

# Contents of Poster Paper Proceedings

The poster papers are being published in a companion volume, "Poster Proceedings of IAU Symposium 189 on Fundamental Stellar Properties: The Interaction between Observation and Theory," edited by T. R. Bedding (University of Sydney). Copies may be ordered from the Secretary, Chatterton Astronomy Department, School of Physics, University of Sydney 2006, Australia (e-mail: [astron@physics.usyd.edu.au](mailto:astron@physics.usyd.edu.au)).

## 1. INTERFEROMETRY & ANGULAR DIAMETERS

<b>Parallax, proper motion and binary star detection with the NPOI</b>	
D. J. Hutter . . . . .	2
<b>Images of Mizar A and other results from NPOI</b>	
C. A. Hummel & J. A. Benson . . . . .	6
<b>Wavelength-dependent stellar diameters using MAPPIT</b>	
A. P. Jacob, T. R. Bedding, J. G. Robertson, R. G. Marson, J. R. Barton & C. A. Haniff . . . . .	10
<b>Accuracy of Mark III angular diameters</b>	
D. Mozurkewich . . . . .	14
<b>Stellar parameters with high-accuracy visibilities</b>	
G. Perrin, V. Coudé du Foresto, S. T. Ridgway, J.-M. Mariotti, N. P. Car- leton & W. T. Traub . . . . .	18
<b>Stellar angular diameters by lunar occultation</b>	
N. M. White . . . . .	22

## 2. STELLAR FLUX DISTRIBUTIONS

<b>Accuracy of synthetic far IR fluxes of stars</b>	
N. S. van der Bliek, B. Gustafsson & K. Eriksson . . . . .	28
<b>H band spectra of cool dwarfs and giants</b>	
N. S. van der Bliek, B. Gustafsson, K. Eriksson & R. A. Bell . . . . .	32
<b>Precision of Cousins <i>UBVRI</i> photometry using modest instruments</b>	
M. R. Hidayat, M. Othman & A. Z. A. Aziz . . . . .	36

### **3. THE EFFECTIVE TEMPERATURE SCALE**

<b>Preliminary results of an effective temperature calibration for late-type giants cooler than M5</b>	
L. Fabbroni & A. Richichi . . . . .	42
<b>Effective temperatures and angular diameters from flux distributions</b>	
M. L. Malagnini & C. Morozzi . . . . .	46
<b>New photometric calibration of the visual surface brightness method</b>	
A. S. Miroshnichenko . . . . .	50

### **4. BINARY & MULTIPLE STARS**

<b>A systematic search for low-mass eclipsing binaries</b>	
J. V. Clausen, B. E. Helt, E. H. Olsen & J. M. Garcia . . . . .	56
<b>Single-star masses via Fourier transform spectroscopy</b>	
A. R. Hajian & N. M. Elias II . . . . .	60
<b>Mass, radius and surface gravity calibrations from eclipsing binaries</b>	
C. Jordi, I. Ribas, J. Torra & A. Giménez . . . . .	64
<b>HD 202908: a spectroscopic-visual triple system</b>	
F. C. Fekel, C. D. Scarfe, D. J. Barlow, A. Duquennoy, H. A. McAlister, W. I. Hartkopf, B. D. Mason & A. A. Tokovinin . . . . .	68
<b>Binary star differential photometry</b>	
L. C. Roberts, Jr. & T. A. ten Brummelaar . . . . .	72
<b>Modelling the non-thermal radio emission from the precataclysmic binary system V471 Tauri</b>	
J. Nicholls & M. C. Storey . . . . .	76

### **5. STELLAR ABUNDANCES & SPECTRA**

<b>The broadening of spectral lines which correspond to <math>p-d</math> and <math>d-p</math> transitions by collisions with neutral hydrogen atoms</b>	
P. S. Barklem & B. J. O'Mara . . . . .	82
<b>The present state of [Fe/H] analysis catalogs for cool stars</b>	
B. J. Taylor . . . . .	86

<b>Spectral analysis of rapidly rotating early B-type stars</b>	88
M. Vrancken . . . . .	88
<b>On the rotational velocities distribution of A-type stars observed by Hipparcos</b>	92
F. Royer, A. E. Gómez, J. Zorec, M. Gerbaldi, S. Grenier & R. Faraggiana	92
<b>Non-LTE line formation for Fe III and the iron abundance of early B-type stars</b>	96
M. Vrancken & K. Butler . . . . .	96
<b><math>^7\text{Li}</math> creation, <math>^3\text{He}</math> destruction in low mass stars</b>	100
A. I. Boothroyd . . . . .	100
<b>Is the stronger Mg<sub>2</sub> index an indicator of [Mg/Fe] enhancement?</b>	104
R. Tantalo . . . . .	104
 <b>6. PULSATING STARS</b>	
<b>A refined version of the Baade-Wesselink method</b>	110
D. Bersier . . . . .	110
<b>Very accurate distances to open cluster Cepheids from a near-infrared surface brightness technique</b>	114
W. P. Gieren, P. Fouqué & M. Gómez . . . . .	114
<b>The Cepheid radial velocity programme at Mount John University Observatory</b>	118
P. L. Cottrell, O. K. L. Petterson & M. D. Albrow . . . . .	118
<b>A new radial velocity curve for the bright southern Cepheid <math>\ell</math> Carinae</b>	122
M. M. Taylor, M. D. Albrow, A. J. Booth & P. L. Cottrell . . . . .	122
<b>Differential studies of Cepheids in the Magellanic Clouds</b>	126
J. P. Beaulieu & D. D. Sasselov . . . . .	126
<b>A spectroscopic search for nonradial pulsation in <math>\lambda</math> Boo stars</b>	132
J.-F. Gonzalez, D. A. Bohlender, J. M. Matthews & S. Yang . . . . .	132
 <b>7. STELLAR MODELS &amp; EVOLUTION</b>	
<b>Test of stellar evolutionary models accounting for metallicity</b>	138
C. Jordi, R. Asiaain, I. Ribas, F. Figueras & J. Torra . . . . .	138

<b>Ultraviolet colours as tracers of galactic ages</b>	142
A. Vallenari & C. Chiosi . . . . .	142
<b>Fundamental stellar properties in NGC 3680</b>	146
B. Nordström, J. Andersen & M. I. Andersen . . . . .	146
<b>The peculiar evolution of metal-free stars and the search for Population III stars</b>	150
M. Y. Fujimoto & I. Iben, Jr. . . . .	150
<b>Diffusion and mass loss in massive stars</b>	154
B. Salasnich, A. G. Bressan & C. Chiosi . . . . .	154
<b>Extreme deep mixing in globular cluster giants: constraint on future stellar models</b>	158
M. D. Shetrone . . . . .	158

## 8. EVOLVED STARS

<b>Evolved stars in globular clusters: comparison between observation and theory</b>	164
S. Desidera, G. Bertelli & S. Ortolani . . . . .	164
<b>The optical/near-IR spectra of AGB stars and their variations</b>	168
A. Lançon & P. R. Wood . . . . .	168
<b>Mass loss characteristics of AGB stars</b>	172
W. Windsteig, R. Loidl, S. Höfner & E. A. Dorfi . . . . .	172
<b>The chemical composition of post-AGB stars</b>	176
H. Van Winckel, L. Decin & C. Waelkens . . . . .	176
<b>The Mount Stromlo Abell cluster supernova search</b>	180
L. Germany, B. Schmidt, D. Reiss & C. Stubbs . . . . .	180
