

LECTURES ON GEOLOGY

INCLUDING HYDROGRAPHY, MINERALOGY, AND
METEOROLOGY, WITH AN INTRODUCTION TO BIOLOGY

BY

John Walker

PROFESSOR OF NATURAL HISTORY AND
KEEPER OF THE MUSEUM, UNIVERSITY OF EDINBURGH,
FROM 1779 TO 1803

EDITED WITH NOTES AND AN INTRODUCTION

BY HAROLD W. SCOTT

The birth of geology as an academic discipline in the latter part of the eighteenth century has long been associated with James Hutton, John Playfair, and Robert Jameson. The real father of geological teaching, however, was their lesser known predecessor, John Walker. The teacher of Playfair, Hall, and Jameson, he was the first to organize the known facts into the subject matter now called geology. The publication of the *Lectures on Geology* represents an exciting discovery in the history of science.

CAMBRIDGE

The Correspondence of Isaac Newton

VOLUME IV: 1694-1709

Edited by J. F. SCOTT

This is the first volume to be edited by Dr J. F. Scott who succeeds the late Professor Turnbull. It covers the years during which Newton was appointed Warden and later Master of the Mint. Newton's scientific activities continued at the same time.

Review of VOLUME I:

'If the letters still to come are as full of human and scientific interest as those in this volume the reader has a rich feast for years to come.'

Times Literary Supplement

Cambridge University Press are publishing a fully annotated and critical edition of all known *Mathematical Papers of Isaac Newton*. The first volume covering the years 1664-1666 and edited by D. T. Whiteside will appear in early 1967.

CAMBRIDGE UNIVERSITY PRESS

THE BRITISH SOCIETY FOR THE HISTORY OF SCIENCE

Future Programme

Winter Meeting—London, January 6, 1967

Principal Speakers:

DR F. GUERRA: 'Science in Pre-Columbian America.'

DR M. A. HOSKIN: 'Did Thomas Wright explain the Milky Way?'

Ordinary Meetings—London:

March 20: DR S. SMITH—'Charles Darwin's "Species" Work, 1837-1842.'

May 8: DR A. G. DEBUS—'The Paracelsians and the Scientific Revolution.'

Summer Meeting—details to be arranged.

Enquiries should be addressed to Dr M. P. Earles, Hon. Programme Secretary, Chelsea College of Science, London, S.W.3.

SCIENCE IN NINETEENTH CENTURY AMERICA

Edited by
NATHAN REINGOLD

This collection of documents, the majority never before published, examines the mind and work of the great American men of science of the last century; and sets out to discover and to analyse the origins of the contemporary state of science.

These papers and letters reveal what kinds of scientific activity occurred; the relations of Americans with their European colleagues; the development of self-consciousness in the American scientific community; the growth of certain formal scientific organisations; the relation of the scientist with higher education; the internal squabbles and the jockeying for position and recognition in the scientific world.

Science, History and Technology Book 1 800-1840

Maurice Goldsmith and H. J. Fyrth

The authors set out to examine how man's changing patterns of behaviour have affected, and been affected by, the advancement of science and technology. By common consent they have succeeded uniquely and well:

"The effect of the united whole is fascinating in the extreme . . . it will be followed by a host of imitators."

THE TEACHER.

"A rollicking book, packed with life and interest, full of striking facts and forceful quotations."

THE SPECTATOR.

"It should be a great stimulus to genuine scholarship."

TIMES EDUCATIONAL SUPPLEMENT.

"Impressive, thoughtful and thought-provoking."

THE SCIENCE TEACHER.

272 pp. Demy 8vo, illustrated, 18s. net (Jacketed Trade edition, 25s.)

Book 2, tracing the interaction between science and society from 1840 to the present day, will be published in summer 1967.

THE BRITISH SOCIETY FOR THE HISTORY OF SCIENCE

THE objects of the Society are to further the study of the history of science, by holding meetings for the reading and discussion of papers, and by facilitating the publication of relevant material.

The British Journal for the History of Science is the official organ of the Society.

Meetings are held in the Science Museum, Exhibition Road, South Kensington, London, S.W.7, usually in October, November, March and May. In addition a Winter Meeting is held in January and a Summer Meeting in June; neither of these meetings is necessarily held in London.

Membership is open to all persons approved by the Council of the Society, and elected at an Ordinary Meeting. The annual subscription is at present £2 10s. (for Students £1 10s.) and includes a free issue of the Society's Journal, which appears in June and December each year.

Those who wish to join the Society should write to the *Hon. Secretary*, Mr. J. A. Chaldecott, Science Museum, South Kensington, London, S.W.7.

Papers for inclusion in the Journal should be submitted to the *Hon. Editor*, Dr. M. P. Crosland, Department of Philosophy, The University, Leeds 2, from whom instructions may be obtained concerning the presentation and documentation of papers. All communications on editorial matters, and books for review, should be addressed to the Hon. Editor.

Particulars regarding advertising in the Journal may be obtained from the *Hon. Treasurer*, Mr. D. Chilton, Science Museum, South Kensington, London, S.W.7.

The British Journal for the History of Science is published by the Society. Four parts constitute one Volume; each part contains approximately 96 pages. The cover of each issue has a consecutive number for ease of collation in subsequent binding, e.g. No. 16 will be numbered: Vol. iv Part iv No. 16, and No. 17 will be: Vol. v Part i No. 17.

Order Forms, with lists of contents of Parts already published, are obtainable from the *Hon. Publications Secretary*, Dr. J. D. North, 39 Wellington Square, Oxford, to whom Orders for the Journal should be sent.

Whole Cloth Binding Cases lettered in Gold on spine and particulars of binding costs may be obtained from HEADLEY BROTHERS LTD., INVICTA PRESS, ASHFORD, KENT.
