UNIVERSITY PRESS

# VERIFY WITH CONFIDENCE

HEALTHMARK'S CLEARLY  
VISIBLE, OBJECTIVE TESTS OF  
CLEANING METHODS

## SCREEN WITH THE **NOW! TEST**

*Rapid Indicator of Gram-Negative bacteria*

Simply flush the lumen or swab the elevator mechanism of a flexible endoscope, such as a duodenoscope, and follow the procedure for gram-negative bacteria detection in less than 12 hours.

## AUDIT WITH THE **FLEXIBLE ENDOSCOPE SAMPLING KIT**

*For testing of duodenoscopes in compliance with FDA guidelines*

After flushing and brushing the lumen and elevator mechanism of a duodenoscope, simply follow the procedure to have the sample solution & brush heads quickly sent to Nelson Laboratories, the leader in independent testing of flexible endoscopes.

## MONITOR WITH **PROFORMANCE™ CLEANING VERIFICATION TOOLS**

*Perform weekly testing of all assets of the cleaning process*

Challenge the cleaning efficacy of the ultrasonic bath with SonoCheck™, the automated washer with TOSI®, pulse-flow lumen washers with LumCheck™, endoscope washers with FlexiCheck™ and more!

## CONTENTS

## SHEA Position Paper

- 1901** Improving antimicrobial use through better diagnosis: The relationship between diagnostic stewardship and antimicrobial stewardship

*Tsun Sheng N. Ku, Mayar Al Mohajer, James A. Newton, Marie H. Wilson, Elizabeth Monsees, Mary K. Hayden, Kevin Messacar, Jamie J. Kisgen, Daniel J. Diekema, Daniel J. Morgan, Costi D. Sifri and Valerie M. Vaughn*

## Commentary

- 1909** Brave new world: Leveraging artificial intelligence for advancing healthcare epidemiology, infection prevention, and antimicrobial stewardship

*Alexandre R. Marra, Priya Nori, Bradley J. Langford, Takaaki Kobayashi and Gonzalo Bearman*

## Original Article

- 1913** What US hospitals are doing to prevent common device-associated infections during the coronavirus disease 2019 (COVID-19) pandemic: Results from a national survey in the United States

*Sanjay Saint, M. Todd Greene, Sarah L. Krein, Karen E. Fowler, Kathleen A. Linder, David Ratz and Jennifer Meddings*

- 1920** Characteristics, costs, and outcomes associated with central-line-associated bloodstream infection and hospital-onset bacteremia and fungemia in US hospitals

*Kalvin C. Yu, Molly Jung and ChinEn*

- 1927** Healthcare providers consistently overestimate the diagnostic probability of ventilator-associated pneumonia

*Nathaniel S. Soper and Owen R. Albin*

- 1932** Implementing diagnostic stewardship to improve diagnosis of urinary tract infections across three medical centers: A qualitative assessment

*Kimberly C. Claeys, Lauren E. Weston, Lisa Pineles, Daniel J. Morgan and Sarah L. Krein*

- 1942** The impact of autocancellation of uncollected *Clostridioides difficile* specimens after 24 hours on reported healthcare-associated infections: A quality improvement intervention

*Madeline L. Berg, Carla Baxter, Ashley M. Ayres, Ashley Chung, Julie Slaughter, Andrew Bilderback, Kristian Feterik, Richard Ambrosino, Suzanne Wagester and Graham M. Snyder*

- 1948** *Clostridioides difficile* outbreak detection: Evaluation by ribotyping and whole-genome sequencing of a surveillance algorithm based on ward-specific cutoffs

*Jon E. Edman-Wallér, Michael Toepfer, Johan Karp, Kristina Rizzardi, Gunnar Jacobsson and Maria Werner*

- 1953** Healthcare worker perceptions surrounding *Staphylococcus aureus* transmission and prevention practices in the neonatal intensive care unit

*Samik S. Partha, Sara M. Malone, Melissa Bizzle, Geoffrey Ikpeama, Patrick J. Reich, Carly R. Schuetz and Stephanie A. Fritz*

