# The Journal of Laryngology and Otology

(Founded in 1887 by MORELL MACKENZIE and NORRIS WOLFENDEN)

EDITED BY

WALTER HOWARTH

ASSISTED BY

V. E. NEGUS AND F. W. WATKYN-THOMAS

1. Original Articles are accepted on the condition that they have not been published elsewhere.

2. Manuscripts should be typewritten, on one side only of the paper, and well spaced.

3. Galley proofs and engraver's proofs of illustrations are sent to the author. Corrections, which should be kept to a minimum, must be clearly marked and no additional matter should be added.

4. The order for reprints should be sent when returning galley proofs, and for this purpose special forms are supplied, on which the price of the reprints is stated.

5. Authors of Original Communications on Oto-Laryngology in other Journals are invited to send a copy, or two reprints, to the *Journal of Laryngology*. If they are willing, at the same time, to submit their own abstract (in English, French, Italian, or German) it will be welcomed.

6. Editorial Communications should be addressed to "EDITOR, *Journal of Laryngology*, c/o Messrs OLIVER AND BOYD, Tweeddale Court, Edinburgh."

7. The Annual Subscription is Forty Shillings, post free, and is payable in advance.

8. Single copies of back numbers, both of the present and the previous series, are on sale at Four Shillings each.

9. An Annual Subscription can be commenced with any number of the Journal, and the preceding numbers of the current year can be purchased at Four Shillings each.

## UNITED STATES OF AMERICA

Orders for this Journal, for single parts or yearly subscriptions, can be sent either through a local bookseller, or to Messrs G. E. STECHERT & Co., 31-33 East 10th Street, New York.

### CHEVALIER JACKSON'S INSTRUMENTS FOR ŒSOPHAGOSCOPY, LARYNGOSCOPY, AND BRONCHOSCOPY

New Models as made for Walter G. Howarth, F.R.C.S.

Each Instrument is made in accordance with the details of Chevalier Jackson's most recent models, and each is supplied with a *spare light carrier*, i.e., 2 light carriers and 2 lamps. All the models have been redesigned with a view to rendering them more easily cleansed; all the crevices and corners for the dirt have been taken away.

To ensure better visibility the tips of the forceps are *black*.

The Howarth-Jackson's Instruments are **less expensive than other American or English models**, and a further economy has been effected by rendering the instrument tips interchangeable, thus reducing the number of forceps handles and tips required.

The lamps are 2.5 volt and more durable than the usual models.

Manufactured only by

## DOWN BROS., L<sup>TD</sup>.

## The RE-EDUCATION of the SENSE of HEARING

BY MEANS OF THE

### ZUND BURGUET ELECTROPHONOIDE APPARATUS

Introduced into this country by Dr CATHCART in 1913 the treatment is rapidly becoming more popular. As to its efficacy there is no possible question in certain types of cases though it is not suitable for all forms.

The treatment consists of administering sounds by means of a special machine, either to one ear or to both simultaneously. A very large number of sounds may be produced, each one of which is under perfect control and may be increased or decreased at will. As we are special agents for this country machines are always available from stock.

PRICE COMPLETE WITH  
TWO ACCUMULATORS . **£96**

**ACOUSTIC DEPARTMENT:—8 WELBECK STREET, LONDON, W.1**

## A Carbon Arc Lamp for Local Application

FOR those requiring a lamp for local application the "R.L." Lamp is particularly suitable. It is very simple to operate, being of the hand-fed carbon type. The carbons for the "R.L." Lamp are specially imported from Italy and as they are of very large dimensions they give a rich output of the shorter rays of great antiseptic value.

The "R.L." Lamp functions equally well on A.C. or D.C. On the base are two switches so that a current of 3 or 5 amperes may be employed. This Lamp is equally well suited for general application as the front plate can be readily removed.

PRICE COMPLETE WITH 3  
PORCELAIN APPLICATORS **£23, 10s.**
