

QUARTERLY REVIEWS OF BIOPHYSICS

VOLUME 17 1984

Editors: A. Engström [*Sweden*], A. Ehrenberg [*Sweden*],
R. D. Keynes [*United Kingdom*],
G. Felsenfeld [*U.S.A.*]
W. Wüthrich [*Switzerland*]

Council of IUPAB

B. Pullman (France) *President*
L. D. Peachey (U.S.A.) *Vice-President*
K. Wüthrich (Switzerland) *Vice-President*
R. D. Keynes (U.K.) *Hon. Vice-President*
J. Tigy (Hungary) *Secretary General*

S. Asakura (Japan)	C. Hélène (France)
M. Baltscheffsky (Sweden)	G. R. Ivanitsky (U.S.S.R.)
M. Brunori (Italy)	K. C. Lin (Beijing, China)
L. C. M. De Maeyer (Belgium)	W. Reichardt (F.R.G.)
S. Estrada-O (Mexico)	R. Villegas (Venezuela)
W. Fuller (U.K.)	K. L. Wierchowski (Poland)

Published for the International Union for
Pure and Applied Biophysics

Cambridge University Press 1984

Published by the Press Syndicate of the University of Cambridge
The Pitt Building, Trumpington Street, Cambridge CB2 1RP
32 East 57th Street, New York, N.Y. 10022 USA
10 Stamford Road, Oakleigh, Melbourne 3166, Australia

Contents

No. 1. FEBRUARY 1984

- JOHN E. HEARST, STEPHEN T. ISAACS, DAVID KANNE,
HENRY RAPOPORT and KENNETH STRAUB. The
reaction of the psoralens with deoxyribonucleic acid 1
- MÅNS EHRENBERG and C. G. KURLAND. Costs of
accuracy determined by a maximal growth rate
constraint 45
- J. R. ALGER and R. G. SHULMAN. NMR studies of
enzymatic rates *in vitro* and *in vivo* by magnetization
transfer 83

No. 2. May 1984

- OLLE EDHOLM, LENNART NILSSON, OTTO BERG,
MÅNS EHRENBERG, FLORA CLAESENS, ASTRID
GRASLUND, BO JONSSON and OLLE TELEMAN.
Biomolecular dynamics: A report from a workshop in
Gysinge, Sweden, October 4-7 1982 125
- A. J. HOFF. Electron spin polarization of photosynthetic
reactants. 153

No. 3. AUGUST 1984

- ARIEH WARSHEL and STEPHEN T. RUSSELL.
Calculations of electrostatic interactions in biological
systems and in solutions 283

No. 4. NOVEMBER 1984

- C. R. WORTHINGTON. The structure of cornea 423
- JEFFRIES WYMAN. Linkage graphs. A study in the
thermodynamics of macromolecules 453

INFORMATION FOR CONTRIBUTORS TO QUARTERLY REVIEWS OF BIOPHYSICS

1. *Quarterly Reviews of Biophysics* is the official journal of the International Union for Pure and Applied Biophysics. As such, its primary aim is to provide a forum for general and specialized communication between biophysicists working in different areas. This will normally be achieved by inviting authors who have made significant contributions to give a critical and readable account of recent progress in their special fields. Shorter and even controversial articles discussing topics of particular current interest will also be published.

2. Reviews should preferably be written in English. The style of presentation must be concise, with only key references.

3. Three copies of manuscripts are required. They should be typed in double spacing with a margin of 4 cm all round. The position of tables and illustrations should be indicated in the text. Tables and legends for illustrations should be typed on separate pages. A table of contents should be provided for printing at the head of the article.

4. In the text, the references should be to authors and year. When a paper cited has three or more authors the style Smith *et al.* (1973) should be used on all occasions. At the end of the paper, references should be listed alphabetically, with the full title of each paper, and the first and last pages. Abbreviations of journal titles should follow the latest edition of the *World List of Scientific Periodicals*. For example

BERNAL, J. D. (1967). *Origin of Life*. London: Weidenfeld and Nicolson.

EIGEN, M. (1968). New looks and outlooks on physical enzymology. *Q. Rev. Biophys.* **1**, 3-33.

5. Drawings should be in Indian ink on tracing paper. They should be drawn roughly twice the size of the finished block. Explanations should as far as possible be placed in the legends. Lettering for photographs should either be on a duplicate print or on an accurately registered overlay.

6. The author will receive only one set of page proofs for correction. Fifty reprints of each review will be provided free of charge. Additional copies may be purchased.

QUARTERLY REVIEWS OF BIOPHYSICS

Reviews on the following topics will appear in forthcoming issues:

Perturbed angular correlation spectroscopy and its application to metal sites in proteins. Possibilities and limitations