- 1959** Epidemiology of patients harboring carbapenemase-producing bacteria and comparison with patients with detection of extended-spectrum beta-lactamase-producing Enterobacterales—A retrospective cohort study  
*Isabelle Vock, Lisandra Aguilar-Bultet, Daniel Goldenberger, Silvio Ragozzino, Sabine Kuster and Sarah Tschudin-Sutter*
- 1966** Early coronavirus disease 2019 (COVID-19) pandemic effects on individual-level risk for healthcare-associated infections in hospitalized patients  
*Trevor S. Farthing, Ashlan Jolley, Katelin B. Nickel, Cherie Hill, Dustin Stwalley, Kimberly A. Reske, Jennie H. Kwon, Margaret A. Olsen, Jason P. Burnham, Erik R. Dubberke, and Cristina Lanzas on behalf the CDC Modeling Infectious Disease in Healthcare Program*
- 1972** Risk factors for long coronavirus disease 2019 (long COVID) among healthcare personnel, Brazil, 2020–2022  
*Alexandre R. Marra, Vanderson Souza Sampaio, Mina Cintho Ozahata, Rafael Lopes, Anderson F. Brito, Marcelo Bragatte, Jorge Kalil, João Luiz Miraglia, Daniel Tavares Malheiro, Yang Guozhang, Vanessa Damazio Teich, Elivane da Silva Victor, João Renato Rebello Pinho, Adriana Cypriano, Laura Wanderly Vieira, Miria Polonio, Solange Miranda de Oliveira, Victória Catharina Volpe Ricardo, Aline Miho Maezato, Gustavo Yano Callado, Guilherme de Paula Pinto Schettino, Ketti Gleyzer de Oliveira, Rúbia Anita Ferraz Santana, Fernanda de Mello Malta, Deyvid Amgarten, Ana Laura Boechat, Takaaki Kobayashi, Eli Perencevich, Michael B. Edmond and Luiz Vicente Rizzo*
- 1979** Unfamiliar personal protective equipment: The role of routine practice and other factors affecting healthcare personnel doffing strategies  
*Emily E. Chasco, Jaqueline Pereira da Silva, Kimberly Dukes, Jure Baloh, Melissa Ward, Hugh P. Salehi, Heather Schacht Reisinger, Priyadarshini R. Pennathur and Loreen Herwaldt*
- 1987** Twice weekly polymerase chain reaction (PCR) surveillance swabs are not as effective as daily antigen testing for containment of severe acute respiratory coronavirus virus 2 (SARS-CoV-2) outbreaks: A modeling study based on real world data from a child and adolescent psychiatry clinic  
*Sara Grundel, Hans-Henning Flechtner, Jana Butzmann, Peter Benner and Achim J. Kaasch*
- 1995** A qualitative evaluation of frontline clinician perspectives toward antibiotic stewardship programs  
*Maria Tjilos, Mari-Lynn Drainoni, Shana A. B. Burrowes, Jorie M. Butler, Laura J. Damschroder, Matthew Bidwell Goetz, Karl Madaras-Kelly, Caitlin M. Reardon, Matthew H. Samore, Jincheng Shen, Edward A. Stenehjem, Yue Zhang and Tamar F. Barlam*
- 2002** CLinician and patient characteristics effect on Antimicrobial Stewardship Interventions (CLASI) study  
*Sara E. Ausman, Kristin C. Mara, Caitlin S. Brown, Kevin L. Epps, Kirstin Kooda, Julio Mendez and Christina G. Rivera*
- 2009** Socioeconomic differences in antibiotic use for common infections in pediatric urgent-care centers—A quasi-experimental study  
*Amanda C. Nedved, Brian R. Lee, Ann Wirtz, Elizabeth Monsees, Alaina Burns, Frances G. Turcotte Benedict and Rana E. El Feghaly*
- 2017** Antifungal stewardship in practice: Insights from a prospective audit and feedback program  
*Laura L. Bio, Yingjie Weng and Hayden T. Schwenk*
- 2022** A quality-improvement approach to urgent-care antibiotic stewardship for respiratory tract infections during the COVID-19 pandemic: Lessons learned  
*Sharon K. Ong'uti, Maja Artandi, Brooke Betts, Yingjie Weng, Manisha Desai, Christopher Lentz, Ian Nelligan, David R. Ha and Marisa K. Holubar*
- 2028** The use of telehealth-supported stewardship activities in acute-care and long-term care settings: An implementation effectiveness trial  
*Daniel J. Livorsi, Stacey Hockett Sherlock, Cassie Cunningham Goedken, Sandra Pratt, David A. Goodman, Kim C. Clarke, Hyunkeun Cho, Heather Schacht Reisinger and Eli N. Perencevich*

**2036** Efficacy of a continuously active disinfectant wipe on the environmental bioburden in the intensive care unit: A randomized controlled study  
*Gita Nadimpalli, J. Kristie Johnson, Laurence S. Magder, Abdolreza Haririan, Deborah Stevens, Anthony D. Harris and Lyndsay M. O'Hara*

**2044** An ethical framework adapted for infection prevention and control  
*Charlie Tan, Marianna Ofner, Heather L. Candon, Kevin Reel, Sally Bean, Adrienne K. Chan and Jerome A. Leis*

