Houston, Texas
U.S.A.

Aims and Scope

The International Journal of Technology Assessment in Health Care has as its specific scope of interest the generation, evaluation, diffusion, and use of health care technology. It addresses the diverse audience of health care providers within medicine, nursing, and the allied health professions; decision makers in government, industry, and health care organizations; and the scholarly disciplines such as ethics, economics, law, history, sociology, psychology and engineering. The journal aims to fill the needs of those interested in the complexities of interaction between people and technology; technology as a force in social and organizational change; and technology as it is created, produced, applied and paid for. It examines descriptively and analytically the effects of technology as perceived from the vantage point of different academic disciplines and policy-making organizations and examines methods necessary to conduct studies and evaluations of technology.

The focus of the journal will be the international health care community. The experience of different countries in their encounter with health care technology, viewed comparatively, is invaluable to understanding its effects. Further, it is important to establish ties with the scholars, governments, and private institutions concerned with health care technology so that the experiences and learning of the international community in its parts can benefit the whole. The use of technology in health care has created some of the major dilemmas in society today. The journal will serve as a forum for the wide range of professionals interested in the assessment of medical technology, its consequences for patients, and its impact on society.

Each issue will contain a special section focussed on a particular topic, general articles, and regular feature sections.

Copying

This journal is registered with the Copyright Clearance Center, 21 Congress St., Salem, Mass. 01970. Organizations in the U.S.A. who are also registered with CCC may therefore copy material (beyond the limits permitted by sections 107 and 108 of U.S. copyright law) subject to payment to CCC of the per-copy fee of \$5.00. This consent does not extend to multiple copying for promotional or commercial purposes. Code 0266-4623/85/0000-0001 \$05.00.

For all other use, permission should be sought from the Cambridge or New York office of the Cambridge University Press.

Subscriptions

International Journal of Technology Assessment in Health Care (ISSN 0266-4623) is published quarterly in January, April, July and October. Four parts form a volume. The subscription price, which includes postage, of Volume 1 (1985) is US \$75.00 in the U.S.A. and Canada (£35.00 in the U.K. and rest of the world) for institutions; US \$40.00 (£18.00) for individuals. Single parts cost US \$21.00 (£10.00) plus postage. Institutional orders may be sent to a bookseller, subscription agent or direct to Cambridge University Press, 32 East 57th Street, New York, NY 10022, or outside the U.S. and Canada to Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 2RU England. Individuals must order direct from the Press. Application to mail at second class postage rates pending at New York, NY and at additional mailing offices. Postmaster: send address changes in the U.S.A. and Canada to *International Journal of Technology Assessment in Health Care*, Cambridge University Press, 32 East 57th Street, New York, NY 10022.

Advertising

Inquiries about advertising should be sent to the Journals Promotion Department of the Cambridge or New York office of Cambridge University Press.

SECOND ANNUAL MEETING
International Society for Technology Assessment
in Health Care

May 30 - 31, 1986
National Academy of Sciences
Washington, D.C.

SPECIAL SESSIONS - INVITED PAPERS:

- o Forecasting Medical Technology
- o Presentation on the Council on Health Care Technology

CONTRIBUTED PAPER SESSION:

Abstracts have been solicited to cover topics such as results of specific technology assessments, analyses of interactions between people and technology, technology as a force in social and organizational change, and technology as it is created, produced, applied, and paid for.

KEYNOTE SPEAKER

SOCIETY BUSINESS MEETING

POST-MEETING SITE VISITS FOR NON-U.S. ATTENDEES:

Sessions are being arranged at agencies and institutions involved in technology assessment in Washington, Baltimore, Philadelphia, and Boston during the week of June 2-5.

A summary of the scientific program will appear in the *International Journal of Technology Assessment in Health Care* following the meeting.

The meeting is being held in cooperation with the World Health Organization.

For meeting information, contact:
