Special sales and supplements

This journal accepts advertising and inserts. We also provide bulk reprints of suitable papers to meet teaching or promotional requirements. The journal also publishes supplementary material including conference proceedings on behalf of academic and corporate sponsors. Please contact Sarah Maddox at Cambridge University Press for further details (email: smaddox@cambridge.org).

Subscription information

Public Health Nutrition is an international journal published 12 times per year by Cambridge University Press on behalf of the Nutrition Society. The online edition is available at journals.cambridge.org/PHN, with free table of contents alert (upon registration).

Annual subscription rates

Volume 16, 2013 (12 issues):
Internet/print package: £886/\$1700 Americas only/€1420 EU only
Internet only: £675/\$1280 Americas only/€1420 EU only

Any supplements to this journal published in the course of the annual volume are normally supplied to subscribers at no extra charge.

Claims for non-receipt of journal issues will be considered on their merit and only if the claim is received within six months of publication. Replacement copies supplied after this date will be chargeable.

Advertising: The Nutrition Society is willing to include advertisements in its journals. However, it will retain the right to make decisions on which advertisements are acceptable and

which are not, and will not be obliged to give reasons to prospective advertisers for its decisions. The appearance of an advertisement in the Society's journals does not imply endorsement by the Society. For further details, please contact Cambridge University Press.

Back volumes will be available in due course. Please contact Cambridge University Press for further information.

Notes for Authors are available from the publisher at the given address and can be found inside the back cover.

Offprints: The author (or main author) of an accepted paper will receive a free PDF of their paper. Additional offprints are available for a fee and must be ordered at proof stage. **No page charges are levied by this journal.**

Copyright: As of 1 January 2001 the copyright of all articles submitted to *Public Health Nutrition* are retained by the authors or their institutions. For articles prior to this date permission for reproduction of any part of the journal (text, figures, tables or other matter) in any form (on paper, microfiche or electronically) should be sought directly from the Society, at: The Editorial Office, The Nutrition Society, 10 Cambridge Court, 210 Shepherds Bush Road, Hammersmith, London, W6 7NJ, UK.

Disclaimer: The information contained herein, including any expression of opinion and any projection or forecast, has been obtained from or is based upon sources believed by us to be reliable, but is not guaranteed as to accuracy or completeness. The information is supplied without obligation and on the understanding that any person who acts upon it or otherwise changes his/her position in reliance thereon does so entirely at his/her own risk. Neither the Society, nor Cambridge University Press accepts responsibility for any trade advertisement included in this publication.

This journal issue has been printed on FSC-certified paper and cover board. FSC is an independent, non-governmental, not-for-profit organization established to promote the responsible management of the world's forests. Please see www.fsc.org for information. Typeset by Macmillan India Limited, Bangalore, India and Printed in Europe by Bell and Bain, Glasgow.

Public Health Nutrition is covered in Science Citation Index Expanded (Web of Science), Current Contents, Agriculture, Biology & Environmental Sciences, Current Contents, Clinical Medicine, CAB ABSTRACTS[®], Global Health, Index Medicus[®] (MEDLINE[®]), EMBASE, Excerpta Medica, BIOSIS[®] Database and CINAHL[®] Database
Public Health Nutrition participates in the following initiatives: HINARI by WHO and AGORA by FAO.

Public Health Nutrition (PHN) provides a forum for the presentation of original research findings and high quality reviews of key topics, and for discussion of and debate on of current issues and controversies. It also publishes special issues on major topics of interest. Our field includes research, scholarship, and discussions on public health nutrition, that take a population, health promoting and preventive approach. Papers that do not have this emphasis may be directed to more appropriate journals. Potential contributors are encouraged to read the aims and scope of the journal, and to note and follow the guidelines set out below.

Content:

- **Original research findings and scientific reviews** are published as full papers usually less than 5000 words, including references.
- **Editorials** express the opinion of the journal, as represented by its central editorial team, on topics judged by them to be important. Editorials, including guest editorials, are usually co-ordinated and developed by the editorial team.
- **Position papers**, including declarations and other statements of policy, may be invited or unsolicited.
- **Invited commentaries and book reviews** are expressions of opinion on a topical subject. These are commissioned by the members of the editorial team.
- **Letters to the Editors** are usually in response to material published in *PHN*. Submissions are sent to the author for comment and, when possible, published together with the author's reply.

Submission: PHN operates an online submission and reviewing system (eJournalPress). All manuscripts must be submitted online at <http://phn.msubmit.net/>. If any difficulties are encountered, please contact the Publications Office at phn.edoffice@cambridge.org

Refereeing: Review articles and articles reporting original research are subject to external review by two or more referees who evaluate manuscripts based on their importance, relevance, and originality. Authors are asked to submit names and contact details (including email address) of up to four potential referees. All other contributions (editorials, position papers, invited commentaries, book reviews, and letters to the Editors) undergo an internal review process by at least two members of the editorial team. Invited commentaries and book reviews may also be checked externally as necessary to avoid technical errors and to improve salience.

