

Introducing . . .

Protein Science

A Publication of the Protein Society

Editor-in-Chief: Hans Neurath
Associate Editors: Ralph A. Bradshaw, Tony E. Hugli, Louise N. Johnson, Rachel E. Klevit, Christopher T. Walsh
Editorial Consultant: David S. Eisenberg
Graphics Consultant: Jane S. Richardson

Coverage

This new monthly journal will serve as the international forum for original reports on proteins in the broadest sense. **Protein Science** (ISSN 0961-8368) will reflect the great diversity of this field, encompassing many research settings and methodologies, cutting across restrictive disciplinary lines and focusing on all "protein-centered" science. The wide scope of **Protein Science** will include the structure, function and biochemical significance of proteins, their role in molecular and cell biology, genetics and evolution, as well as their regulation and mechanism of action. All members of The Protein Society will receive the journal, but submission of papers is not restricted to members.

Featuring Kinemages! – Interactive Graphics Supplement

The kinemage is an exciting innovation in scientific communication. In addition to black-and-white figures and colour plates on the printed page, **Protein Science** will include kinemages (kinetic images) that can be viewed on common computers. This allows authors to explain the structure-related ideas in their research and gives the reader simple and open-ended access to explore these three-dimensional relationships.

Each subscriber to **Protein Science** will receive a diskette that contains kinemages illustrating the structures published in the journal, plus the *Mage* graphics program for viewing them.

Innovative Technology Fund

The Innovative Technology Fund of The Protein Society, sustained in part by the American Society for Biochemistry and Molecular Biology and the Biophysical Society, will support the publication of diskettes with the journal issue, electronic manuscript handling, and other initiatives.

Call for manuscripts

Pre-formatted submission diskettes with instructions for authors are available from the Editorial Office, where manuscripts should be sent: Hans Neurath, Editor-in-Chief, University of Washington, SJ-70 Seattle, WA 98195 USA,

The Protein Society members receive **Protein Science** as part of annual dues (ASBMB and Biophysical Society members may subscribe at special discounted rates through their societies). For information and membership application contact **The Protein Society**, 9650 Rockville Pike, Bethesda, MD 20814-3998, USA.

INSTRUCTIONS TO AUTHORS

1. *Quarterly Reviews of Biophysics* is the official journal of the International Union for Pure and Applied Biophysics. As such, its primary aim is to provide a forum for general and specialized communication between biophysicists working in different areas. This will normally be achieved by inviting authors who have made significant contributions to give a critical and readable account of recent progress in their special fields. Shorter and even controversial articles discussing topics of particular current interest will also be published. Suggestions for reviews can be made to the editors.

2. The style of presentation must be concise, with only key references.

3. Three copies of manuscripts are required. They should be typed in double spacing throughout, including the list of references, with a margin of 4 cm all round. The position of tables and illustrations should be indicated in the text. Tables and legends for illustrations should be typed on separate pages. A table of contents should be provided for printing at the head of the article. Chapter and section headings and the table of contents should conform to the style in any issue from volume 19 onwards.

4. In the text, the references should be to authors and year. When a paper cited has three or more authors the style Smith *et al.* (1973) should be used on all occasions. At the end of the paper, references should be listed alphabetically, with the full title of each paper, and the first and last pages. Abbreviations of journal titles should follow the *World List of Scientific Periodicals*. Authors should follow the example below for layout and punctuation:

BERNAL, J. D. (1967). *Origins of Life*. London: Weidenfeld and Nicolson.

EIGEN, M. (1968). New looks and outlooks on physical enzymology. *Q. Rev. Biophys.* **1**, 3–33.

SWENBERG, C. E. & GEACINTOV, N. E. (1973). Exciton interactions in organic solids. In *Organic Molecular Photophysics*, vol. 1 (ed. J. B. Birks), pp. 489–564. London: Wiley.

5. Drawings and photographs should be of the highest possible quality. The maximum size should be A4. Explanations should as far as possible be placed in the legends. Lettering for drawings and photographs should either be on a duplicate print or on an accurately registered overlay.

6. The author will receive only one set of page proofs for correction. Fifty reprints of each review will be provided free of charge. In the case of multiple authorship these proofs and offprints will be sent to the first-named author only. One hundred additional copies may be purchased if ordered at the time proofs are returned.

COPYING

This journal is registered with the Copyright Clearance Center, 27 Congress Street, Salem, Mass. 01970. Organizations in the USA who are also registered with C.C.C. may therefore copy material (beyond the limits permitted by sections 107 and 108 of US © law) subject to payment to C.C.C. of the per-copy fee of \$05.00. This consent does not extend to multiple copying for promotional or commercial purposes. Code 0033-5835/92 \$5.00+.00.

ISI Tear Sheet Service, 3501 Market Street, Philadelphia, Pennsylvania 19104, USA, is authorized to supply single copies of separate articles for private use only.

For all other use, permission must be sought from Cambridge or the American Branch of Cambridge University Press.

Quarterly Review of Biophysics is covered by relevant abstracting and indexing services including *Biological Abstracts*, *Chemical Abstracts*, *Current Awareness in Biological Science*, *Current Contents*, *Excerpta Medica* and *Index Medicus*.
