Bulletin of *Entomological Research*

journals.cambridge.org/ber

Aims and Scope

The aims of *Bulletin of Entomological Research* are to further our global knowledge of entomology through the generalisation of research findings rather than providing more entomological exceptions. *Bulletin* publishes high-quality and original research papers, 'critiques' and review articles concerning insects, mites, ticks or other arthropods of economic importance in agriculture, forestry, stored products, biological control, medicine, animal health and natural resource management. The scope of papers addresses the biology, ecology, behaviour, physiology and systematics of individuals and populations. This includes the interactions between species (plants, hosts for parasites, natural enemies and whole communities), novel methodological developments, including molecular biology, in an applied context. *Bulletin* does not publish the results of spray trials.

Bulletin of Entomological Research is published bimonthly by Cambridge University Press

Editor-in-Chief

Professor Bill Symondson

School of Biosciences, Cardiff University, Cardiff CF10 3TL, UK Email: entomology@cambridge.org

Subject Editors

Dr N. Agusti, IRTA, Spain

Entomological Research

Volume 101 Issue 5 October 2011

Research Papers H.Q. Thomas, F.G. Zalom and N.L. Nicola	
Laboratory studies of <i>Blattisocius keegani</i> (Fox) (Acari: Ascidae) reared on eggs of navel orangeworm: potential for biological control	499
M.E. Carew, S.E. Marshall and A.A. Hoffmann A combination of molecular and morphological approaches resolves species in the taxonomically difficult genus <i>Procladius</i> Skuse (Diptera: Chironomidae) despite high intra-specific morphological variation	505
B.A. Omondi, J. van den Berg, D. Masiga and F. Schulthess Phylogeographic structure of <i>Teretrius nigrescens</i> (Coleoptera: Histeridae) predator of the invasive post harvest pest <i>Prostephanus truncatus</i> (Coleoptera: Bostrichidae)	521
J.D. Charlwood, E.V.E. Tomás, P. Salgueiro, A. Egyir-Yawson, R.J. Pitts and J. Pinto Studies on the behaviour of peridomestic and endophagic M form <i>Anopheles gambiae</i> from a rice growing area of Ghana	533
J.I. Cook, S. Majeed, R. Ignell, J.A. Pickett, M.A. Birkett and J.G. Logan Enantiomeric selectivity in behavioural and electrophysiological responses of <i>Aedes aegypti</i> and <i>Culex quinquefasciatus</i> mosquitoes	541
S. Smith, T. Joss and A. Stow Successful development of microsatellite markers in a challenging species: the horizontal borer <i>Austroplatypus incompertus</i> (Coleoptera: Curculionidae)	551
T. Tscheulin, L. Neokosmidis, T. Petanidou and J. Settele Influence of landscape context on the abundance and diversity of bees in Mediterranean olive groves	557
R. Telles-Romero, J. Toledo, E. Hernández, J.L. Quintero-Fong and L. Cruz-López Effect of temperature on pupa development and sexual maturity of laboratory <i>Anastrepha obliqua</i> adults	565
C.A. Villagra, C.F. Pinto, M. Penna and H.M. Niemeyer Male wing fanning by the aphid parasitoid <i>Aphidius ervi</i> (Hymenoptera: Braconidae) produces a courtship song	573
J. Oakey, E. Harris, B. Pease, C. Jennings and K. McCubbin Differentiation of <i>Solenopsis invicta</i> social forms using high resolution melt PCR	581
M. Virgilio, T. Backeljau, R. Emeleme, J.L. Juakali and M. De Meyer A quantitative comparison of frugivorous tephritids (Diptera: Tephritidae) in tropical forests and rural areas of the Democratic Republic of Congo	591
D.B. Rivers, C. Thompson and R. Brogan Physiological trade-offs of forming maggot masses by necrophagous flies on vertebrate carrion	599
L. Tong, X. Yu and H. Liu Insect food for astronauts: gas exchange in silkworms fed on mulberry and lettuce and the nutritional value of these insects for human consumption during deep space flights	613

Publisher: Katy Christomanou

Bulletin of Entomological Research is an international journal published bimonthly by Cambridge University Press in February, April, June, August, October and December.

Subscription information:

The subscription rates for Volume 101, 2011 (6 issues): Print and electronic access: £862 (UK), (USA, Canada and Mexico US \$1669)

Electronic-only price: £672 (UK), (USA, Canada and Mexico US \$1307)

Print only: £808 (UK), (USA, Canada and Mexico US \$1557 The online edition is available at www.journals. cambridge.org/ber with free table of contents alert (upon registration).

Any **supplements** to this journal published in the course of the annual volume are normally supplied to subscribers at no extra charge.

Back Volumes are available. Please contact Cambridge University Press for further information.

Claims for non-receipt of journal issues will be considered on their merit and only if the claim is received within six months of publication. Replacement copies supplied after this date will be chargeable.

US Postmasters: please send address corrections to Bulletin of Entomological Research Cambridge University Press 100 Brook Hill Drive West Nyack New York 10994-2133 USA

Information for Authors

Manuscripts should be submitted online at http://www.editorialmanager.com/ber. New users should register before submitting a manuscript. Further information about submission is available from the publisher at the given address and is printed on the inside back cover.

Offprints: The author (or main author) of an accepted paper will receive a free PDF of their paper. Paper offprints are available for a fee and should be ordered at proof stage. No page charges are levied by this journal.

Copying: This journal is registered with the Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA 01923, USA. Organisations in the USA who are registered with the CCC may therefore copy material (beyond the limits permitted by sections 107 and 108 of USA copyright law) subject to payment to the CCC of the per copy fee of \$16.00. This consent does not extend to multiple copying for promotional or commercial purposes. Code 0007–4853/2011/\$16.00. Organisations authorised by the Copyright Licensing Agency may also copy material subject to the usual conditions.
