

Paleobiology

VOLUME 49 | ISSUE 1 | 2023

Featured Article

Automatic taxonomic identification based on the Fossil Image Dataset (>415,000 images) and deep convolutional neural networks

Xiaokang Liu, Shouyi Jiang, Rui Wu, Wenchao Shu, Jie Hou, Yongfang Sun, Jiarui Sun, Daoliang Chu, Yuyang Wu and Haijun Song

1

Articles

Relative species abundance and population densities of the past: developing multispecies occupancy models for fossil data

Trond Reitan, Torbjørn H. Ergon and Lee Hsiang Liow

23

Dispersals from the West Tethys as the source of the Indo-West Pacific diversity hotspot in comatulid crinoids

James G. Saulsbury and Tomasz K. Baumiller

39

A test of Bergmann's rule in the Early Triassic: latitude, body size, and sampling in *Lystrosaurus*

Zoe T. Kulik and Christian A. Sidor

53

Interpretation of fossil embryos requires reasonable assessment of developmental age

D. Charles Deeming and Martin Kundrát

68

Small but mighty: how overlooked small species maintain community structure through middle Eocene climate change

L. E. Kearns, S. M. Bohaty, K. M. Edgar and T. H. G. Ezard

77

The effect of siliceous sponge deposition on Permian paleocommunity structure

Zackery P. Wistort and Kathleen A. Ritterbush

99

Reassessing growth and mortality estimates for the Ordovician trilobite *Triarthrus eatoni*

Daniel Pauly and James D. Holmes

120

Hydrodynamic trade-offs in potential swimming efficiency of planispiral ammonoids

Kathleen Anita Ritterbush and Nicholas Hebdon

131

Geographic and temporal morphological stasis in the latest Cretaceous ammonoid *Discoscaphites iris* from the U.S. Gulf and Atlantic Coastal Plains

James D. Witts, Corinne E. Myers, Matthew P. Garb, Kayla M. Irizarry, Ekaterina Larina, Anastasia Rashkova and Neil H. Landman

153

Changing diets over time: knock-on effects of marine megafauna overexploitation on their competitors in the southwestern Atlantic Ocean

Maria Bas, Angélica M. Tivoli, Ivan Briz i Godino, Mónica Salemme, Fernando Santiago, Juan Bautista Belardi, Florencia Borella, Damián G. Vales, Enrique A. Crespo and Luis Cardona

Editor-in-Chief

James Crampton, Victoria University of Wellington | Te Herenga Waka, New Zealand

Editors

Kevin Boyce, Stanford University, USA

Nadia Fröbisch, Museum für Naturkunde, Germany

Melanie Hopkins, American Museum of Natural History, USA

Erin Saupe, University of Oxford, UK

Managing Editor

Jessica Kastigar, Cincinnati, OH, USA

Associate Editors

Nicolás Campione, University of New England, Australia

Laurel Collins, Florida International University, USA

Matt Friedman, University of Michigan, USA

John Huntley, University of Missouri, USA

Lee Hsiang Liow, University of Oslo, Norway

Cynthia Looy, University of California Berkeley, USA

Caroline Strömberg, University of Washington, USA

Adam Tomasovich, Slovak Academy of Sciences, Slovak Republic

Rachel Warnock, Friedrich-Alexander-Universität Erlangen-Nürnberg, Germany

Information about editors and editorial board members correct as of 1st January 2023. For the latest information please see <https://www.cambridge.org/core/journals/paleobiology/information/editorial-board>

The Patrons Fund

The Patrons Fund was established to broaden the basis of financial support for Paleobiology and thus to encourage paleontological publication.

To become a Patron, send a check payable to Paleobiology to:

Aims & Scope

Paleobiology publishes original contributions of any length (but normally 10-50 manuscript pages) dealing with any aspect of biological paleontology. Emphasis is placed on biological or paleobiological processes and patterns, including macroevolution, extinction, diversification, speciation, functional morphology, bio-geography, phylogeny, paleoecology, molecular paleontology, taphonomy, natural selection and patterns of variation, abundance, and distribution in space and time, among others. Taxonomic papers are welcome if they have significant and broad applications. Papers concerning research on recent organisms and systems are appropriate if they are of particular interest to paleontologists. Papers should typically interest readers from more than one specialty. Proposals for symposium volumes should be discussed in advance with the editors.

The Paleontological Society

The Paleontological Society is an international nonprofit organization devoted exclusively to the advancement of the science of paleontology: invertebrate and vertebrate paleontology, micropaleontology, and paleobotany. The Society was founded in 1908 in Baltimore, Maryland, and was incorporated in April 1968 in the District of Columbia. The Society has several membership categories, including regular, student, and retired. Members, representing 40 countries, consist of professional paleontologists, academicians, science editors, earth-science teachers, museum specialists, and undergraduate and graduate students and post doctoral scholars, as well as avocational paleontologists.