### Concise Communication

**2050** Revitalizing the infection prevention workforce with a fellowship program for underrepresented groups  
*Alison L. Nelson, Jacqueline Steiner, Diane Hanley, Tamar F. Barlam, Mari-Lynn Drainoni, Shana A. B. Burrowes, and Cassandra M. Pierre*

**2052** Microbiological characteristics, transmission routes, and mitigation measures in bronchoscope-associated investigations: Summary of Centers for Disease Control and Prevention (CDC) consultations, 2014–2022  
*Dipesh Solanky, Ana Cecilia Bardossy, Shannon Novosad, Heather Moulton-Meissner, Matthew Arduino and Kiran M. Perkins*

**2056** A bronchoscopy-associated pseudo-outbreak of *Mycobacterium chelonae* and *Mycobacterium mucogenicum* associated with contaminated ice machine water and ice  
*Drew W. Engers, Rajeev Swarup, Cheryl Morrin, Mica Blauw, Miles Selfridge, Pierre Gonyon, Janet E. Stout and Anurag N. Malani*

**2059** Whole-genome sequencing rule-out of suspected hospital-onset *Rhizopus* outbreaks  
*Victoria T. Chu, Saba Nafees, Eric Waltari, Nicole McNeil, Carolyn Caughell, Estella Sanchez-Guerrero, Lusha Wang, Kim Stanley, Gail Cunningham, Joan Wong, Maíra Phelps, Cristina M. Tato, Steve Miller, Joseph L. DeRisi, Deborah S. Yokoe, Lynn Ramirez-Avila and Charles R. Langelier*

**2062** A comparison of National Healthcare Safety Network surveillance definitions to physician review for central-line-associated bloodstream infections  
*Justin J. Kim, HeeEun Kang, Asif N. Khan, Rebecca Wang, Stephanie C. Casale, Caitlin M. Adams Barker, Michael S. Calderwood and Kathleen O. Stewart*

**2065** Challenges in defining surgical-site infections following hydrocephalus surgeries  
*Caitlin Naureckas, Amanda Bonebrake, Sangeeta Schroeder, Sandi K. Lam and Jeffrey S. Raskin*

**2068** Socioeconomic disparities in the prevalence of multidrug resistance in Enterobacterales  
*Dylan R. Brown, Heather I. Henderson, Laura Ruegsegger, James Moody and David van Duin*

**2071** The impact of the coronavirus disease 2019 (COVID-19) pandemic on a national project preventing healthcare-associated infections in intensive care units  
*Paula Tuma, José M. Vieira Júnior, Elenara Ribas, Karen C. C. D. Silva, Andrea K. F. Gushken, Ethel M. S. Torelly, Rafaela M. de Moura, Bruno M. Tavares, Cristiana M. Prandini, Paulo Borem, Pedro Delgado, Luciana Y. Ue, Claudia G. de Barros and Sebastian Vernal on behalf of the Saúde em Nossas Mãos Collaborative Study Group*

**2074** Coronavirus disease 2019 (COVID-19) infection prevention practices that exceed Centers for Disease Control and Prevention (CDC) guidance: Balancing extra caution against impediments to care  
*Shruti K. Gohil, Edward Septimus, Kenneth E. Sands, Eunice Jackie Blanchard, Julia Moody, Annabelle de St. Maurice, Deborah Yokoe, Jennie Kwon, Jonathan Grein, Stuart Cohen, Daniel Uslan, Milind Vasudev, Amarah Mauricio, Shannon Mabalot, Micaela H. Coady, Selsebil Sljivo, Kimberly Smith, Brandon Carver, Russell Poland, Jonathan Perlin, Richard Platt, Susan S. Huang and for the Centers for Disease Control and Prevention Epicenters Program*

