UNIVERSITY OF LONDON

BRITISH POSTGRADUATE MEDICAL FEDERATION
THE INSTITUTE OF LARYNGOLOGY AND OTOLOGY
330-332 GRAY'S INN ROAD, LONDON, W.C.1.

5 November–18 November 1969

PRACTICAL REVISION CLASS for Part II D.L.O. students.

This is intended for those students who are well advanced in preparation for the examination and need only the opportunity for a final review. The class includes demonstrations of selected clinical cases and viva voce examinations.

THE UNIVERSITY OF IOWA, IOWA, U.S.A.

DEPARTMENT OF OTOLARYNGOLOGY AND MAXILLOFACIAL SURGERY

A course, *Rhinoplasty for the Beginner*, will be held at the University of Iowa, 3–8 November 1969. Limited to fourteen otolaryngologists, the course will deal with all aspects of Corrective Rhinoplasty and Septal Surgery. In addition to lectures and demonstrations, ample laboratory practice will be provided.

Guest faculty will include Jack R. Anderson, M.D., of New Orleans, Louisiana, and William K. Wright, M.D., of Houston, Texas.

The fee is \$300.

Applications should be sent to: Leslie Bernstein, M.D., B.D.S., Professor, Department of Otolaryngology and Maxillofacial Surgery, University of Iowa Medical Center, Iowa City, Iowa, U.S.A. 52240.

THE UNIVERSITY OF IOWA, IOWA CITY, IOWA

DEPARTMENT OF OTOLARYNGOLOGY AND MAXILLOFACIAL SURGERY

A course on the management of Maxillofacial Injuries will be held at the University of Iowa, 11–15 May 1970. Limited to fourteen otolaryngologists, preferably those engaged in academic practice, the course will deal with the immediate and delayed treatment of injuries to the soft tissues and underlying skeletal structures of the face, and with associated dental problems. In addition to lectures and demonstrations, ample laboratory practice will be given in methods of open and closed reduction, interdental fixation and suture techniques.

The fee is \$250.

Applications should be sent to: Leslie Bernstein, M.D., B.D.S., Professor, Department of Otolaryngology and Maxillofacial Surgery, University of Iowa, Iowa City, Iowa, U.S.A. 52240.

General notes

YALE UNIVERSITY SCHOOL OF MEDICINE

OTOLARYNGOLOGY SECTION—DEPARTMENT OF SURGERY

will present a special postgraduate course

SURGERY OF THE LARYNX AND PHARYNX

15-17 APRIL 1970

An intensive three-day postgraduate course designed for otolaryngologists will be offered at the Yale-New Haven Medical Center on 15, 16 and 17 April 1970.

The surgical treatment of benign and malignant lesions of the larynx and pharynx will be presented in lectures, motion picture films, and demonstrations. Registrants will perform various surgical procedures on the cadaver.

The course director is Dr. John A. Kirchner, professor of otolaryngology. In addition to faculty from the Yale University School of Medicine, Dr. Joseph H. Ogura and Dr. Max L. Som will serve as guest faculty.

Because of the nature of the instruction, the enrolment must be restricted to thirty certified otolaryngologists. Inquiries regarding fees and enrolment should be sent to: Office of Postgraduate Education, Yale University School of Medicine, 333 Cedar Street, New Haven, Connecticut 06510.

RESEARCH FELLOWSHIPS IN OTOLARYNGOLOGY

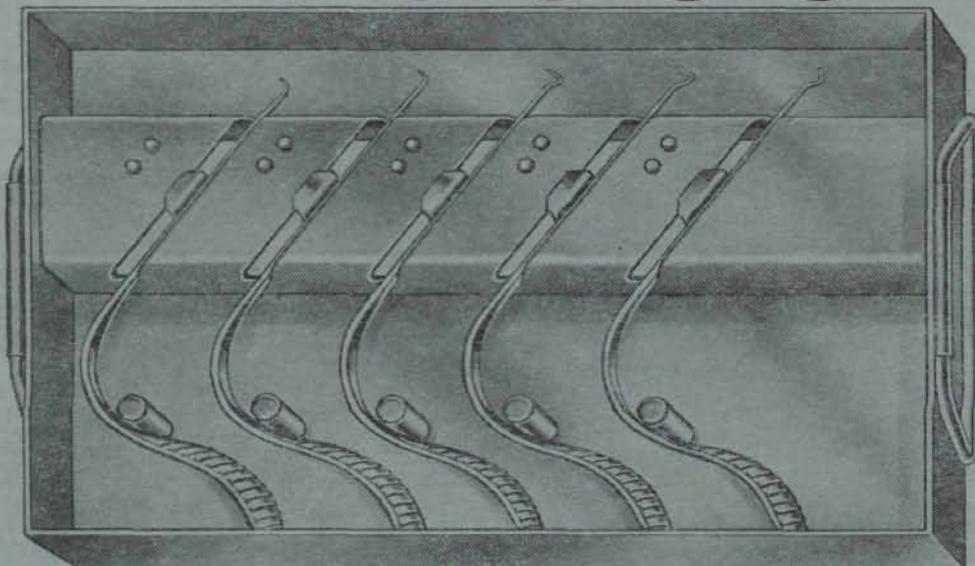

The Department of Otolaryngology (Chairman: Professor D. P. Bryce), University of Toronto, Canada, offers two Research Fellowships for the study of problems related to Laryngeal and Pharyngeal Cancer and Reconstructive Head and Neck Surgery. These Fellowships are tenable for one year as from 1 July 1970. Candidates should be of middle/senior registrar grade and have passed a Final Fellowship examination.

Salary is dependent upon qualifications and experience. Apply in writing, naming three referees to John M. Fredrickson, M.D., F.R.C.S. (C), F.A.C.S., Associate Professor, Medical Sciences Building, 1 King's College Circle, University of Toronto, Department of Otolaryngology, Room 7310, Toronto 5, Ontario, Canada.

DOWN'S

Instruments for Myringoplasty or Tympanoplasty

by Dr. J. Marquet (Antwerp)

These instruments were designed with a view to obtaining a perfect dissection of the epithelial layer of the tympanic remains as well as a perfect dissection of the skin of the meatal wall. This is done from within, working outwards, in order to conserve intact, the nourishing vessels which are required to invade the graft.

This particular technique, described by Dr. J. Marquet, for implantation of homografts of drums, is also valid for implantation of other materials, such as facia in myringoplasty or tympanoplasty.

- L 275-10 Set complete in case.
- L 275-11 1. Sickle knife right for incision of epithelial layer.
- L 275-12 2. Sickle knife left for incision of epithelial layer.
- L 275-13 3. Elevator for dissection of the epithelial layer.
- L 275-14 4. Elevator for dissection of the epithelial layer with slanting surface, bottom to top.
- L 275-15 5. Elevator for dissection of the epithelial layer with slanting surface, top to bottom.
- L 275-16 Case only for above.
