ENTERED AT STATIONERS' HALL.

We have experimentally proved that Listerine is a powerful antiseptic, preventing the development of bacteria and decomposition of vegetable infusions.—*British Medical Journal*, May 3, 1890.

LISTERINE is an efficient, non-toxic ANTISEPTIC of known and definite power, prepared in a form convenient for immediate use.

It is a saturated solution of boric acid, reinforced by the antiseptic properties of ozoniferous oils.

It is unirritating, even when applied to the most delicate tissue.

It does not coagulate serous albumen.

It is quite generally accepted as the standard antiseptic preparation for use where a poisonous or corrosive disinfectant can not be safely used.

It is particularly useful in the treatment of abnormal conditions of the mucosa, and admirably suited for a wash, gargle or douche in catarrhal conditions of the nose and throat.

In proper dilution, it may be freely and continuously used without prejudicial effect, either by injection or spray, in all the natural cavities of the body.

There is no possibility of poisonous effect through the absorption of Listerine

A pamphlet descriptive of the antiseptic, and indicating its utility in medical, surgical and dental practice, may be had upon application to the manufacturers, Lambert Pharmacal Co., Locust and Twenty-first Streets, St. Louis, Missouri, U.S.A., or to their British Agents, Messrs. S. Maw, Son & Sons, 7-12, Aldersgate Street, London, Eng., but the best advertisement of Listerine is

Cerebro-spinal Meningitis.

MENINGOCOCCUS VACCINE

for preventive inoculation

Prepared from several strains of the *Diplococcus intracellularis meningitidis* (Weichselbaum) isolated during the present epidemic of cerebro-spinal meningitis.

Supplied in sets of 2 bulbs (affording prophylactic treatment for one adult), also in bottles of 25 c.c. (sufficient for 16 adults).

MENINGOCOCCUS VACCINE

for use in treatment

Prepared from several strains of the *Diplococcus intracellularis meningitidis* (Weichselbaum) isolated during the present epidemic of cerebro-spinal meningitis.

Issued in a dilution containing 25 million meningococci per c.c., and supplied in bulbs of 1 c.c., also in bottles of 25 c.c.

ANTIMENINGITIC SERUM

for use in treatment

Obtained from the blood of horses which have been immunised to the *Diplococcus intracellularis meningitidis* (Weichselbaum).

The mortality from epidemic cerebro-spinal meningitis has been greatly reduced since the introduction of serum treatment.

Supplied in bulbs of 15 c.c.

Further particulars will be supplied on request by

PARKE, DAVIS & Co., 50, Beak Street, Regent Street, LONDON, W.

Telegraphic and Cable Address: "Casara, London." Telephones: Regent 3260 (six lines).

CLINICAL INSTRUCTION.

A Clinical Demonstration on the Diagnosis and Treatment of Selected Cases (Larynx, Nose, Ear) will be given each Monday at 5 p.m.

A Course in Surgical Anatomy and Physiology will be given each Thursday at 5 p.m. These Courses are free to Students of the Hospital. Others a fee of 2 guineas for each Course.

Practical Instruction in the Diagnosis and Treatment is given **daily** in the Out-patient Department from 2 to 5 p.m., on Tuesdays and Fridays from 6.30 p.m. to 9 p.m., and Mondays at 9.30 a.m.

Major Operations are performed at 10 a.m. on Tuesday, Wednesday, Thursday, Friday, and Saturday, and Fridays at 2 p.m.

Minor Operations daily (Mondays excepted) at 9.30 a.m.

Operative Surgery Classes can be formed at any time on application.

Practice in Direct **Laryngoscopy, Tracheoscopy, Bronchoscopy, and Oesophagoscopy** will be given to Students, to enable them to become familiar with the use and manipulation of the instruments.

Practitioners and Medical Students are admitted to the Practice of the Hospital at a fee of five guineas for three months, eight guineas for six months, or ten guineas for a Perpetual Studentship. Each course may commence at any date. Special terms to men in actual practice who can only attend the hospital once or twice a week.

The Hospital contains 60 beds for In-patients. There is also an Out-patient attendance of nearly 50,000 yearly.

Gentlemen may enter to the practice of **The Throat Hospital** at any time, and on certain conditions eligible for appointment as **Clinical Assistants**, whose duty it is to Assist the Member of the Staff to whom they are appointed.

GEORGE W. BADGEROW, F.R.C.S., *Hon. Med. Sec.*
