CONTENTS

	PAGE
Atkinson, R. d'E. On the capture of interstellar matter by stars. (With 1 Figure in the Text)	314
Band, W., Mo, W. W. and Hsü, Y. K. The influence of magnetization on the Benedicks homogeneous thermoelectric effect. (With 3 Figures in the Text) .	381
Best, E. On sets of fractional dimensions	152
Booth, F. and Wilson, A. H. The scattering of neutral mesons	446
Born, M. On the stability of crystal lattices. I	160
— and Fürth, R. The stability of crystal lattices. III. An attempt to calculate the tensile strength of a cubic lattice by purely static considerations . .	454
— and Rama Dhar Misra. On the stability of crystal lattices. IV	466
Burhop, E. H. S. The inner shell ionization of atoms by electron impact. (With 1 Figure in the Text.) Appendix by H. S. W. Massey	43
Chang, T. S. The azimuthal dependence of processes involving mesons	34
Coulson, C. A. On the calculation of the energy in unsaturated hydrocarbon molecules. (With 2 Figures in the Text)	201
— The charge distribution and dipole moment of the C—H bond	509
— and Rushbrooke, G. S. Note on the method of molecular orbitals. (With 5 Figures in the Text)	193
— — The thermodynamic derivation of Langmuir's isotherm. (With 2 Figures in the Text)	248
Curran, S. C. and Strothers, J. E. The radioactivity of the fluorine isotope of mass twenty. (With 1 Figure in the Text)	252
Dalzell, D. P. and Jeffreys, H. On the Heaviside operational calculus	267
Dean, W. R. Note on the slow motion of fluid. (With 2 Figures in the Text) .	300
Easterfield, T. E. The orders of products and commutators in prime-power groups	14
Feather, N. An application of the method of coincidence counting in a β -particle spectrograph of novel design. (With Plate I and 2 Figures in the Text) .	224
Fürth, R. and Born, M. The stability of crystal lattices. III. An attempt to calculate the tensile strength of a cubic lattice by purely static considerations .	454
Ganz, E. An attempt to measure the velocity of propagation of heat in liquid He II	127
Good, I. J. The approximate local monotony of measurable functions	9
Hardy, G. H. Notes on special systems of orthogonal functions (III): a system of orthogonal polynomials	1
Hoyle, F. and Lyttleton, R. A. Note on Dr Atkinson's paper	323
— — On the accretion of interstellar matter by stars	325
— — On the physical aspects of accretion by stars	424

	PAGE
Hsü, Y. K., Band, W. and Mo, W. W. The influence of magnetization on the Benedicks homogeneous thermoelectric effect. (With 3 Figures in the Text)	381
Ingham, A. E. On two classical lattice point problems	131
Jeffreys, H. and Dalzell, D. P. On the Heaviside operational calculus	267
Kara-Michailova, E. and Lea, D. E. The interpretation of ionization measurements in gases at high pressures. (With 7 Figures in the Text)	101
Krishnan, R. S. Deuteron bombardment of silver. (With 5 Figures in the Text)	500
— and Nahum, E. A. Deuteron bombardment of the heavy elements. I. Mercury, thallium and lead. (With 8 Figures in the Text)	490
Lea, D. E. and Kara-Michailova, E. The interpretation of ionization measurements in gases at high pressures. (With 7 Figures in the Text)	101
Lob, H. A note on Morley's trisector theorem	401
Lyons, R. J. A proof of a generalization of Gaskin's theorem	244
Lyttleton, R. A. and Hoyle, F. Note on Dr Atkinson's paper	323
— — On the accretion of interstellar matter by stars	325
— — On the physical aspects of accretion by stars	424
Ma, S. T. Photomagnetic disintegration and magnetic moment of the deuteron in the meson theory	351
— The electrostatic dipole moment of a nucleus in the meson theory	438
— Deviation from the Coulomb law for the proton	441
Mathisson, M. The variational equation of relativistic dynamics. (With 4 Figures in the Text)	331
Miller, A. R. The adsorption of dipoles. (With 4 Figures in the Text)	69
— Corrigendum. The adsorption of dipoles	242
Miller, J. C. P. On the criterion for oscillatory solutions of a linear differential equation of the second order	283
Milne-Thomson, L. M. Hydrodynamical images	246
Misra, R. D. On the stability of crystal lattices. II. (With 1 Figure in the Text)	173
— and Born, M. On the stability of crystal lattices. IV	466
Mo, W. W., Hsü, Y. K. and Band, W. The influence of magnetization on the Benedicks homogeneous thermoelectric effect. (With 3 Figures in the Text)	381
Moullin, E. B. Considerations of the effect of space-charge in the magnetron	94
Nahum, E. A. and Krishnan, R. S. Deuteron bombardment of the heavy elements. I. Mercury, thallium and lead. (With 8 Figures in the Text)	490
Pocklington, H. C. Rough measurement of high viscosities	507
Rankin, R. A. Contributions to the theory of Ramanujan's function $\tau(n)$ and similar arithmetic functions. III. A note on the sum function of the Fourier coefficients of integral modular forms	150
— The difference between consecutive prime numbers. II	255

