The Journal of Laryngology and Otology

(Founded in 1887 by MORELL MACKENZIE and NORRIS WOLFENDEN)

EDITED BY

WALTER HOWARTH

ASSISTED BY

V. E. NEGUS AND F. W. WATKYN-THOMAS

1. Original Articles are accepted on the condition that they have not been published elsewhere.
2. Manuscripts should be typewritten, on one side only of the paper, and well spaced.
3. Galley proofs and engraver's proofs of illustrations are sent to the author. Corrections, which should be kept to a minimum, must be clearly marked and no additional matter added.
4. Orders for reprints should be sent when returning galley proofs, and for this purpose special forms are supplied, on which the price of the reprints is stated.
5. Authors of Original Communications on Oto-Laryngology in other Journals are invited to send a copy, or two reprints, to the *Journal of Laryngology*. If they are willing, at the same time, to submit their own abstract (in English, French, Italian, or German) it will be welcomed.
6. Editorial Communications may be addressed to THE EDITOR, *Journal of Laryngology*, c/o HEADLEY BROTHERS, 109 Kingsway, London, W.C.2.
7. The Annual Subscription commencing with the January issue is Forty Shillings, post free, and is payable in advance.
8. Single copies, both of the present and the previous series, are on sale at Four Shillings each.
9. All Subscriptions, advertising and business communications should be sent to the Publishers, HEADLEY BROTHERS, 109 Kingsway, London, W.C.2.

United States of America

Orders for this Journal, for single parts or yearly subscriptions, may be sent either through a local bookseller, or to Messrs. G. E. STECHERT & Co., 31-33 East 10th Street, New York.

GUY'S SILENT SUCTION APPARATUS

as made for

WM. MAYHEW MOLLISON, C.B.E., F.R.C.S.

“An efficient *silent* suction apparatus is essential in many throat investigations and operations and indeed is used for many operations on other parts of the body.

“The above illustration shows an Electric Suction Apparatus which can rightly claim to be more efficient than the apparatus generally in use. The suction is continuous and so powerful that clots of blood and the most tenacious mucus are quickly removed. The apparatus is quiet and can easily be moved about the operation theatre and from one theatre to another. It is possible to use it for intra-tracheal

insufflation at the same time as suction since the pump delivers sixty litres of air per minute. The valves in the cylinder head are strong and specially designed for silence in operation and the sump of the machine carries enough oil for six months' continuous use; this ensures efficiency with the minimum of attention. The entire unit is mounted in a robust mahogany case which is fitted with four rubber-tyred castors. On the side of the case two large screw necked bottles are mounted. These bottles are the commercial “Kilner” type and can therefore be replaced with the minimum of expense. Blood and other fluids are removed from the operating field by the suction plant and find their way into the big bottle. The second bottle is a safety trap in the unlikely event of the first bottle becoming full at a moment when it is inconvenient to change it.

“There are no resistances to regulate the speed and in order to use the apparatus it is only necessary to connect it to the main electrical supply.” The makers are Down Bros., Ltd., London.

Announcing the New
ILFORD
FLUORAZURE
INTENSIFYING SCREENS
(Levy-West)

Ilford Limited have pleasure in announcing the introduction of a new type of Intensifying Screen. This new screen possesses important advantages over Calcium Tungstate screens chiefly on account of its higher intensity of fluorescence. The Ilford Fluorazure screen is free from actinic after-glow, is very flexible and easily washable.

A brochure giving full particulars will be sent on application to

THE STHENIC CONDITION

THE magnesium deficiency of modern diet is associated with states of impaired health, lowered vitality and asthenia, and also in high probability with certain pathological conditions. Halmagon is a carefully devised formula of the halogen compounds of magnesium in tablet form, given in a single daily dose, which makes good the deficiency of magnesium in the food-intake. Its administration prevents and corrects the results of this deficiency.

ITS ACTION IS ACCOMPANIED BY A HEIGHTENED FEELING OF WELL-BEING AND INCREASED MENTAL AND PHYSICAL EFFICIENCY—THE STHENIC CONDITION.

Halmagon Brand Tablets are issued in boxes of four unlabelled tubes containing 60 tablets, sufficient for one month's course. Price 2/6 net from all chemists and factors of pharmaceutical products.

"The Rôle of Metals in Intracellular Reactions", 80 pages, dealing fully with the therapeutics of Halmagon together with a full clinical trial supply will be sent on request.

Halmagon Emulsion is available to physicians for intramuscular injection. Price 4/6 net per box of 6 ampoules.

SIZE

THE MILLETT" ATOMISER

If you have been reluctant about using an Atomiser in the past because of the obvious disadvantages (awkwardness in use, difficulty of cleaning the containers, etc.), or if you hesitated to recommend them owing to their high cost . . . Study the Millett. Glance at the illustration, note its most important features, and its advantages should be sufficiently obvious without further comment, except perhaps to state that, as with all Millett products, atomisation is as complete for the heavy viscid oils as the more volatile aqueous solutions.

Model "N" (as illustrated) is specially designed for treatment of the nose and throat. Model "U" is for more general and nasal use, and generously priced at 2s. 6d. Model "G" specially designed for Gynecological treatment.
