

## SUBSCRIPTION RATES

Subscription rates (post free) for volume 36 (1999) of the *Journal of Applied Probability* are as follows:

US\$232.50; \$A366.60; £141.00 for libraries and institutions;

US\$77.50; \$A122.20; £47.00 for individuals belonging to a recognised scientific society.

Members of the London Mathematical Society should apply direct to the Secretary of the Society for copies of the *Journal*.

Please send all enquiries to: Applied Probability, School of Mathematics and Statistics, The University, Sheffield S3 7RH, UK.

We can provide back issue prices on application. Cheques, money orders, etc. should be made out to APPLIED PROBABILITY. Payment is accepted in US, UK or Australian currency or by VISA or Mastercard (phone: +44 114 222 3922; fax: +44 114 272 9782).

## NOTES FOR CONTRIBUTORS

Papers published in the *Journal* are of two kinds:

- (1) *research papers* not exceeding 20 printed pages;
- (2) *short communications* of a few printed pages in the nature of notes or brief accounts of work in progress.

*Review papers, longer research papers and letters to the editor* are published in *Advances in Applied Probability*, a companion journal. (Note: Letters relating specifically to papers which have appeared in the *Journal of Applied Probability* will continue to appear in the *Journal*.)

The editors may publish accepted papers in either journal, according to the space available, in order to meet the 15-month deadline in publication referred to below.

## Submission of papers

Papers submitted to the Applied Probability journals are considered on the understanding that they have not been published previously and are not under consideration by another publication. Papers will not be reprinted without the written permission of the Trust. It is the policy not to accept for publication papers which cannot appear in print within 15 months of the date of receipt of the final version. Fifty reprints of each paper will be provided free; additional reprints are available at cost.

Papers should be written in English or French; papers in other languages may be accepted by the editors, but will appear (subject to the author's agreement) in English or French translation. Please supply *three* double-spaced hard copies, at least one of which should be printed on one side of the paper only. The paper should include: (1) a short abstract of approximately 4–10 lines giving a non-mathematical description of the subject matter and results; (2) list of keywords detailing the contents for the purpose of computerised information retrieval; (3) primary and secondary classifications according to the 1991 Mathematics Subject Classification, to be found in the 1990 Annual Index of *Mathematical Reviews*.

Authors are advised to consult *The Author's Guide to the Applied Probability Journals* when preparing papers for submission. A copy of this guide may be obtained free of charge from the Applied Probability Office. An updated version of the guide, with LATEX style files, can be obtained in electronic form on <http://www.shef.ac.uk/~apt> or on PC-compatible disk from the Applied Probability Office.

For efficiency in processing, authors are requested to send all submissions to the Applied Probability Office in Sheffield, rather than to individual editors. The address for all submissions is:

**Executive Editor, Applied Probability, School of Mathematics and Statistics,  
The University, Sheffield S3 7RH, UK.**

## COPYRIGHT

The copyright of all published papers shall be vested in the Trust. When a paper is accepted for publication, the Trust requests the author(s) to sign a form assigning copyright to the Trust. Failure to do this promptly may delay or prevent publication.

Authorisation to photocopy items for internal or personal use, or the internal or personal use of specific clients, is granted by the Applied Probability Trust for libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the base fee of \$00.70 per copy, plus .20 per page is paid directly to CCC, 222 Rosewood Drive, Danvers, MA 01923, USA. 0021-9002/99 \$00.70 + .20.

*Research Papers*

- 951 J. K. PERCUS, O. E. PERCUS, W. J. BRUNO AND D. C. TORNEY. Asymptotics of pooling design performance
- 965 RAÚL GOUET AND JAIME SAN MARTÍN. Partial orders and minimization of records in a sequence of independent random variables
- 974 BRUNO TUFFIN. Bounded normal approximation in simulations of highly reliable Markovian systems
- 987 ULRICH HERKENRATH. Generalized adaptive exponential smoothing of observations from an ergodic hidden Markov model
- 999 ANDRÁS TELCS AND NICHOLAS C. WORMALD. Branching and tree indexed random walks on fractals
- 1012 VALERI T. STEFANOV. On the occurrence of composite events and clusters of points
- 1019 ALEX NOVIKOV, VOLF FRISHLING AND NINO KORDZAKHIA. Approximations of boundary crossing probabilities for a Brownian motion
- 1031 HWAI-CHUNG HO AND WILLIAM P. McCORMICK. Asymptotic distribution of sum and maximum for Gaussian processes
- 1045 YIQIANG Q. ZHAO, WEI LI AND ATTAHIRU SULE ALFA. Duality results for block-structured transition matrices
- 1058 JUN CAI AND JOSÉ GARRIDO. A unified approach to the study of tail probabilities of compound distributions
- 1074 ALEXANDER V. GNEDIN. Sequential selection of an increasing subsequence from a sample of random size
- 1086 CARLOS F. BORGES AND CRAIG S. PETERS. Computing approximate stationary distributions for discrete Markov processes with banded infinitesimal generators
- 1101 OLLE HÄGGSTRÖM AND JOHAN JONASSON. Phase transition in the random triangle model
- 1116 SERIK SAGITOV. The general coalescent with asynchronous mergers of ancestral lines
- 1126 F. BIAGINI AND M. PRATELLI. Local risk minimization and numéraire
- 1140 LAURENCE DIEULLE. Reliability of a system with Poisson inspection times
- 1155 DAVID PERRY AND WOLFGANG STADJE. Heavy traffic analysis of a queueing system with bounded capacity for two types of customers
- 1167 CHRISTINE FRICKER, PHILIPPE ROBERT AND DANIELLE TIBI. On the rates of convergence of Erlang's model
- 1185 GER KOOLE, PANAYOTIS D. SPARAGGIS AND DON TOWSLEY. Minimizing response times and queue lengths in systems of parallel queues
- 1194 RAÚL FIERRO, SERVET MARTÍNEZ AND JAIME SAN MARTÍN. Limiting conditional and conditional invariant distributions for the Poisson process with negative drift

*Short Communications*

- 1210 G.O. ROBERTS. A note on acceptance rate criteria for CLTs for Metropolis–Hastings algorithms
- 1218 WEN-MING HONG AND ZENG-HU LI. A central limit theorem for super-Brownian motion with super-Brownian immigration
- 1225 R. M. HUGGINS AND I. V. BASAWA. Extensions of the bifurcating autoregressive model for cell lineage studies
- 1234 C. C. HEYDE. A risky asset model with strong dependence through fractal activity time
- 1240 RHONDA RICHTER. A note on losses in  $M/G/1/n$  queues
- 1244 OLIVIER PERRIN AND WENDY MEIRING. Identifiability for non-stationary spatial structure

*Letter to the Editor*

- 1251 EROL A. PEKÖZ. A note on reliability bounds via conditional inequalities
- 1255 Obituary: KLAUS MATTHES
- 1258 Index