Copyright: At the time of acceptance, authors will be asked to provide a completed copy of the 'Licence to Publish' (in lieu of copyright transfer), available at <https://www.nutritionociety.org/>. It is the author's responsibility to obtain written permission to reproduce any material (including text and figures) that has appeared in another publication.

Preparation of manuscripts: Please refer to the full Directions to Contributors on our website (<http://www.nutritionociety.org>). Manuscripts should be in clear and concise English, and spelling should follow the Oxford English Dictionary. For authors whose native tongue is not English, in-house editorial attention to their contributions will improve clarity. On acceptance, all contributions are subject to editorial amendment to conform to house style. Manuscripts should be prepared in a common word processing package (Word for Windows is preferred) in Times New Roman or other common typeface, prepared with double-spaced text, at least 2 cm margins, and page and line numbers. Standard abbreviations and SI units must be used.

Disclosure of financial support and any competing

interests. The submission must include a statement within an Acknowledgements section reporting any competing interests, all sources of funding, and the nature of the contribution of each author to the manuscript. If there are no competing interests, this must be stated. Authors are asked to provide this information during the submission process and should not include it as part of the manuscript to allow for double-blind reviewing.

Arrangement of papers:

1. **Title page** should include the article title, author(s), affiliation(s), up to eight keywords, one author identified for correspondence (with full postal address, telephone and fax numbers, and email address), and a running title of up to 45 characters. The title page should be submitted online as a separate cover letter, not as part of the manuscript, to enable double-blind reviewing.
2. **Abstract** should be structured, usually using the following internal headings: Objective, Design, Setting, Subjects, Results, Conclusions. Abstracts should be intelligible without reference to text or figures and should not exceed 250 words.
3. **Text** should be divided under headings (typically to include Introduction, Methods, Results, Discussion and Conclusions), and sub-headings as appropriate. Conclusions should include recommendations that derive from the research and that are concrete, feasible, and potentially effective. Emphasising that more research is needed is usually not necessary unless there is specific reason to say so. All submissions must include a statement that the research was conducted in accordance with guidelines laid down by the Declaration of Helsinki and approved by an ethics review committee.
4. **Acknowledgements** (sources of funding, competing interests declaration, authorship responsibilities, acknowledgements) should be provided during the submission process, not as part of the manuscript.
5. **References** should be in Vancouver style. Please refer to the full Directions to Contributors.
6. **Tables** should be reduced to the simplest form and should not be used where text or figures give the same information. Each table must be accompanied by a clear and concise caption that is comprehensible without reference to the text. Longer tables may be published online only.
7. **Figures** should be numbered, and legends should be provided. Each figure, with its legend, should be comprehensible without reference to the text and include definitions of abbreviations.

Proofs: Correspondence and proofs for correction will be emailed to the first named author unless otherwise indicated. The author will receive a PDF proof for checking. It is important that proofs be returned promptly. Authors may be charged for any alterations in excess of 10% of original setting.

Offprints: The corresponding author will receive a PDF of the published paper free of charge. Offprints are available to purchase and must be ordered before publication.

Editorial

Vitamin D in public health nutrition
MP Bonham and C Lamberg-Allardt 717

HOT TOPIC – Public health nutrition aspects of vitamin D

Adequacy of vitamin D intakes in children and teenagers from the base diet, fortified foods and supplements
LJ Black, J Walton, A Flynn and M Kiely 721

Predictors of vitamin D deficiency and insufficiency in adult Bahrainis: a cross-sectional study
J Golbahar, N Al-Saffar, DA Diab, S Al-Othman, A Darwish and G Al-Kafaji 732

Can a questionnaire predict vitamin D status in postmenopausal women?
AC Nabak, RE Johnson, NS Keuler and KE Hansen 739

Reliability of self-reported sun exposure in Canadian women and estimation of lifetime exposure to vitamin D from sun and diet
LS Cook, BL Moon, Y Dong and HK Neilson 747

Vitamin D intakes of adults differ by income, gender and race/ethnicity in the USA, 2007 to 2010
CE Moore, JD Radcliffe and Y Liu 756

Risk factors for low vitamin D status in Korean adolescents: the Korea National Health and Nutrition Examination Survey (KNHANES) 2008-2009
YA Lee, HY Kim, H Hong, JY Kim, HJ Kwon, CH Shin and SW Yang 764

UV and dietary predictors of serum 25-hydroxyvitamin D concentrations among young shift-working nurses and implications for bone density and skin cancer
SC Wallingford, G Jones, LC Kobayashi, A Grundy, Q Miao, J Tranmer and KJ Aronson 772

