THE "UNIVERSITY OF CHICAGO SCIENCE SERIES"

Concrete evidence of specific scientific problems carried on and solved at the University of Chicago, are these fifteen small volumes. Each has been written with as little technical detail as is consistent with sound method. Bound uniformly in cloth, small 12mo.:

THE EVOLUTION OF SEX IN PLANTS.
By JOHN M. COULTER. 6s 3d net.

A sketch of the probable history of sexual reproduction in plants.

THE LIVING CYCLADS. By CHARLES JOSEPH CHAMBERLAIN. 7s 6d net.

Surviving remnants of a line reaching back into the Paleozoic age—their haunts, history, and problems.

THE STORY OF THE MAIZE PLANT.
By PAUL WEATHERWAX. 8s 9d net.

Discussion of the biological individuality of maize is accompanied by a brief note on the influence of corn upon ancient and modern American civilizations.

PROBLEMS OF FERTILIZATION. By FRANK R. LILLIE. 8s 9d net.

Concentrates on the moment of fertilization as the decisive event in the genesis of a new organism.

THE ORIGIN AND DEVELOPMENT OF THE NERVOUS SYSTEM FROM A PHYSIOLOGICAL VIEWPOINT. By CHARLES MANNING CHILD. 8s 9d net.

Establishes the existence of physiological continuity.

INDIVIDUALITY IN ORGANISMS. By CHARLES MANNING CHILD. 7s 6d net.

Deals with the nature of the unity and order in the organism.

THE BIOLOGY OF TWINS. By H. H. NEWMAN. 7s 6d net.

The first theory based on facts to explain this interesting phenomenon.

THE PHYSIOLOGY OF TWINNING. By H. H. NEWMAN. 8s 9d net.

Discusses all known types of one-egg twinning in the animal kingdom.

PROTOPLASMIC ACTION AND NERVOUS ACTION. By RALPH S. LILLIE. 15s net.

Concerned with the general physiology of stimulation processes.

THE ANTIQUITY OF DISEASE. By ROY L. MOODIE. 7s 6d net.

From the examination of fossil vertebrates and the bones of early man, Dr Moodie has constructed a picture of prehistoric pathological conditions.

FOOD POISONING. By EDWIN O. JORDAN. 6s 3d net.

A clear summary of our present knowledge of poisoning through foods.

THE ORIGIN OF THE EARTH. By THOMAS C. CHAMBERLIN. 10s net.

Traces the steps in the construction of a radically new view of the formation of the earth, based on a dynamic foundation. The inquiry has led from glacial geology to the field of cosmogony.

THE ELECTRON: Its Isolation and Measurement and the Determination of Some of Its Properties. By ROBERT A. MILLIKAN. 10s net.

A standard work brought completely up-to-date, and including even the Compton effect.

FINITE COLLINEATION GROUPS. By H. F. Blichfeldt. 7s 6d net.

An outline of all the principles of linear group theories.

ALGEBRAS AND THEIR ARITHMETICS. By LEONARD E. DICKSON. 11s 6d net.

Adopting an entirely new definition, Mr Dickson develops here a far-reaching theory of the arithmetic of any rational algebra.
