

# Instructions to authors

Detailed instructions to authors are available online here:  
[cambridge.org/core/journals/journal-of-glaciology/information](http://cambridge.org/core/journals/journal-of-glaciology/information)

## The *Journal of Glaciology* publishes two types of paper:

- articles on new glaciological findings and theories, or new instruments and methods, or up-to-date, coherent articles reviewing a glaciological subject
- letters of a topical nature, or comments on papers previously published in the Journal

## Papers submitted should be:

- of high scientific quality
- complete and clear
- substantially different from previously published work.

## Length

Papers should be concise. Lines and pages should be numbered. Papers more than 12 *Journal* pages in length should be cleared with the Chief Editor before submission (one *Journal* page = about 1000 words). Letters are limited to five *Journal* pages.

## Original submission

Submit your paper via the *Journal of Glaciology* online submission system at <https://mc.manuscriptcentral.com/jog>

## Review process

Your paper will be peer reviewed by at least two reviewers. The Scientific Editor will discuss any alterations required to the paper. The Associate Chief Editor will inform you if and when your paper is accepted for publication. Papers written in poor English will be rejected without review.

You will be sent a proof of your text and illustrations to check and correct (you will have to pay for any substantial alterations made at this stage).

## Final submission

The final accepted version of the paper should be in electronic format.

- Acceptable formats are
  - Text (including tables and figure captions) – Word, rtf or LaTeX (the IGS class file should be used; downloadable from the website). Please also supply a final PDF
  - Figures – ideally in tif or eps format (or otherwise in the format in which they were created)
- Responsibility for the accuracy of all data (including references) rests with the authors

## Supplementary material

The *Journal of Glaciology* accepts and makes available online appropriate supplementary material. It should be clearly named and labelled and provided in standard file formats.

## General points

- Title should be concise
- Abstract should be less than 200 words
- Papers should be divided into numbered sections with short section headings
- Use SI units
- Use internationally recognized systems of abbreviation
- Illustrations should
  - be one or two column widths: up to 85 mm or up to 178 mm
  - not be in boxes
  - use strong black lines (avoid tinting if possible)
  - use SI units in labels
  - use Optima, Arial or a similar sans serif font in labels
- TeX authors: please provide a pdf of the whole paper (text, tables, figures and captions) as well as the individual LaTeX and graphics files
- Equations should
  - be set in MathType or advanced equation editor
  - NOT be embedded as graphics in the text
- Tables should
  - be numbered in Arabic
  - be referred to in text (as Table 1 etc.)
  - NOT be submitted as illustrations
- All citations in text should include the author name(s) and the year of publication (e.g. Smith, 2010; Smith and Jones, 2012; Smith and others, 2014) and must have an entry in the reference list
- Reference lists should
  - be concise
  - be complete and accurate, including doi numbers
  - be provided in precise *Journal* format, including punctuation and emphasis (see past papers for style)
  - be arranged in alphabetical order by first author's surname
  - include works accepted but not published as 'in press'
  - not include personal communications, unpublished data or manuscripts in preparation or submitted for publication (these should be included in the text)

## Open Access and page charges

As a gold open access journal, the *Journal of Glaciology* is published without restriction and receives no subscription revenue. The costs of publication are instead covered by an article publishing charge (APC) levied upon the corresponding author, or his/her funding body or institution.

The APC for non-IGS members is £1,200 for a regular article and £600 for a letter.

The APC for IGS members is £1,080 for a regular article and £540 for a letter. The APCs quoted here are correct for 2016.

Upon acceptance for publication the corresponding author will be contacted by Rightslink on behalf of Cambridge University Press, who will administer the collection of the article publishing charge. At that stage the corresponding author can pay by credit card or arrange for an invoice to be issued to his/her funding body or institution. Selected authors may be granted an APC waiver by the IGS. In such cases, a waiver code shall be provided, which should be issued to Rightslink upon receipt of the payment.

# Journal of GLACIOLOGY

CONTENTS Vol 64 No 245 2018

349–361 Surface mass balance of small glaciers on James Ross Island, north-eastern Antarctic Peninsula, during 2009–2015

Zbyněk Engel, Kamil Láska, Daniel Nývlt, Zdeněk Stachon

362–376 Glacier calving observed with time-lapse imagery and tsunami waves at Glaciar Perito Moreno, Patagonia

Masahiro Minowa, Evgeny A. Podolskiy, Shin Sugiyama, Daiki Sakakibara, Pedro Skvarca

377–386 Spectral signatures of submicron scale light-absorbing impurities in snow and ice using hyperspectral microscopy

Anna Dal Farra, Susan Kaspari, James Beach, Thomas D. Bucheli, Michael Schaepman, Margit Schwikowski

387–396 Comparison between a multi-variate nudging method and the ensemble Kalman filter for sea-ice data assimilation

Sindre M. Fritzner, Rune G. Graversen, Keguang Wang, Kai H. Christensen

397–406 Glacier variations at Aru Co in western Tibet from 1971 to 2016 derived from remote-sensing data

Zhen Zhang, Shiyin Liu, Yong Zhang, Junfeng Wei, Zongli Jiang, Kunpeng Wu

407–416 Monitoring and simulation of hydrothermal conditions indicating the deteriorating stability of a perennially frozen moraine dam in the Himalayas

Xin Wang, Chengde Yang, Yanlin Zhang, Kailguo Chai, Shiyin Liu, Yongjian Ding, Junfeng Wei, Yong Zhang, Yongshun Han

417–431 The effect of buttressing on grounding line dynamics

Marianne Haseloff, Olga V. Sergienko

432–442 A quantitative comparison of microfossil extraction methods from ice cores

Sandra O. Brugger, E. Gobet, F. R. Schanz, O. Heiri, C. Schwörer, M. Sigl, M. Schwikowski, W. Tinner

443–449 Effect of compressive loading on first-year sea-ice permeability

Carl E. Renshaw, Aleksey Marchenko, Erland M. Schulson, Evgeny Karulin

450–464 Influence of recent warming and ice dynamics on glacier surface elevations in the Canadian High Arctic, 1995–2014

Colleen A. Mortimer, Martin Sharp, Wesley van Wychen

465–476 Interannual modulation of seasonal glacial velocity variations in the Eastern Karakoram detected by ALOS-1/2 data

Muhammad Usman, Masato Furuya

477–488 The effect of a Holocene climatic optimum on the evolution of the Greenland ice sheet during the last 10 kyr

Lisbeth T. Nielsen, Guðfinna Aðalgeirsdóttir, Vasileios Gkinis, Roman Nuterman, Christine S. Hvidberg

489–505 Climate on the equilibrium line altitudes of glaciers: theoretical background behind Ahlmann's P/T diagram

Atsumu Ohmura, Maxi Boettcher

506–516 Investigation of the ice surface albedo in the Tibetan Plateau lakes based on the field observation and MODIS products

Zhaoguo Li, Yinhuan Ao, Shihua Lyu, Jiahe Lang, Lijuan Wen, Victor Stepanenko, Xianhong Meng, Lin Zhao

Letter

517–521 The Canadian Ice Island Drift, Deterioration and Detection (CIID3) Database

Anna Crawford, Gregory Crocker, Derek Mueller, Luc Desjardins, Ron Saper, Tom Carrières
