

## PREFACE

This volume presents the Proceedings of the International Astronomical Union Symposium No. 76 on Planetary Nebulae. It contains the text of all the invited papers, the abstracts of the contributed papers, and edited discussions. The papers of B. Paczyński and G. A. Gurzadyan were read by title.

The meetings took place at Cornell University, Ithaca, New York, U.S.A. from June 6 to 10, 1977, and were sponsored by the IAU Commission 34 on Interstellar Matter and Planetary Nebulae. Locally, the meetings were co-sponsored by Cornell's National Astronomy and Ionosphere Center, and the Center for Radiophysics and Space Research. Financial support for the meetings was provided by the IAU, the U.S. National Science Foundation, The Astronomical Society of New York, and Cornell University.

The Scientific and Local Organizing Committees carried most of the work towards the success of the meetings. Thanks are also due to P. Clark, G. Helou, D. Murphy, and S. List who helped with the editing of this volume in various ways.
