

Applied Probability journals online at

<http://projecteuclid.org/jap>

<http://projecteuclid.org/aap>

Journal of Applied Probability and *Advances in Applied Probability* are now available online, in partnership with Project Euclid, at no extra cost to subscribers.

The online editions include

- an electronic version of each new issue (in PDF format) some weeks before the printed version becomes available
- an archive of all issues since 1998
- full bibliographic details of each article, along with its abstract and an actively linked list of references
- a search facility, allowing users to search by author name, article title, subject or keyword, or through the full text of the abstract or the article itself

Access

The abstract and reference list of each article are available free to all users; full access to the archive, including the full text of articles, is currently available at no extra charge to subscribers to the print editions.

Individual subscribers should register with Project Euclid by creating a user profile, entering their JAP and/or AAP subscription number where a 'subscriber code' is requested.

Institutional subscribers should complete and return a licence agreement (available at <http://www.appliedprobability.org>) to the Applied Probability office along with the details of their IP range.

Non-subscribers can gain access to individual articles on a pay-per-view basis.

For further information, please contact Sue Boyles: telephone +44 114 222 3922, fax +44 114 272 9782, email s.c.boyles@sheffield.ac.uk, write to

Applied Probability
School of Mathematics and Statistics
University of Sheffield

Subscription rates

Subscription rates for volume **48** (2011) of *Journal of Applied Probability (JAP)* are as follows (post free and including online access at <http://projecteuclid.org/jap/>): US\$312.00; A\$360.00; £195.00 for libraries and institutions; or US\$104.00; A\$120.00; £65.00 for individuals belonging to a recognised scientific society. The subscription rates for volume **43** (2011) of *Advances in Applied Probability*, the companion publication, are the same; if both journals are ordered directly from the Applied Probability office at the same time, the combined price is discounted by 10%. Please send all enquiries to: Applied Probability Subscriptions, School of Mathematics and Statistics, University of Sheffield, Sheffield S3 7RH, UK (telephone +44 114 222 3922; fax +44 114 272 9782; email s.c.boyles@sheffield.ac.uk). Cheques, money orders, etc. should be made payable to 'Applied Probability'. Payment is acceptable in US, Australian or UK currency, or by Visa or Mastercard. We can provide back issue prices on application.

Notes for contributors

Research papers are published in both *Journal of Applied Probability (JAP)* and *Advances in Applied Probability (AAP)*, with longer papers typically appearing in *AAP*. However, assignment of papers between the two journals is made by the Editor on an issue-by-issue basis. A submission to Applied Probability is considered as a submission to either journal. In addition, *AAP* publishes letters specifically related to papers that have appeared in *AAP* and *JAP* publishes short communications of a few printed pages in the nature of notes and letters specifically related to papers that have appeared in *JAP*. Review papers and papers in *stochastic geometry and statistical applications* are published in *AAP*.

Fifty offprints of each paper will be provided free, with additional offprints available at cost.

Papers submitted to the Applied Probability journals are considered on the understanding that they have not been published previously and are not under consideration by another publication. Accepted papers will not be published elsewhere without the written permission of the Trust. Submitted papers should be in English. It is the author's responsibility to ensure an acceptable standard of language, and a paper failing to meet this requirement may go back to the author for rewriting before being sent out for review.

Papers should include: (i) a **short abstract** of 4–10 lines giving a non-mathematical description of the subject matter and results; (ii) a list of **keywords** detailing the contents; and (iii) a list of **classifications**, using the 2010 Mathematics Subject Classification scheme (<http://www.ams.org/msc/>). Letters to the Editor need not include these. To assist authors in writing papers in the Applied Probability style, they may use the L^AT_EX class file `aptpub.cls`, available from <http://www.appliedprobability.org/>. Use of this class file is not a condition of submission, but will considerably increase the speed at which papers are processed.

