

INFORMATION FOR AUTHORS

The Bulletin of the Australian Mathematical Society aims at quick publication of original research in all branches of mathematics. The Editors receive more than three times as much material as can be published in the BULLETIN; many meritorious papers can, therefore, not be accepted. Authors are asked to avoid, as far as possible the use of mathematical symbols in the title. Manuscripts are accepted for review with the understanding that the same work is not concurrently submitted elsewhere.

To ensure speedy publication, editorial decisions on acceptance or otherwise are taken quickly, normally within a month of receipt of the paper. Papers are accepted only after a careful evaluation by the Editor and an Associate Editor or other expert in the field. As even minor revisions are generally not permitted, authors should read carefully all the details listed below. For a paper to be acceptable for publication, not only should it contain new and interesting results but also

- (i) the exposition should be clear and attractive;
- (ii) the manuscript should be in publishable form, without revision.

Authors should submit three clean, high quality copies to

The Editorial Office, Bulletin of the Australian Mathematical Society,
Department of Mathematics, The University of Queensland,
Queensland 4072, Australia.

Unless requested at the time, material submitted to the BULLETIN will usually not be returned.

EDITORIAL POLICY

1. References. Arrange references alphabetically (by surname of the first author) and cite them numerically in the text. Ensure the accuracy of the references: authors' names should appear as in the work quoted. Include in the list of references only those works cited, and avoid citing works which are "in preparation" or "submitted". Where the work cited is not readily accessible (for example, a preprint) a photocopy of the title page and relevant sections of the copy that you have used should be included with your submission.

2. Abstracts.

1. Each paper must include an abstract of not more than 200 words, which should contain a brief but informative summary of the contents of the paper, but no inessential details.
2. The abstract should be self-contained, but may refer to the title.
3. Specific references (by number) to a section, proposition, equation or bibliographical item should be avoided.

3. Subject Classification. Authors should include in their papers one or more classification numbers, following the 2000 Mathematics Subject Classification. Details of this scheme can be found in each Annual Index of Mathematical Reviews or on the web at <http://www.ams.org/msc>.

4. Abstracts of Ph.D. Theses. The Bulletin endeavours to publish abstracts of all accepted Australasian Ph.D. theses in mathematics. One restriction, however, is that the abstract must be received by the Editor within 6 months of the degree being approved.

5. Electronic Manuscripts. The Bulletin is produced using AMS-TEX . Authors who are able to do so are invited to prepare their manuscripts using TEX . (We accept Plain TEX , AMS-TEX or LATEX .) Hard copy only should be submitted for assessment, but if the paper is accepted the author will be asked to send the text on an IBM PC compatible diskette or via e-mail to ams@maths.uq.edu.au. Bulletin of the Australian Mathematical Society

Arc components in locally compact groups are Borel sets	1
Karl Heinrich Hofmann	
Norm of a linear combination of two operators on a Hilbert space	
Takahiko Nakazi and Takanori Yamamoto	9
Rigidity of Hilbert metrics	
Bruno Colbois and Patrick Verovic	23
Semi-orthogonal frame wavelets and frame multi-resolution analyses	
Hong Oh Kim, Rae Young Kim and Jae Kun Lim	35
CW decompositions of equivariant CW complexes	
M. Cencelj and N. Mramor Kosta	45
Functions invariant under the Bochner-Martinelli integral	
Jaesung Lee	55
On a multidimensional Volkenborn integral and higher order Bernoulli numbers	
Min-Soo Kim and Jin-Woo Son	59
Total torsion of closed lines of curvature	
Yong-An Qin and Shi-Jie Li	73
Linear maps on von Neumann algebras preserving zero products on tr-rank	
Jianlian Cui and Jinchuan Hou	79
Characterisations of orthogonality in certain Banach spaces	
Fathi B. Saidi	93
Another proof of the Browder-Göhde-Kirk theorem via ordering argument	
Jacek Jachymski	105
Another control condition in an iterative method for nonexpansive mappings	
Hong-Kun Xu	109
A note on the heat kernel on the Heisenberg group	
Adam Sikora and Jacek Zienkiewicz	115
Vanishing of the integral of the Hurwitz zeta function	
Kevin A. Broughan	121
Some weighted estimates for imaginary powers of Laplace operators	
Hendra Gunawan	129
Maximal (K, L)-free sets in $\mathbb{Z}/p\mathbb{Z}$ are arithmetic progressions	
Alain Plagne	137
Gröbner bases and products of coefficient rings	
Graham H. Norton and Ana Sălăgean	145
The Kunze-Stein phenomenon on the isometry group of a tree	
Alessandro Veca	153

ABSTRACTS OF AUSTRALASIAN Ph.D. THESES

Cuspidal modules of the finite general linear group	
I. Tulunay	175