- 2078** Use of a severe acute respiratory coronavirus virus 2 (SARS-CoV-2) strand-specific assay to evaluate for prolonged viral replication >20 days from illness onset  
*Jessica D. Ferguson, Ralph Tayyar, Gustavo Contreras, Melanie Kiener, Alex N. Zimmet, Caitlin A. Contag, Guillermo Rodriguez Nava, Lucy S. Tompkins, John Shepard, Ayelet Rosenthal, Aruna K. Subramanian, Benjamin A. Pinsky and Jorge L. Salinas*
- 2081** Hospital return-to-work practices for healthcare providers infected with severe acute respiratory coronavirus virus 2 (SARS-CoV-2)  
*Mark E. Rupp, Trevor C. Van Schooneveld, Richard Starlin, Jessica Quick, Graham M. Snyder, Catherine L. Passaretti, Michael P. Stevens and Kelly Cawcutt*
- 2085** Association between negative-pressure room utilization and hospital-acquired *Aspergillus* rates in patients with coronavirus disease 2019 (COVID-19) in two academic hospitals  
*Brett M. Biebelberg, Shangyuan Ye, Rui Wang, Michael Klompas and Chanu Rhee*
- 2089** Implementation of a novel color additive for bleach disinfectant wipes enhances cleaning performance in an academic medical center  
*Kevin Tyan and Jason Kang*
- 2092** Antibiotic use in Canadian neonatal intensive care units: a national survey for developing antimicrobial stewardship targets  
*Lindsay L. Richter, Matthew Sai-pong, Michael S. Dunn, Kyong-Soon Lee, Joan L. Robinson, Ashley Roberts, Nisha Thampi, Shikha Gupta-Bhatnagar, Prakesh S. Shah, Joseph Y. Ting and on behalf of the Canadian Neonatal Network Investigators*

#### Letter to the Editor

- 2096** Negative-pressure rooms and *Aspergillus* risk—Air balance alone is insufficient  
*Joshua K. Schaffzin, Nisha Thampi and Jessica Fullerton*
- 2098** The authors' reply to Schaffzin et al's Letter to the Editor  
*Brett Biebelberg, Michael Klompas and Chanu Rhee*
- 2099** Evaluation of ventilation during partial shutdown of a hospital heating, ventilation, and air conditioning system for maintenance  
*Jennifer L. Cadnum, Samir Memic, Elizabeth C. Eckstein and Curtis J. Donskey*
- 2100** Discordant antimicrobial susceptibility and polymerase chain reaction (PCR) testing in a *Klebsiella pneumoniae* isolate with a carbapenemase gene  
*Lucy S. Witt, Alex Page, Eileen M. Burd, Tugba Ozturk, David S. Weiss, Susan M. Ray, Sarah Satola and Lindsey B. Gottlieb*
- 2102** Viable mpox in the inanimate environmental and risk of transmission  
*Leonard A. Mermel*
- 2103** Environmental contamination of postmortem blood cultures detected by whole-genome sequencing surveillance  
*Alexander J. Sundermann, Marissa Griffith, Vatsala Rangachar Srinivasa, Deena Ereifej, Kady Waggle, Daria Van Tyne, Graham M. Snyder, A. William Pasculle, Tanner Bartholow, Lora Pless and Lee H. Harrison*
- 2105** Pseudo-outbreak of varicella-zoster virus associated with bronchoscopy in an intensive care unit  
*Andrej Tomašič, Janja Perme Hajdinjak, Matjaž Jereb, Tina Uršič, Miroslav Petrovec and Nina Grasselli Kmet*

## Erratum

**2108** The impact of the coronavirus disease 2019 (COVID-19) pandemic on a national project preventing healthcare-associated infections in intensive care units – ERRATUM

*Paula Tuma, José M. Vieira Júnior, Elenara Ribas, Karen C. C. D. Silva, Andrea K. F. Gushken, Ethel M. S. Torelly, Rafaela M. de Moura, Bruno M. Tavares, Cristiana M. Prandini, Paulo Borem, Pedro Delgado, Luciana Y. Ue, Claudia G. de Barros and Sebastian Vernal*

## Addendum

**2109** Manual and Automated Cleaning are Equally Effective for the Removal of Organic Contaminants From Laparoscopic Instruments – ADDENDUM

*Tamara Carolina de Camargo, Alda Graciele Claudio dos Santos Almeida, Camila Quartim de Moraes Bruna, Caroline Lopes Ciofi-Silva, Flávia Morais Gomes Pinto and Kazuko Uchikawa Graziano*

*An Official Publication of the Society for Healthcare Epidemiology of America*

*Infection Control & Hospital Epidemiology* (ISSN 0899-823X) is published monthly by Cambridge University Press, One Liberty Plaza, New York, NY 10006, USA.

## Editorial Office

Communications should be addressed to the Editor, *Infection Control & Hospital Epidemiology*, One Liberty Plaza, New York, NY 10006 (email: iche.managingeditor@cambridge.org). Contributors should consult the Instructions for Contributors, which is available at the journal's Web site.

## Advertising

Please direct advertising inquiries to M. J. Mrvica Associates, 2 West Taunton Avenue, Berlin, NJ 08009 (e-mail: mjmrvica@mrvica.com; telephone: 856-768-9360, fax: 856-753-0064). Publication of an advertisement in *Infection Control & Hospital Epidemiology* does not imply endorsement of its claims by the Society for Healthcare Epidemiology of America, by the Editor, or by Cambridge University Press.

