

## CORRIGENDUM

### Intake of fruit and vegetables: implications for bone health

By Susan A. New

Volume 62 (2003), Number 4

Fig. 3 legend

For:

**Fig. 3.** Long-term ingestion of ammonium chloride (2 g/l) caused a decrease in bone characteristics and the development of osteoporosis in the rat. (▨), Length; (□), volume; (▩), fat-free solid; (▧), calcium; (■), density; (---), baseline level. Values are means with their standard errors represented by vertical bars.
