition of the *World List of Scientific Periodicals*. For example

BERNAL, J. D. (1967). *Origin of Life*. London: Weidenfeld and Nicolson.

EIGEN, M. (1968). New looks and outlooks on physical enzymology. *Q. Rev. Biophys.* 1, 3-33.

5. Drawings should be in Indian ink on tracing paper. They should be drawn roughly twice the size of the finished block. Explanations should as far as possible be placed in the legends. Lettering for photographs should either be on a duplicate print or on an accurately registered overlay.

6. The author will receive only one set of page proofs for correction. Fifty reprints of each review will be provided free of charge. Additional copies may be purchased.

---

# QUARTERLY REVIEWS OF BIOPHYSICS

---

Reviews on the following topics will appear in forthcoming issues:

The transfer function of the cochlea T. W. BARRETT

A comparison of X-ray small-angle scattering results to crystal structure analysis and other physical techniques in the field of biological macromolecules O. KRATKY and I. PILZ

The use of X-ray synchrotron radiation for structural research in biology H. B. STURHMANN