## Permissions

Articles may be copied or otherwise reused without permission only to the extent permitted by Sections 107 and 108 of the US Copyright Law. Permission to copy articles for personal, internal, classroom, or library use may be obtained from the Copyright Clearance Center (<http://www.copyright.com>,

email: info@copyright.com). For all other uses, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale, please contact Cambridge University Press. Full details may be found at: [www.cambridge.org/about-us/rights-permissions](http://www.cambridge.org/about-us/rights-permissions).

## Subscriptions

The individual subscription prices for 2023 are: Print & Online: \$305; Online Only: \$236. Individuals have the option to order directly from Cambridge University Press. Institutional print + electronic and e-only subscriptions are available from Cambridge University Press and include unlimited online access; rates are tiered according to an institution's type and research output and may be reviewed at the journal's homepage on Cambridge Core: [cambridge.org/ICHE](http://cambridge.org/ICHE).

Please direct subscription inquiries and requests for back issues to Customer Services at Cambridge University Press, e-mail: [subscriptions\\_newyork@cambridge.org](mailto:subscriptions_newyork@cambridge.org) (USA, Canada, and Mexico) or [journals@cambridge.org](mailto:journals@cambridge.org) (outside of USA, Canada, and Mexico).

## About the cover:

Title: Nile's Joy, Horses & Hope, 2006

Beginning with volume 43 (January 2022), the cover of *Infection Control & Hospital Epidemiology* (ICHE) will feature art inspired by or reflective of topics within the scope of the journal and their impact on patients, healthcare personnel and our society. These topics include healthcare-associated infections, antimicrobial resistance, and healthcare epidemiology. The intent is to feature original artwork that has been created by individuals who have a personal connection to one or more of these topics through their clinical work, research, or experience as a patient or an affected patient's family member, friend or advocate. The goal is to provide readers with a visual reminder of the human impact of the topics addressed in the journal and the importance of the work being done by those who read or contribute to ICHE and by all who are trying to make healthcare safer through the elimination of healthcare-associated infections.

For more information about the ICHE cover and how to submit artwork for consideration for a future cover, please visit the ICHE website: <https://www.cambridge.org/core/journals/infection-control-and-hospital-epidemiology/front-covers>

**Artist:** Nile Moss (1990-2006)

**Medium:** Tissue paper, stained glass technique

### **Nile's parents, Carole and Ty Moss, spoke to ICHE about his artwork.**

**What was the inspiration for this artwork?** Nile began every morning with a loud announcement, "It's going to be such a great day!" At the end of the day, he would jump off the school bus and announce, "I had such a great day!" Nile's love of horses began very early in life thanks to his school's participation at a nearby therapeutic riding center. His horses brought him great joy and his faith gave him the hope and promise of a rainbow every day. This piece was inspired by the love Nile had for his horses, Tex and Clutch.

**Why is this work appropriate for the cover of *Infection Control & Hospital Epidemiology*?** Nile's art expression and techniques blossomed from August 2005 to April 2006 in his first high school art class. He returned home with this final creation on April 14, 2006. His life ended only days later when physicians failed to recognize the initial symptoms of sepsis caused by methicillin-resistant *Staphylococcus aureus* (MRSA) that he had acquired while receiving care in a local hospital. Nile's story represents the preventable harm that happens when people are unaware and unprepared to protect their loved ones and their patients. Patient safety begins with a robust bench of healthcare professionals, including healthcare epidemiologists, infection preventionists and antimicrobial stewards, that are given the knowledge, tools, training and support they need to do their work effectively. Our healthcare professionals deserve to feel joy and hope at the start of each new day, just as Nile did, and not doubt that their hard work saving lives is appreciated.

**What is your personnel connection to the content of ICHE?** When Nile died, our lives were changed forever. After researching the "why" and the "how," we decided to become a part of the solution to end preventable harm in honor of Nile. We became educated on the science of infection prevention to help inform and empower the public and educate healthcare professionals about what happens when healthcare facilities don't maintain a culture of safety and allow preventable healthcare-associated infections to occur. We celebrate his life every day by empowering the public and healthcare professionals with our story of prevention and action to end preventable healthcare harm.

*Carole and Ty Moss are the founders and Executive Directors of Nile's Project, a non-profit organization founded in 2007 to end unnecessary deaths due to preventable hospital-acquired infections. Nile's Project works with survivors, families, healthcare professionals, public health officials, and other advocacy groups to increase public awareness and advocate for changes that will make the healthcare system safer. For more information, visit [www.nilesproject.com](http://www.nilesproject.com).*