Contents

vii

	PAGE
Reekie, J. The scattering of X-radiation by liquid helium II. (With 3 Figures in the Text)	236
Rees, D. On semi-groups	387
Roberts, J. K. The theory of the structure and formation of a certain type of immobile adsorbed film with an application to the adsorption of oxygen on tungsten. (With 7 Figures in the Text)	53
Robertson, H. P. The invariant theory of isotropic turbulence. (With 3 Figures in the Text)	209
Rushbrooke, G. S. and Coulson, C. A. The thermodynamic derivation of Langmuir's isotherm. (With 2 Figures in the Text)	248
— — Note on the method of molecular orbitals. (With 5 Figures in the Text)	193
Scott, D. B. Invariant groups associated with an algebraic surface	414
Shoenberg, D. Properties of some superconductors. (With 3 Figures in the Text)	84
Steen, S. W. P. Introduction to the theory of operators. V. Metric rings . .	139
Strothers, J. E. and Curran, S. C. The radioactivity of the fluorine isotope of mass twenty. (With 1 Figure in the Text)	252
Temperley, H. N. V. Paramagnetic hysteresis	79
Todd, J. A. The postulation of a multiple variety	27
Wilkes, M. V. A method of solving second order simultaneous linear differential equations using the Mallock machine	204
— Region formation in the ionosphere according to an attachment theory. (With 7 Figures in the Text)	479
Williams, E. J. The average number of electrons accompanying a cosmic-ray meson due to collisions of the meson with atomic electrons	183
Wilson, A. H. The calculation of processes involving mesons by matrix methods	363
— and Booth, F. The scattering of neutral mesons	446
Wilson, A. J. C. On the correction of lattice spacing for refraction. (With 3 Figures in the Text)	485
Woodcock, E. R. A class of fundamental $[n - 1]$ scrolls	288
PROCEEDINGS	511
BALANCE SHEET	513

DISCOVERY *in Physics*

The Cambridge Physical Tracts are up-to-date reports from research workers in fields where progress is particularly rapid and where a complete study is not yet possible.

1. NEGATIVE IONS by H. S. W. MASSEY, Ph.D.
6s. 6d. net
2. THE MOBILITY OF POSITIVE IONS IN GASES
by Professor A. M. TYNDALL, D.Sc., F.R.S. 6s. 6d. net
3. SUPERCONDUCTIVITY by D. SHOENBERG, Ph.D.
6s. 6d. net
4. ELECTRON OPTICS by the Research Staff of Electric
and Musical Industries Ltd., compiled and edited by OTTO
KLEMPERER. 6s. 6d. net
5. SEMI-CONDUCTORS AND METALS by A. H.
WILSON, M.A. 7s. 6d. net
6. COSMIC RAYS AND MESOTRONS by H. J. J.
BRADDICK. 5s. net
7. SOME PROBLEMS IN ADSORPTION by J. K.
ROBERTS. 7s. 6d. net
8. MAGNETISM AND VERY LOW TEMPERATURES
by H. B. G. CASIMIR. 6s. net
9. SURFACE TENSION AND THE SPREADING
OF LIQUIDS by R. S. BURDON. 7s. 6d. net
