Bulletin of Entomological Research

journals.cambridge.org/ber

Aims and Scope

Established in 1910, the internationally recognised *Bulletin of Entomological Research* aims to further global knowledge of entomology through the generalisation of research findings rather than providing more entomological exceptions. The *Bulletin* publishes high quality and original research papers, 'critiques' and review articles concerning insects or other arthropods of economic importance in agriculture, forestry, stored products, biological control, medicine, animal health and natural resource management. The scope of papers addresses the biology, ecology, behaviour, physiology and systematics of individuals and populations, with a particular emphasis upon the major current and emerging pests of agriculture, horticulture and forestry, and vectors of human and animal diseases. This includes the interactions between species (plants, hosts for parasites, natural enemies and whole communities), novel methodological developments, including molecular biology, in an applied context. The *Bulletin* does not publish the results of pesticide testing or traditional taxonomic revisions.

Bulletin of Entomological Research is published bimonthly by
Cambridge University Press

Research Papers

P.A. Eliopoulos, A. Kapranas, E.G. Givropoulou and I.C.W. Hardy Reproductive efficiency of the bethylid wasp <i>Cephalonomia tarsalis</i> : the influences of spatial structure and host density	139
T.T. Zhang, G.C. Zhang, F.F. Zeng, C.Y. Liu and J.J. Mao Insulin-like peptides regulate vitellogenesis and oviposition in the green lacewing, <i>Chrysopa septempunctata</i>	148
I. Juric, W. Salzburger and O. Balmer Spread and global population structure of the diamondback moth <i>Plutella xylostella</i> (Lepidoptera: Plutellidae) and its larval parasitoids <i>Diadegma semicleausum</i> and <i>Diadegma fenestrale</i> (Hymenoptera: Ichneumonidae) based on mtDNA	155
K. Kawazu, W. Sugeno, A. Mochizuki and S. Nakamura Polyandry increases reproductive performance but does not decrease survival in female <i>Brontispa longissima</i>	165
G.H. Baker and C.R. Tann Long-term changes in the numbers of <i>Helicoverpa punctigera</i> (Lepidoptera: Noctuidae) in a cotton production landscape in northern New South Wales, Australia	174
G.H. Baker and C.R. Tann Broad-scale suppression of cotton bollworm, <i>Helicoverpa armigera</i> (Lepidoptera: Noctuidae), associated with Bt cotton crops in Northern New South Wales, Australia	188
D.B. Silva, V.H.P. Bueno, F.J. Calvo and J.C. van Lenteren Do nymphs and adults of three Neotropical zoophytophagous mirids damage leaves and fruits of tomato?	200
A. Łukowski, M.J. Giertych, U. Walczak, E. Baraniak and P. Karolewski Light conditions affect the performance of <i>Yponomeuta evonymellus</i> on its native host <i>Prunus padus</i> and the alien <i>Prunus serotina</i>	208
S.E. Samri, M. Baz, I. Ghalbane, S. El Messoussi, A. Zitouni, A. El Meziane and M. Barakate Insecticidal activity of a Moroccan strain of <i>Streptomyces phaeochromogenes</i> LD-37 on larvae, pupae and adults of the Mediterranean fruit fly, <i>Ceratitis capitata</i> (Diptera: Tephritidae)	217
S. Fischer, M.S. De Majo, L. Quiroga, M. Paez and N. Schweigmann Long-term spatio-temporal dynamics of the mosquito <i>Aedes aegypti</i> in temperate Argentina	225
G. Zhu, L. Pan, Y. Zhao, X. Zhang, F. Wang, Y. Yu, W. Fan, Q. Liu, S. Zhang and M. Li Chemical investigations of volatile kairomones produced by <i>Hyphantria cunea</i> (Drury), a host of the parasitoid <i>Chouioia cunea</i> Yang	234
N.P. Havill, J. Elkinton, J.C. Andersen, S.B. Hagen, Hannah J. Broadley, G.J. Boettner and A. Caccone Asymmetric hybridization between non-native winter moth, <i>Operophtera brumata</i> (Lepidoptera: Geometridae), and native Bruce spanworm, <i>Operophtera bruceata</i> , in the Northeastern United States, assessed with novel microsatellites and SNPs	241
Z. Shi, H. Liang and Y. Hou Functional analysis of a NF-κB transcription factor in the immune defense of Oriental fruit fly, <i>Bactrocera dorsalis</i> Hendel (Diptera: Tephritidae)	251
A.N. Laws and A. Joern Density mediates grasshopper performance in response to temperature manipulation and spider predation in tallgrass prairie	261
Y. Zheng, R.X. Wu, S. Dorn and M.H. Chen Diversity of tortricid moths in apple orchards: evidence for a cryptic species of <i>Grapholita</i> (Lepidoptera: Tortricidae) from China	268

Bulletin of Entomological Research is an international journal published bimonthly by Cambridge University Press in February, April, June, August, October and December.

Subscription information:

The subscription rates for Volume 107, 2017 (6 issues):
Print and electronic access: £1445 (UK), (USA, Canada and Mexico US \$2458)
Electronic-only price: £1072 (UK), (USA, Canada and Mexico US \$1824)
The online edition is available at www.journals.cambridge.org/ber with free table of contents alert (upon registration).

Any **supplements** to this journal published in the course of the annual volume are normally supplied to subscribers at no extra charge.

Back Volumes are available. Please contact Cambridge University Press for further information.

Claims for non-receipt of journal issues will be considered on their merit and only if the claim is received within six months of publication. Replacement copies supplied after this date will be chargeable.

US Postmasters: please send address corrections to Bulletin of Entomological Research Cambridge University Press 1 Liberty Plaza, Floor 20 New York NY 10006 USA

Information for Authors

Manuscripts should be submitted online at <http://www.editorialmanager.com/ber>. New users should register before submitting a manuscript. Further information about submission is available from the publisher at the given address and is printed on the inside back cover.

Offprints: The author (or main author) of an accepted paper will receive a free PDF of their paper. Paper offprints are available for a fee and should be ordered at proof stage. No page charges are levied by this journal.

Copying: This journal is registered with the Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA 01923, USA. Organisations in the USA who are registered with the CCC may therefore copy material (beyond the limits permitted by sections 107 and 108 of USA copyright law) subject to payment to the CCC of the per copy fee of \$16.00. This consent does not extend to multiple copying for promotional or commercial purposes. Code 0007-4853/2017/\$16.00. Organisations authorised by the Copyright Licensing Agency may also copy material subject to the usual conditions. For all other use, permission must be sought from Cambridge or the American Branch of Cambridge University Press.
