

BECOME A LIFE MEMBER AND YOU'LL JOIN PRESTIGIOUS COMPANY

Become a Life Member of Fauna & Flora International to show an extraordinary commitment to an organisation that has been at the forefront of conservation for over 100 years.

Since its inception in 1903 as the world's first international conservation organisation Fauna & Flora International has been working tirelessly for the preservation of plants and animals across the world. For over 100 years Life Members have provided the support and commitment that has helped us to achieve so much, not least key achievements such as:

- Reintroducing the Arabian oryx to the wild
- Establishing the International Gorilla Conservation Programme
- Establishing Vietnam's first locally managed conservation organisation

Collaboration is key to our approach, and wherever possible we work with other global conservation organisations to ensure we are effective and efficient. That's why in 2015 we moved into the David Attenborough Building of the Cambridge Conservation Initiative with several other global conservation groups. Now we are asking you to be part of our wider collaborative work by becoming a Life Member.

As a Life Member you will receive Oryx—The International Journal of Conservation and our annual magazine Fauna & Flora, and you will also be invited to special events, where you can network with some of the world's leading conservationists. You will be joining a select group of supporters who have shown an extraordinary commitment to international conservation.

By joining Fauna & Flora International as a Life Member with a one-off payment of £1,500 you will be making a genuine difference to our conservation work and will forever be part of our global conservation organisation.

Gary Morrisroe/FFI

"I have been a member of Fauna & Flora International since the 1950s... investment in the work of FFI is truly an investment in the future of our planet"

Sir David Attenborough

<p>A Baka woman from Mintom in the South Region of Cameroon harvesting non-timber forest products. The Baka are one of the Indigenous groups represented by Gbabandi, a platform of forest Indigenous Peoples that has initiated a dialogue with key conservation actors to work towards community-led, rights-based conservation. The importance of human rights in conservation is receiving renewed attention through prominent inclusion of rights in the Kunming-Montreal Global Biodiversity Framework, which was adopted by the Conference of the Parties to the Convention on Biological Diversity in December 2022. In the lead article, Baka author Timothée Emini and colleagues from the Forest Peoples Programme describe how an Indigenous-led listening event has helped conservation decision makers better understand the effects of their decisions. Journals play an important role in advancing standards related to rights, and the articles in the human rights and conservation theme of this issue of <i>Oryx</i> contribute to these advances, including by addressing the right of local and Indigenous people to participate as authors in the peer-reviewed literature. See pp. 273–276, 288–297. (Photograph © Adrienne Surprenant, Forest Peoples Programme)</p>