Papers should be submitted as hard copy or as electronic files (with hard copy back-up). All submissions will be acknowledged on receipt and **must be accompanied by a covering letter stating the author's postal address and affiliation**. Hard copy: Send **all** submissions to the Applied Probability office in Sheffield, and not to individual editors. Two copies of the paper, at least one of which should be double spaced, should be sent to: **Executive Editor, Applied Probability, School of Mathematics and Statistics, University of Sheffield, Sheffield S3 7RH, UK**. Electronic submission: Please email a **double-spaced** PostScript™ (.ps) or portable document format (.pdf) file, not exceeding 1 Mb. **The files must be clearly identified by name in a separate covering message**. The address for email submissions is l.nash@sheffield.ac.uk. Authors should also submit one hard copy to the Executive Editor, as above.

Copyright

The copyright of all published papers is vested in the Applied Probability Trust. When a paper is accepted for publication, the Trust asks the authors to assign copyright by signing a form in which the terms of copyright are listed. Failure to do this promptly may delay or prevent publication.

Authorisation to photocopy items for internal or personal use, or the internal or personal use of specific clients, is granted by the Applied Probability Trust for libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the corresponding processing and royalty fees (see <http://www.copyright.com>) are paid directly to CCC, 222 Rosewood Drive, Danvers, MA 01923, USA. 0021-9002/11

Volume 48 Number 2

Research Papers

- 295 ANDREAS LÖPKER AND WOLFGANG STADJE. Hitting times and the running maximum of Markovian growth-collapse processes
- 313 WOLFGANG P. ANGERER. New limiting distributions for Bellman–Harris processes
- 322 AMINE ASSELAH, PABLO A. FERRARI AND PABLO GROISMAN. Quasistationary distributions and Fleming–Viot processes in finite spaces
- 333 TERTULIANO FRANCO, ADRIANA NEUMANN AND GLAUCO VALLE. Hydrodynamic limit for a type of exclusion process with slow bonds in dimension $d \geq 2$
- 352 N. LANCHIER. Contact process with destruction of cubes and hyperplanes: forest fires versus tornadoes
- 366 ECKHARD SCHLEMM. On the Markov transition kernels for first passage percolation on the ladder
- 389 PETER TANKOV. Improved Fréchet bounds and model-free pricing of multi-asset options
- 404 YINGHUI DONG, GUOJING WANG AND RONG WU. Pricing the zero-coupon bond and its fair premium under a structural credit risk model with jumps
- 420 PETER J. THOMAS. A lower bound for the first passage time density of the suprathreshold Ornstein–Uhlenbeck process
- 435 JUNG HYUN KIM, HYUN-SOO AHN AND RHONDA RIGHTER. Managing queues with heterogeneous servers
- 453 JI HWAN CHA AND EUI YONG LEE. A stochastic breakdown model for an unreliable Web server system and an optimal admission control policy
- 467 JOSE BLANCHET AND CHENXIN LI. Efficient simulation for the maximum of infinite horizon discrete-time Gaussian processes
- 490 RICARDO VÉLEZ IBARROLA, TOMÁS PRIETO-RUMEAU. Conditionally independent increment point processes
- 514 ADAM JAKUBOWSKI AND JOANNA KARŁOWSKA-PIK. Processes with block-associated increments
- 527 PATRIZIA BERTI, IRENE CRIMALDI, LUCA PRATELLI AND PIETRO RIGO. A central limit theorem and its applications to multicolor randomly reinforced urns
- 547 IOSIF PINELIS. Exact lower bounds on the exponential moments of truncated random variables

Short Communications

- 561 DARIO GASBARRA, TOMMI SOTTINEN AND HARRY VAN ZANTEN. Conditional full support of Gaussian processes with stationary increments
- 569 RAVI KALPATHY, HOSAM M. MAHMOUD AND MARK DANIEL WARD. Asymptotic properties of a leader election algorithm
- 576 JEAN BERTOIN. On the maximal offspring in a critical branching process with infinite variance
- 583 YAMING YU. Concave renewal functions do not imply DFR interrenewal times
- 589 MOSHE POLLAK AND ALEXANDER G. TARTAKOVSKY. On the first exit time of a nonnegative Markov process started at a quasistationary distribution