Association between serum 25-hydroxyvitamin D concentration and symptoms of respiratory tract infection in a Norwegian population: the Tromsø Study
S Robertsen, G Grimnes and H Melbye 780

Association of vitamin D insufficiency with adiposity and metabolic disorders in Brazilian adolescents
RMS Oliveira, JF Novaes, LM Azeredo, APC Cândido and ICG Leite 787

Inverse relationship between vitamin D status and insulin resistance and the risk of impaired fasting glucose in Korean children and adolescents: the Korean National Health and Nutrition Examination Survey (KNHANES) 2009-2010
SJ Chung, YA Lee, H Hong, MJ Kang, HJ Kwon, CH Shin and SW Yang 795

Vitamin D status and its relationship with metabolic syndrome risk factors among adolescent girls in Boukan, Iran
M Rafraf, SK Hasanabad and MA Jafarabadi 803

Use of vitamin D supplements during infancy in an international feeding trial
E Lehtonen, A Ormiston, A Nucci, D Cuthbertson, S Sorkio, M Hyytinen, K Alahuhta, C Berseth, M Salonen, S Taback, M Franciscus, T González-Frutos, TE Korhonen, ML Lawson, DJ Becker, JP Krischer, M Knip, SM Virtanen and TRIGR Investigators 810

Early-life vitamin D deficiency and childhood-onset coeliac disease
P Tanpowpong and CA Camargo Jr 823

Association of 25-hydroxyvitamin D with Hb and lead in children: a Chinese population-based study
L Chang, X Liu, H Shi, W Dai, H Wang and Y Jiang 827

Is vitamin D status associated with open-angle glaucoma? A cross-sectional study from South Korea
TK Yoo, E Oh and S Hong 833

Predicted vitamin D status and incidence of tooth loss and periodontitis
M Jimenez, E Giovannucci, EK Kaye, KJ Joshipura and T Dietrich 844

Assessment and methodology

BMR in a Brazilian adult probability sample: the Nutrition, Physical Activity and Health Survey
LA Anjos, V Wahrlich and MTL Vasconcellos 853

Accuracy and adequacy of waist circumference cut-off points currently recommended in Brazilian adults
CA Vianna, R da Silva Linhares, RM Bielemann, EC Machado, DA González-Chica, AM Matijasevich, DP Gigante and I da Silva dos Santos 861

Predicting percentage body fat through waist-to-height ratio (WtHR) in Spanish schoolchildren
MD Marrodán, JR Martínez Álvarez, MG-M de Espinosa, MM Carmenate, N López-Ejeda, MD Cabañas, JL Pacheco, MS Mesa, JF Romero-Collazos, C Prado, A Villarino 870

Improving measurement in nutrition literacy research using Rasch modelling: examining construct validity of stage-specific 'critical nutrition literacy' scales
Ø Guttersrud, JØ Dalane and S Pettersen 877

Epidemiology

A study on body-weight perception, future intention and weight-management behaviour among normal-weight, overweight and obese women in India
P Agrawal, K Gupta, V Mishra and S Agrawal 884

Is breakfast skipping associated with physical activity among US adolescents? A cross-sectional study of adolescents aged 12–19 years, National Health and Nutrition Examination Survey (NHANES)
JE Lyerly, LR Huber, J Warren-Findlow, EF Racine and J Dmochowski 896

Nutrition and health

The association of breakfast skipping and television viewing at breakfast with weight status among parents of 10–12-year-olds in eight European countries; the ENERGY (European Energy balance Research to prevent excessive weight Gain among Youth) cross-sectional study
HB Bjørnarå, FN Vik, J Brug, Y Manios, I De Bourdeaudhuij, N Jan, L Maes, LA Moreno, A Dösselger and E Bere 906

Eating location is associated with the nutritional quality of the diet in Norwegian adults
JB Myhre, EB Løken, M Wandel and LF Andersen 915

Fast-food menu offerings vary in dietary quality, but are consistently poor
SI Kirkpatrick, J Reedy, LL Kahle, JL Harris, P Ohri-Vachaspati and SM Krebs-Smith 924

Binge eating in adults: prevalence and association with obesity, poor self-rated health status and body dissatisfaction
GVA de França, DP Gigante and MTA Olinto 932

Interventions

Dietary diversification for prevention of anaemia among women of childbearing age from rural India
S Rao, S Joshi, P Bhide, B Puranik and K Asawari 939

Promotion of exclusive breast-feeding at scale within routine health services: impact of breast-feeding counselling training for community health workers in Recife, Brazil
SB Coutinho, PIC Lira, MC Lima, PG Frias, SH Eickmann and A Ashworth 948
