ERRATUM

M. Knapp and S. S. Kashenge

EFFECTS OF DIFFERENT NEEM FORMULATIONS ON THE TWOSPOTTED SPIDER MITE, *TETRANYCHUS URTICAE* KOCH, ON TOMATO (*LYCOPERSICON ESCULENTUM* MILL.)

The equation for calculating repellence, shown on page 3 of *Insect Science and Its Application*, Volume 23 Number 1, under the subheading "Repellence and Oviposition Deterrence" should read:

$$\frac{(b-a)}{b} * 100$$
